THREE COLOURS FOR A WHOLE WORLD ColorEdge by EIZO

IN FINITE COLOUR

Here at EIZO, we've made it our mission to capture all the colours the world has to offer and conjure them onto the screens of our monitors in all their glory. And we're close to achieving that goal. ColorEdge monitors from EIZO have a range of colours so infinitely deep that you'll always be able to discover something new in them – new hues and new worlds.

ColorEdge graphic monitors from EIZO also reproduce even the smallest details with a true-to-life appearance and in outstanding quality, thanks to their unique precision and perfectly even brightness. Whether you're working on photos, graphics or videos, ColorEdge models provide a range of practical functions and exceptional quality to make your job easier. EIZO is known around the world for its highend monitors that are in a class of their own. That's why we also offer our standard extra-long five-year EIZO warranty on our ColorEdge models.

Turn any job into something special. Just like we always turn three colours into something special: the perfect image.

Red, green and blue. To some people, these are just colours. But to us, these colours mean one thing above all: Infinity.

TRUE.

Our ColorEdge models cover 99%* of the entire AdobeRGB gamut and ensure completely homogeneous tone values across the entire screen.

But that's not all: In addition to unique colours and impressive precision, ColorEdge monitors also deliver an unparalleled overall package of components, professional software and service. EIZO provides every customer with an individual monitor solution ideally suited to their needs.

Our ColorEdge models are divided into two series: the CS series and the CG series. Both were developed specifically to meet the demanding requirements of creative users. The CS series is ideal for prosumers, whilst the CG series can meet even the most professional requirements.

Read on to learn more about the high colour accuracy of the EIZO ColorEdge series and find the model that perfectly meets your needs.

"When I started using ColorEdge, I was blown away by the beauty and reproducibility of the colours. I felt like it was a big turning point in my work."

> Kanako Sato | EIZO ColorEdge Ambassador Japan Underwater and street photographer

Our ColorEdge Ambassadors – around 50 representatives of our brand – work as professional photographers, film-makers and in a variety of other creative industries. But above all, they are people whose outstanding work inspires us.

www.kanakosato.com

INFINITE

Creatives depend on their monitor to deliver absolute precision when they view an image or video file.

But making an EIZO monitor into a perfect display tool takes a great deal of effort and technology. Precision manufacturing, care and attention, temperature fluctuations during operation and other factors can have a major impact on image quality.

EIZO wants to ensure that creatives around the world can always rely on their own vision. That's why we developed the Digital Uniformity Equalizer (DUE) to guarantee that the image is displayed homogeneously, right out to the edges of the screen. Painstaking calibration at the factory ensures that the monitor displays exactly the right hue for every single pixel, selected from millions of options. Lossless hardware calibration guarantees that image quality will remain consistently high throughout the life of the device. By covering the standard colour ranges like AdobeRGB and DCI-P3, EIZO monitors can display countless real-life colours on screen – allowing your every thought and idea to come true.

THE PERFECT IMAGE FOR EVERY

Our ColorEdge range includes graphic monitors for a wide range of different applications:

The perfect foundation

The CS series forms the foundation of the ColorEdge series and provides all the basics that dedicated hobbyists and prosumers need from a monitor.

Perfect for pro photographers

The CG2730 and the CG2420 have been specially developed to meet the needs of professional photographers. With a built-in calibration sensor and a light protection hood included, they leave nothing to be desired.

Perfect in 4K

The CG248-4K and CG319X combine the advantages of the CG series with extremely high resolution of up to 185 ppi, making them ideal for post-production of 4K video and editing of high-resolution photos.

Perfect for post-production and pre-printing

The CG247X and CG279X are optimised to handle the special requirements of video post-production and pre-printing. The extremely high-performance built-in sensor also allows calibration results to be validated, while the 3D LUT guarantees exceptional precision.

VERY WORLD

Perfect for grading

With its extreme contrast ratio of well over 1,000,000:1, the Color-Edge PROMINENCE CG3145 is the ideal LCD monitor for video post-production and, above all, for colour grading in an HDR workflow.

$CSSERIES: \underline{\angle}$

The CS models offer excellent image quality and extremely precise colour differentiation, ensuring that your photo prints meet your requirements in every way. The CS series provides photographers

with a professional foundation from which to achieve reliable image processing results. Which all makes your work easier. Always.

Key Features CS

Gamut

Extensive coverage* of key colour ranges AdobeRGB, DCI-P3, and ISO Coated and U.S. print gamuts. Web Coated.

Digital Uniformity Equalizer (DUE)

Homogeneous display of colour and brightness across the entire screen.

Soft transitions Up to 16-bit look-up table (LUT) for completely smooth display of gradients, with no clipping or banding.

10 Bit

Simultaneous 10-bit display allows for billions of different hues – 64 times as many as in 8-bit mode.

