

## Kaspersky® Endpoint Security Cloud

# The easiest way to protect your business, without sacrificing your IT resources, time, or budget

Kaspersky Endpoint Security Cloud, offering small and medium sized businesses effortless yet comprehensive protection against known and unknown threats – including cryptors, ransomware and other attacks. We do this without making demands on your time or budget because we know just how over-stretched smaller business resources can be!

### Protect any device

- Windows and Mac workstations
- Windows file servers
- iOS and Android smartphones and tablets

### Break free from the on-premise burden

- Hosted solution
- Managed from a web browser
- Always available at [cloud.kaspersky.com](https://cloud.kaspersky.com)

### Upgrade on demand

- Two pricing tiers to choose from
- Scale as you grow

### Enjoy the benefits of the cloud

- Faster time to protection
- No capital investment
- No 'patching Fridays'
- Redeployed resources
- Pay as you grow
- Outsourcing friendly

## Get protected – and keep your business running smoothly

### Endpoint protection from the most tested, most awarded\* security vendor.

Smaller businesses like yours can't usually afford or justify investment in an enterprise-level security posture – and this makes you a particularly attractive target for cybercriminals. While your organization is busy providing the best service to your customers, Kaspersky Lab supports you with the best endpoint protection on the market, ensuring your business can continue to flourish in complete cyber-safety.

**Protect and control all types of devices.** Today's businesses rely heavily on information technology to stay ahead of the competition. Regardless of the platforms and types of device you depend on, we'll take care of protecting all your desktops and laptops, servers and mobile devices.

## Reduce IT costs and free-up resources

**Endpoint protection made easy.** Forget about time-consuming hardware and software provisioning to run your endpoint protection. With Kaspersky Endpoint Security Cloud, all you need to do is register an account at [cloud.kaspersky.com](https://cloud.kaspersky.com) and install the endpoint software – and your business is protected.

**Instant protection.** We've done all the hard work for you, with security policies developed by our experts. The default security profile is automatically applied to each newly connected device, providing immediate protection. The intuitive management console is easy to use, with no special training required.

**Free-up finance with monthly subscription.** Our Security-as-a-Service approach eliminates all the expense of hardware acquisition, updates and maintenance, as well as software licensing, installation and support. Avoid capital outlay by choosing to pay for security as you consume it, on a month-by-month basis.

## Mobile security and management

**Anti-virus protection** provides defense against threats, viruses, and other malicious applications in real time.

**Web protection** blocks access to phishing and malicious websites, and monitors access to websites.

**Password protection** secures device access with a screen unlock password supporting Face ID and Touch ID.

**Application and feature controls** restrict usage of inappropriate for corporate policy apps and features of the mobile device.

**Anti-theft** allows to remotely locate, lock sound an alarm, or wipe data from the device when it's lost or stolen.

**Rich capabilities for supervised devices** to give businesses greater control over the iOS devices they own.

### Try it now for FREE!

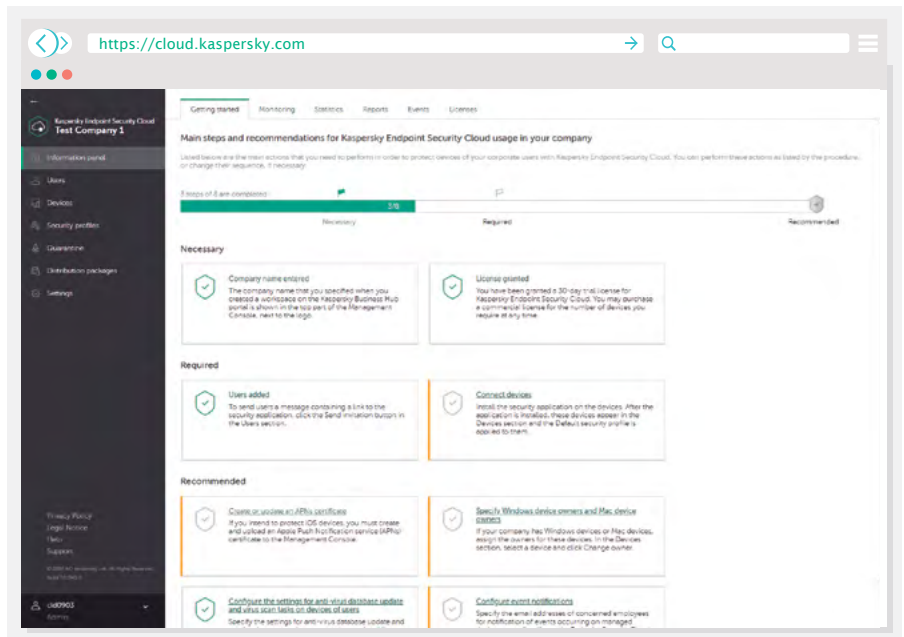

See for yourself: Get your FREE 30-day trial at [cloud.kaspersky.com](https://cloud.kaspersky.com)

Once you decide to keep Kaspersky Endpoint Security Cloud, just pay for the license and you're all set. No need to redeploy endpoint software.

# Secure remote workforce

**Secure and manage mobiles for free.** Most employees use mobile devices to help get the job done, storing your sensitive information on smartphones and tablets without even realizing the risk. This may be customers' contact and financial information, internal documents containing trade secrets, etc. Protect your mobile users from cyberattack, and promote secure mobile communications at work and beyond, with protection for two mobiles free with every user license.

**Enforce security policies remotely.** Manage security for geographically spread offices, or field workers from any location, using a cloud-based console that doesn't rely on a local network. Even when your users are out of sight, they'll be fully protected, just like the rest of your organization.

|                                   | Kaspersky Endpoint Security Cloud | Kaspersky Endpoint Security Cloud Plus |
|-----------------------------------|-----------------------------------|--|
