Packing content
1x KSK-8001BTS, 1x manual

Like magic - but better

The use of solar energy is not a new idea, but more important today than ever before. The KSK-8001BTS is a full-size keyboard exclusively powered by solar energy. This means that a connection to a computer does not require a cable but only a Bluetooth® connection.

Solar energy - not only on beautiful days

Admittedly, the sun does not always shine in our latitudes and also not for long - for the operation of the KSK-8001BTS this is not necessary at all. It also works with light, which is given off on cloudy days. This self-maintained system, which manages without any additional power supply, provides not only a stylish but also flexible use on the desk.

Scores not only through design

With its slim, elegant design, the KSK-8001BTS not only provides a stylish workplace with your PC or notebook - it also provides a pleasant feel. Here you type like on a notebook - only better!

For varied environments

The KSK-8001BTS is a stylish all-rounder, which finds its way in every environment - whether the Windows®, macOS® or Android™ layout is required.
The layout can be changed easily with a key combination, so that the building of keyboard mountains on the desk finally comes to an end.
