

DisplayPort 1.2 (M) to HDMI (M) passive unidirectional cable, 1.8m (6ft)

An essential DisplayPort to HDMI cable for office, home and classrooms.

K33025WW

Product Description

An essential cable for conference rooms, data centres and educational environments, the Kensington DisplayPort 1.2 (M) to HDMI (M) Active Cable connects a DisplayPort equipped laptop, desktop or docking station to a monitor or projector with HDMI input to deliver up to Full HD video. Mirror or extend your desktop for an expanded workstation or use to show a high-definition video presentation at school or work. Tested to perform with Kensington docks – and backed by a Kensington Limited Lifetime Warranty. Quality components include flexible outer jacket and inner & outer shielding to provide durability and improve the signal transmission.

Features

- Supports video resolution up to Full HD.
- Delivers the essential DisplayPort experience.
- Works with DP++.
- Buy with confidence – tested to work with projectors, monitors and Kensington docks.
- Good for home, office or classroom.
- Accommodates most setups.
- Works with Kensington docking station deployments.
