

# Monitor Privacy Screens

Keep Your Business... Your Business

FP Series Monitor Privacy Screens limit the field of vision to +/- 30 degrees, making the screen only visible directly from the front and not from the side. They are easy to install, either with the included frameless tab holders or double-sided tape. The reversible privacy screens also use an anti-reflective coating to reduce glare, and they filter out harmful blue light by up to 30 percent.

## Features & Benefits:

- **Limited Viewing Angle:** Narrows the field of vision on the screen to +/- 30 degrees, helping you keep the information on your screen private and reducing the chances of a visual data breach, which is important both in the office or in a public setting
- **Blue Light Reduction:** Filters out harmful rays by up to 30%, easing eye strain and reducing the chances of blue light interrupting your natural sleep patterns
- **Installation Options:** The privacy screen can be mounted either with the included frameless tab holders that attach to the edges of your monitor, letting you quickly and easily insert or remove the privacy screen, or you can mount it with double-sided tape that adheres directly to the screen for a cleaner look
- **Anti-Reflective Coating:** Reduces glare from any outside light sources that can interfere with your viewing clarity
