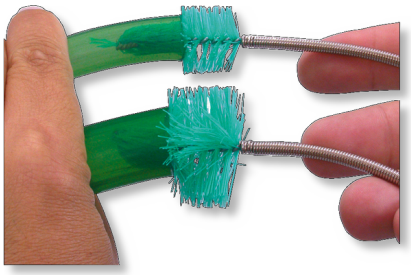
JBL Cleany

Double-ended hose brush for hoses from 9-30 mm

Suitable for:



- For clean hoses on filter and pumps to prevent output reduction caused by soiled hoses
- Easy to use: push matching end of hose brush through the hose and clean
- 160 cm long - cleaning of all hoses with 9 to 30 cm internal diameter (fits, for instance, to ALL JBL external filters)
- Up to 30 % more filter performance, averts a loss in performance: maintains the biological balance in the aquarium
- Package contents: 1 steel helix with small and large cleaning brush at each end, 160 cm long

JBL Cleany

Product information

Maintenance and cleaning
Food and plant remains and metabolic products create pollution in the aquarium water. By cleaning the tank and accessories and by carrying out regular partial water changes, your aquarium inhabitants will stay happy and you will enjoy your aquarium more too.

Clean hoses
JBL's double-ended hose brush has a highly flexible steel helix with brushes at both ends and ensures clean hoses and therefore 30 % more filter performance. Regular cleaning maintains the biological balance in the aquarium and averts a loss of filter performance.

The internal soiling of the hoses is not only caused by algae, it is also caused by normal biological processes. Bacterial lawns form on the inside of the plastic surface, which is not too much of a problem for the fish. But this "slimy" coating reduces, as already mentioned, the water flow by up to 30 %!

Convenient use
Remove hose from its device, push helix with brushes at the ends through the hose and pull. Clean about every eight weeks.