Presets Standard colour modes such as AdobeRGB,

sRGB, Rec709, EBU, SMPTE-C and DCI are pre-configured at the factory.

_ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _

Anti-reflection coating The IPS panel boasts a top-quality anti-reflection coating. The reflected light is diffused, which prevents glare. The wide viewing angle guarantees minimal changes in colour and contrast

_ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _

Factory calibration

and in every primary colour

Hardware calibration

Highly precise, customised set-up of colours and tone curve with tightly-knit grid points,

Hardware calibration directly in the monitor look-up table: quick, easy, lossless and with excellent colour precision. Calibration is based on the factory calibration, making it unique in terms of precision and speed.

Work without screen flicker

The screen remains flicker-free at all brightness settings, reducing eye strain.

5-year warranty

EIZO provides a five-year warranty with an on-site replacement service

Ergonomics

A flexible stand allows you to adjust the height of the monitor, tilt or swivel it, and switch between portrait and landscape formats.

ColorNavigator

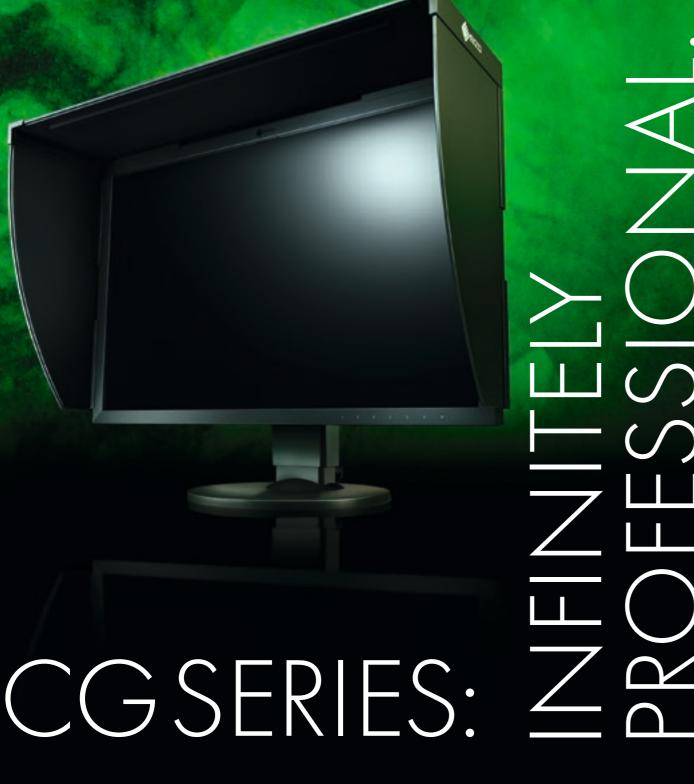

Intuitive and exact EIZO software for hardware calibration in ColorEdge monitors, making for precisely customised colour reproduction to meet the exact requirements for the intended use.

* Except the CS230

"For major projects like my photography book *Chasing Light,* it's extremely important to me that my monitor reproduces colours precisely, exactly the way they will look on the printed page later on. That's why I trust EIZO CG monitors."

> STEFAN FORSTER | EIZO ColorEdge Ambassador Switzerland Landscape photographer and filmmaker

The CG series is the best choice for anyone working to professional standards. It delivers everything you would expect from high-end monitors, and much more besides. For example, the CG2420 and the CG2730 both offer a range of innovative extras and helpful additional functions to make editing images easier than ever before. The standard light protection hood and high-quality True Black LCD panel also ensure excellent display quality and deep colour tones whilst a

built-in, automatic sensor regularly calibrates the monitor, making manual calibration unnecessary. But the undisputed champions of the ColorEdge series are the CG319X and CG248-4K models. They have impressively high resolutions of 149 and 185 ppi, respectively, and allow you to get an extremely clear impression of your images on the monitor - making for an ideal print preview.

Key Features CG

Gamut

Extensive coverage of key colour ranges AdobeRGB and DCI-P3, and ISO Coated and U.S. print gamuts. Web Coated.

Digital Uniformity Equalizer (DUE)

Homogeneous display of colour and brightness across the entire screen.

Soft transitions

Up to 24-bit look-up table (LUT) for completely smooth display of gradients, with no clipping or banding.

_ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _

10 Bit

Simultaneous 10-bit display allows for billions of different hues – 64 times as many as in 8-bit mode.

The IPS panel boasts a top-quality anti-reflection coating. The reflected light is diffused,

which prevents glare. The wide viewing angle

guarantees high colour and contrast stability.

Presets

Standard colour modes such as AdobeRGB, sRGB, Rec709, EBU, SMPTE-C and DCI are pre-configured at the factory.

