BT7853

HEAVY DUTY Ø50MM POLE

Designed for the large scale pole mounted installations that standard Ø50mm poles cannot hold, the BT7853 is a heavy duty alternative made from 3.2mm thick steel capable of supporting these heavier loads. The poles are available as standard in 2m or 3m lengths which can be cut to an exact length if required, and feature safety bolt holes top and bottom for a secure installation. The BT7853 is internally unobstructed for cables to pass through easily and poles can also be linked together to create even larger installs, using BT7824 external pole joiners.

SPECIFICATION

Steel thickness	3.2mm
Max Load	350kg
Lengths available	2m, 3m*
Colour	Black

*Please note poles can be cut to an exact length if required

FEATURES

- 3.2mm thick steel is capable of supporting heavier loads
- Poles can be cut to length if required
- Can be mounted from floors, ceilings or both for more mounting flexibility
