Easily increase wireless network coverage throughout your home

EM4595

EAN: 8716065332711

Packaging contents: EM4595, QIG, Cat5e cable, Registration/Warranty label

OVERVIEW

- Easily increase your 2.4GHz network coverage
- Reach a maximum wireless speed up to 300Mbps
- Wireless repeater and Access-point
- WiFi Signal Indicator: find the best location for the repeater
- Works with any wireless router
- Easy setup with WPS function
- One 100Mbps LAN port
- Installation wizard via your tablet and smartphone
- 5-Year warranty
- Accessible helpdesk
- Multilingual user manual
- Easy installation

SPECIFICATIONS

- Network mode: Repeater, Access Point en Client mode
- Network interface:
- 1x LAN 10/100Mbps Ethernet LAN port
- Wi-Fi: 300Mbps on 2.4GHz band
- Complies with IEEE 802.11b/g/n for 2.4GHz band
- Supports WPS: functionality by WPS button
- Security: WEP, WPA and WPA2 wireless security
- Chipset: RTL8192ER
- Antenna: 2x 3dbi internal antenna
- Configuration: Webbased
- Dimensions : 55 (W) x 82 (H) x 40 (D) mm
- Weight : 77 g
- Supply voltage range : 100VAC – 240VAC (50/60 Hz)
- Power Consumption : 2 ~ 2,5 W

Universal WiFi Repeater with WPS

Easily increase wireless network coverage throughout your home

DESCRIPTION

Increase your network coverage throughout your home or office with the EM4595 Universal WiFi Repeater. The installation is very easy by using the WPS button or web interface. The built-in WiFi signal indicator shows you the best location for the EM4595 WiFi Repeater.

Easy setup with WPS

The EM4595 supports WPS (WiFi Protected Setup). Installing the repeater is very easy. First, you need to press the WPS button on your router. Then, press the WPS button on the WiFi Repeater. The repeater and router make connection with each other. Do you prefer installing the repeater manually? Then install the EM4595 via the web interface in the browser of your tablet and smartphone. How easy is that?

WiFi signal indicator

A WiFi repeater needs to be located on the right location to get the best performance. Do you find it difficult to find the right location for the repeater? The EM4595 has a special WiFi signal indicator which helps you to find the best location for the repeater and get the maximum bandwidth and range.

Works with any wireless router

The Eminent WiFi repeater uses the 300N standard. This standard is compatible with all common routers. This will make the WiFi repeater universally applicable.

Usable as access point

The EM4595 WiFi Repeater works as an access point too. An access point converts a wired network connection into a wireless signal. You are able to make use of a WiFi signal in places you normally could use a wired connection only.