True Black

True Black improves the contrast ratio allowing dark hues to reach their deepest vafrom the side.

4K resolution*

Anti-reflection coating

Extremely high resolution* of up to 185 ppi displays images in outstanding detail

Factory calibration

Highly precise, customised set-up of colours and tone curve with tightly-knit grid points and in every primary colour.

lues, particularly when the monitor is viewed

Work without screen flicker

The screen remains flicker-free at all brightness settings, reducing eye strain.

sed on the factory calibration, making it unique in terms of precision and speed.

Hardware calibration

Quick stabilisation Automatic, temperature-dependent calibrat-

ion of colour drift whilst the monitor is in use. It takes just three minutes of warm-up time for brightness, colour and tone to fully stabilise.

3D LUT**

Hardware calibration directly in the monitor look-up table: quick, easy, lossless and with excellent colour precision. Calibration is ba-

The 3D LUT delivers the most precise gamma and exact colour tone reproduction, ensuring a consistent colour temperature throughout the entire greyscale range.

5-year warranty

EIZO provides a five-year warranty with an on-site replacement service***

Ergonomics

A flexible stand *** allows you to adjust the height of the monitor, tilt or swivel it, and switch between portrait and landscape formats.****

I/P conversion

Support for refresh rates of 60, 50, 30, 25 and 24 Hz. The monitor also features I/P conversion

Built-in calibration sensor***

The sensor integrated into the bezel is perfectly suited to the monitor, allowing for automatic calibration and guaranteeing maximum colour precision with a minimum of effort.

_ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _

Light protection hood

The shading hood (included) reduces light falling on the monitor from above and the sides, reducing reflection on the screen and protecting the user's eyes. It also improves the precision of the image display.

ColorNavigator

Intuitive and exact EIZO software for hardware calibration in ColorEdge monitors, making for precisely customised colour reproduction to meet the exact requirements for the intended use.

COLOUR MANAGEMENT SOFTWARE Simple and precise calibration – with ColorNavigator from EIZO

Our ColorNavigator software enables easy and precise hardware calibration of ColorEdge monitors. The software allows the user to enter target values for brightness, white point and gamma, at which point the automatic monitor adjustment is launched.

ColorNavigator works in combination with a range of integrated and external measuring devices*. The software also adjusts a look-up table that comes pre-installed in ColorEdge LCD monitors. The result: reliable hardware calibration within minutes.

ColorNavigator can be downloaded from the EIZO website. In addition, the CG series has an integrated measuring device to help with monitor calibration.

Quick and easy colour management thanks to Quick Color Match

The new Quick Color Match software greatly simplifies the colour management workflow steps you need to go through when printing out images at home. You can automatically make the necessary adjustments to your monitor, software and print settings by dragging and dropping in Quick Color Match.

All you need to do is select the paper type. Quick Color Match automatically makes the necessary adjustments to the colour management workflow settings, allowing you to quickly and easily match the monitor display with the printout in just a few clicks.

You can find more information on our website.

^{*}A measuring device is not included with CS models but is required for hardware calibration.

ColorEdge monitors from EIZO offer the right features for any application.

On the following pages you will learn more about the technical specifications that make each and every one of our monitors so special.

¹ The zero pixel error guarantee applies to fully illuminated sub-pixels (partial image elements ISO 9241-307) for six months from the purchase date.

² Brightness guarantee up to 10,000 hours of monitor usage time from the date of purchase with a recommended maximum brightness of 120 cd/m² and a colour temperature of between 5000 and 6500 K.
³ Maximum of 30,000 hours of monitor usage time from the date of purchase

 ¹ The zero pixel error guarantee applies to fully illuminated sub-pixels (partial image elements ISO 9241-307) for six from the purchase date.
 ² Brightness guarantee up to 10,000 hours of monitor usage time from the date of purchase with the recommended maximum brightness of 120 cd/m² and a colour temperature of between 5000 and 6500 K.

³ Brightness guarantee for a brightness of 800 cd/m² and a white balance of 6500 K for 3 years from the date of purchase or a monitor usage time of 10,000 hours, whichever is the earlier. ⁴ Maximum of 30,000 hours of monitor usage from the date of purchase.

ACCESSORIES

CH6 light protection hood supported models: CS230

CH2400 light protection hood supported models: CS2420 The CH2400 is included with the CG248-4K and CG2420 models.

CH2700 light protection hood supported models: CS2730 The CH2700 is included with the CG2730 and CG279X models.

EX3 calibration device Calibrate the monitors of the CS series to the perfect settings using this external calibration device.

Creative training

Our EIZO website offers plenty of useful information on the colour management workflow to help you improve your digital photos and digital workflow.

"I always get perfect prints and, sometimes, questions from colour correction guys from the lab: Alex, what monitor do you use? because they don't even need to touch my pictures before printing."
