

KASPERSKY LAB BENELUX AWARDS 2005

Editor Recommends - Network

The Match edition of Network (Belgium) tested antivirus solutions popular on the domestic market. The Kaspersky Lab product was named Editor's Recommendation, and noted for the user-friendly interface, making the solution appropriate even for less experienced users.

Best Buy - Digitale Consument

Kaspersky Anti-Virus Personal 5.0 was designated Best Buy in March comparative tests carried out by Digitale Consument, which is published by the Dutch Consumers' Association. Solutions which integrate Kaspersky Lab technologies (Denda, F-Secure and Steganos) also performed very well. Testers stressed the security advantage provided by Kaspersky Anti-Virus Personal 5.0 scanning archive files.

Best Product - PCM

The May edition of the Dutch magazine PCM included the results of comparative testing of the most popular antivirus products on the domestic market. Kaspersky Anti-Virus Personal was placed first, with 96 out of a possible 100 points. Reviewers named the solution 'Best Product' and highlighted the availability of a Dutch version and the user-friendly interface. Overall, the reviews concluded that Kaspersky Anti-Virus provides excellent protection.

Editor's Choice – EHZ

The April edition of EHZ, an Austrian IT publication, included a review of Kaspersky Anti-Virus 5.5 for Microsoft ISA Server 2000 Enterprise Edition, under the heading 'Secure is secure'. The solution, designed for SMBs with up to 1,000 users, was the Editor's Choice. Reviewers stressed that the company reacts fastest in the world to new threats, and released antivirus database updates hourly. The product was also noted for ease of use and management.

Editor's Choice – PC Professionell

Ausgabe 4/05
Anti-Virus Business

The April edition of PC Professionell, a German IT publication, included antivirus solution test results. Kaspersky Anti-Virus Business Optimal beat fourteen competing products to first place, with the solution for SMBs being named Editor's Choice. The review stressed the excellent detection rates, the wide ranging functionality, and the reports system.

Test Winner – PC Go

Kaspersky Anti-Virus Personal 5.0 was awarded first place in comparative testing of 9 personal antivirus products by PC Go, a German IT magazine. Products were tested according to five criteria: virus detection, the functioning of the antivirus monitor, real-time scanning, speed and functionality. The Kaspersky Lab solution scored highly in all categories, with maximum points being awarded in three of them. The testers applauded the ease of configuration, the hourly updates to antivirus databases, and the product's ergonomic interface.
