PREMIUM FRIDGE FREEZERS FOR YOUR CHANGING NEEDS

Whirlpool's commitment to creative innovation delivers longer food preservation, increased energy efficiency and elegant design that complements and enhances your home and lifestyle no matter how your needs change.

A sense for preserving food freshness

6th Sense technology

Whirlpool 6th Sense 'intelligent' sensors detect temperature rises and direct chilled air to the affected area, restoring correct levels up to 5 times faster than normal fridges.

Total No Frost

Banishes ice from fridge and freezer by blowing chilled air around both to reduce the humidity. Food packaging doesn't stick together, food labelling stays clearly legible and storage space isn't wasted by ice build up.

Fresh control compartment

A special low temperature and low humidity compartment, specially designed to keep meat and fish fresher for longer.

Multi-flow

Multi-flow distributes cold air to each compartment in the refrigerator to maintain optimum storage conditions.

Supercool

Select this option after loading shopping and the fridge returns to the correct temperature faster than a conventional model.

Surround Cool

Cools newly stored items faster than a conventional fridge. Blows chilled air into the storage compartment from vents on the back wall and onto the door from vents above the crisper.

A sense of elegance & space management

Three way freezer shelf

A three position telescopic shelf which adapts to your needs. **Position 1:** Fully extended. **Position 2:** Half extended. Pushing the leading edge of the shelf forward reduces its depth by half (for tall items). **Position 3:** Fold away. Lift the leading edge up to fold the shelf flat against the back wall.

Pizza door balcony

Two star balconies ideal for pizzas or keeping ice cream soft and creamy. Accessible without opening freezer drawers.

Interactive LCD displays

Keeps you informed about storage conditions and useful options available. **Fast bottle chiller mode:** Cools beers/wines in the freezer in just 30 mins without the risk of bottle breakage (an alarm sounds when the beverages are ready to take out). **Vacation mode:** Reduces fridge power while you're away keeping the interior at around 12°C to save energy and prevent the build up of mould and smells etc.

Giant crisper with sliding divider

A large 32L fruit and vegetable crisper with a sliding divider which maximises the crisper space and keeps easily bruised fruits separate from bulky vegetables.

Deep door balconies

Whirlpool curved door balconies are deep (around 130mm) and can hold bulky bottles/Fruit jugs etc. Sliding dividers help maximise balcony space and double as a container.

Can Holder

Angled acrylic shelves in the fridge door hold up to six cans securely and leave the main fridge space free for other items.

Easy Cube

A closed water tray which can be filled and returned to the ice box without spills. Cubes form free of contamination and fall into a tray below by simply turning a knob.

Metallic finishes

Whirlpool's elegant stainless steel and silver finishes keep their flawless sheen in even the busiest kitchens and provide a touch of quality you can feel.

A sense of energy saving & the environment

Whirlpool 'A+' energy rated fridge freezers save energy, money and the environment by using up to 25% less energy than normal 'A Class' models!

PREMIUM FRIDGE FREEZER RANGE

Designed for your daily needs

Total No Frost

Total No Frost Fridge freezers circulate chilled air around the storage area to prevent the formation of ice and eliminate the need for defrosting. Frozen items don't stick together, labelling stays legible and no storage space is wasted by accumulated ice. The even temperature control also helps keep food fresher for longer.

Multi-Flow

Whirlpool's 'Multi-flow' system blows chilled air evenly all around the fridge interior to ensure perfect storage conditions throughout.

Metallic finishes

Models are available with elegant stainless steel or aluminium finishes that keep their flawless sheen in even the busiest kitchens and provide a touch of quality you can feel.

A+ Class energy savings

Whirlpool A+ Class fridge freezers are good for the environment and your wallet. Up to 25% more energy efficient than ordinary 'A' Class models and up to 45% more energy efficient than 'B' rated models, they can make valuable savings of up to £10 a year or up to £100 over the life of the appliance.

Anti-spill shelves

Safe, toughened glass shelves with lipped edges that prevent spills running onto food stored below.

Fresh control compartment

A special compartment with temperature and humidity kept at very low levels, creating perfect storage conditions for perishables like meat and fish.

