A Hardware Overview

B Hardware Installation

FCC Information
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy, and if not installed and used in accordance with the instruction manual, may cause interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna;
- Increase the separation between the equipment and receiver;
- Connect the equipment into an outlet on a circuit different from that which the receiver is connected;
- Consult the dealer/an experienced radio/television technician for help.

1. VGA Connector
2. Power LED
3. USB Connector (Power only)

Hardware Installation

The 2A-130G is designed for ATEN KVM extender or video extender installations that do not utilize a local monitor at the site where the computer/ video source is located. The 2A-130G emulates and stores a default ATEN EDID (Extended Display Identification Information).

1. Plug the 2A-130G's VGA connector into the local monitor's VGA port on your local KVM extender or video extender unit.
2. Plug the 2A-130G's USB connector into any available USB port on your local Extender or computer. This provides power to the 2A-130G.
3. Connect the rest of your ATEN KVM extender or video extender installation according to the installation instructions in the User Guide.

Compatible Extenders

The 2A-130G works with the following ATEN KVM extenders and video extenders:

- CE700A, CE750, CE770, CE800b, CE350, CE370, VE150, VE200
