

Charging Trolley

for 36 Tablets/Notebooks

Protection and charging of mobile devices in shared environments

Techly Professional offers the complete solution for charging, storage and storage of tablets, notebooks and smartphones, suitable for schools, companies, libraries, associations and for all those situations where you need to store and charge multiple devices at the same time. This practical charging station is equipped with ventilated shelves with removable dividers to accommodate up to 36 tablets / notebooks. Equipped with 4 wheels (2 with brake) and 2 PDU with 12 UNEL outlets each.

-  **Safety:** sturdy 1.5mm painted metal cabinet. Door with handle with key lock. It is the ideal solution for storing all mobile devices safely during charging or at the end of their use.
-  **Versatility and practicality:** 3 shelves each with 12 compartments for storing up to 36 devices. The separators are easily removable to accommodate even larger devices. Supplied with 2 PDU with 12 UNEL sockets each and 5 m power cable with integrated Schuko plug.

Equipped with 4 wheels and two side handles to facilitate movement; 2 wheels with brakes allow the station to be locked to guarantee maximum stability. 19" rear uprights for installations of additional devices.

-  **Broad application:** considering the wide use of mobile devices such as notebooks, tablets, e-books, smartphones... in school, meeting, business conference, medical field... this solution is essential to manage in a practical and safe way all these mobile devices.