Energy saving A+ Class

Choosing energy efficient home appliances is clearly the environmentally responsible thing to do but it also makes sound monetary sense as a Whirlpool 'A' Class fridge freezer can save an appreciable amount of energy over a 12 month period. Up to 25% more energy efficient than ordinary 'A' Class models and up to 45% more energy efficient than 'B' rated models, 'A+' models make valuable savings of up to £10 a year or up to £100 over the life of the appliance.

Internal fan

On 6th Sense models a fan in the back wall of the storage area blows chilled air all around the fridge to maintain an even storage temperature and restore the set temperature level quickly after the door has been opened.

Supercool

Select this option after loading shopping and the Supercool system will blow chilled air around the storage cavity to quickly restore the set temperature far faster than a conventional fridge.

Large crisper drawers

Whirlpool fridges have one or two (according to model) large fruit and vegetable crispers. Situated in the coolest zone (at the bottom of the fridge) they keep fresh produce in perfect condition for longer than in a conventional refrigerator.

Lidded dairy compartment

Specially designed to protect and preserve delicate dairy products like butter and cheese, this transparent box has a hinged lid which has been thoughtfully designed not to break even if accidentally left open when the fridge door is closed.

LED temperature displays

LED temperature displays with push button adjustment provide accurate temperature control.

4 Star ice box

A four star rated ice box which can keep frozen items in perfect condition for up to 12 months.

Flexible shelves

You can position Whirlpool fridge shelves at a height convenient to you.

Anti-spill shelves

Safe, toughened glass shelves with lipped edges which retain spills and prevent them from contaminating food stored below.

NB: Not all models have all features. For individual product features see specification tables at the back of each section.

Longer and better food preservation

Freezers enable us to enjoy our favourite foods all year round and reduce the frequency of our food shopping. 'Total-no-frost' models end the chore of defrosting and accurate temperature control keeps frozen food fresher, longer. Rapid new fast-freeze options lock in taste and goodness. With a choice of 'upright' or 'chest' freezers in a variety of capacities you're sure to find a Whirlpool freezer that fits your kitchen or utility room and is just right for your family food storage needs.

Electronic control

Whirlpool advanced temperature control technology brings new levels of freshness and hygiene to frozen food storage. The accuracy of electronic temperature control keeps frozen food in perfect condition longer than conventional freezers. New LED displays with push button controls keep you fully informed of any changes in storage conditions and enable you to make adjustments quickly and easily if necessary.

Audible alarms

Selected Whirlpool freezers have 'door open' and/or 'high temperature' audible alarms which warn you of the problem and help you preserve the quality of your stored food.

A+ Energy Class

Whirlpool 'A+' class freezers are more energy efficient than 'A' class models and they could make savings of around £10 a year or up to £100 over the life of the appliance.

Total-no-frost

Whirlpool 'Total-no-frost' freezers never need defrosting. The system blows chilled air around the storage cavity to keep the humidity to a minimum and prevent the build-up of frost. With no ice to adhere to the interior or stored items, no storage space is wasted. Transparent drawers stay clear, food labelling stays legible and packaging doesn't stick together. With no accumulation of 'stale' ice, storage conditions are more hygienic.

Rising time

The 'rising time' is the time it takes for the temperature of stored food to rise (after a power cut) to a level where the food is no longer stored safely.

Finishing touch

Selected Whirlpool freezers are available in 'professional look' stainless steel and silver finish options which match other designer models in the Whirlpool range.

Easy open freezer doors

Whirlpool Freezers open easily thanks to an innovative valve which equalises door pressures.

Chest freezers

Whirlpool chest freezers let you enjoy fresh fruits and vegetables out of season and reduce the frequency of your food shopping. Available in a choice of capacities from 105 litres up to 510 litres there are models for families of all sizes. Easy-to-open counterbalanced doors, (which stay open at any angle) allow you to load and unload with both hands and Whirlpool's unique flexible storage system enables you to find the item you want easily.

Colour Range: **White**

Max-Space drawers

Big freezer drawer boxes ideal for storing large items like frozen turkeys etc.

Upright freezers

Whirlpool upright freezers save floor space in the kitchen. Stunningly styled with silver designer handles and 'professional look' stainless steel and silver finish options they make prestigious additions to any kitchen. New LED displays with temperature warning lights inform you of storage conditions and alert you to any rise in temperature. Most models have doors which can be fitted left or right handed giving you flexibility of positioning in your kitchen.
