KSK-5230 IN

Silicone keyboard with touchpad

Ergonomically designed silicone coated keyboard with 87 keys incl. 12 FN keys and a multi-finger touchpad. Our KeySonic keyboard has an excel-lent tactile feedback and is waterproof to IP68 norm and can therefore even be immersed in liquids.

The surface of the KeySonic keyboard is equipped with a special coating and therefore has a good mechanical and chemical resistance so that you can work with standard disinfectants and the keys print will not fade.

The integrated touchpad enables the use of the KeySonic keyboard without any external, additional mouse. This is both a cost and a practical advantage, due to the fact that the touchpad is easy to operate correctly both with and without rubber gloves. Considering from an economic and hygienic point of view, the KeySonic keyboard is the correct choice!
