

## MX-4 High Performance Thermal Paste

- High efficiency
- Particularly suitable for gamers and overdrclockers
- Non-conducting
- Non-capacitive

## MX-4 High Performance Thermal Paste

The MX-4's consistency is engineered for simplicity of application, superior thermal conductivity and high durability. With its new formula, the MX-4 guarantees exceptional heat dissipation from the components and supports the stability needed to push your system to its limit.

The **MX-4** is metal-free and non-electrical conductive which eliminates any risks of causing short circuit, adding more protection to the CPU and VGA cards.

Specifications	
Thermal Conductivity	8.5 W/mK
Viscosity	870 Poise
Density	2.5 g/cm <sup>3</sup>
Volume Resistivity	3.8 x 10 <sup>13</sup> Ω-cm
Net Weight	2 g/4 g/8 g/20 g/45 g
