NETGEAR®

900 Series

Connect your Network with Style

Traditional switches are not designed to be installed in a living room, bedroom, or office desk, so usually we hide them because the design is not user-friendly -- they have flashing LED lights and a bunch of cables that we don't want to see.

NETGEAR tackles this problem head-on with the industry's first consumer-friendly switch with integrated cable management. The 900 Series switches are the first switch that you want to display!

Thanks to the stylish design and the built-in cable organizer, you will keep your office and home neat and tidy. Moreover the LED ON/OFF button will keep your environment quiet so no light will disturb your movie, work or sleep.

Why the 900 Series switches are ideal for Home and Business Users

Plug-and-play: Automatic connectivity to your router or modem of 7 additional wired connections. No need for an IT expert!

Sleek and Stylish Design: The round shape and slim design will match any decor, and our lightweight housing allows the switch to be mounted anywhere

Integrated Cable Management: Clean up your network with style -- No more messy cables!! Our integrated cable management will keep your office and home neat & tidy with no more tangled cables causing an unsightly mess.

Silent and invisible: Don't allow a blinking light to disturb your movie, work or sleep. Just push the LED ON/OFF button and any flashing lights will be turned off; also the fanless design keeps the switch silent.
