

NSVGALOCK

NEWSTAR VGA LOCK, 2 METER CABLE

Newstar VGA Lock and Security Cable (2 metres)

NewStar's security lock, NSVGALOCK, allows you to secure all hardware using a VGA port. This system prevents theft of your valuable hardware using a super strong two meter steel cable with combination lock. Simply install the cable to the VGA port and a desk or other heavy subject to prevent easy theft. The VGA lock splits your VGA port allowing you to keep using the VGA port as opposed to other solutions on the market.

Most systems on the market use easy to disconnect systems with glue that can easily be taken off your hardware. By using this new system the thief has to break your VGA port. After breaking the VGA port, the PC, monitor or Beamer is useless and hard to sell. Thieves will think twice before stealing hardware when fitted with this VGA LOCK!

Act now! Protect your hardware with this VGA LOCK and decrease theft!

All installation material is included with the product.

SPECIFICATIONS

Connection	VGA
Color	Silver
Warranty	3 year
EAN code	8717371440749
