

75" interactive 4K UHD LCD Touchscreen with integrated annotation software

The TE7568MIS-B1AG is a perfect solution for educational and corporate use.

Its 75" infrared 20-point touchscreen with integrated interactive Note writing software allows users to make annotations on files opened directly from a USB device or internal memory. The display also supports the playback of presentations, video and almost any other type of content stored on a USB device or internal memory.

The high quality commercial IPS LCD screen with a 4K UHD resolution (3840 x 2160 - 8.3 megapixel) guarantees stunning images with superb image quality from anywhere in the class room or meeting room. The anti-glare coating drastically reduces ambient reflection in high brightness environments without compromising image clarity and sharpness.

The screen has a 24/7 non-stop operating time and is equipped with 4 mm thick glass to ensure a long durability in high-use environments like a class room or meeting room.

Unlike interactive whiteboards, there are no shadows or reductions in image performance to contend with.

TOUCH TECHNOLOGY - INFRARED

The infrared technology uses infrared backlight. A touch event is registered with great accuracy when the infrared light is blocked by finger or stylus. This technology does not rely on an overlay or substrate, so it is impossible to physically "wear out" the touchscreen. Moreover the display characteristics remain virtually unaffected by the touch functionality.

4K

UHD resolution (3840x2160), better known as 4K, offers a gigantic viewable area with 4 times more information and work space than a Full HD screen. Due to the high DPI (dots per inch), it displays an incredibly sharp and crisp image.
