# Highlights

## Digital Black Stretch

Philips Slim TV uses a slimmer CRT tube to give an overall slimmer TV that is up to 40% thinner than a traditional CRT TV while delivering the better contrast and superior picture quality with built in Digital Black Stretch circuitry

## Digital Noise Reduction ( DNR)

During weak signal transmission , random noise will appear on the image. When viewed, the image contains dark and white dots. Noise reduction significantly reduces the appearance of these dots , hence creating a pleasant viewing experience

## DVD Component In

Component Video is the highest quality interconnection standard for analog video. It is sharper than S-video and composite video

## 300W PMPO Sound Output

You can enhance audio experience with the selection as per your choice for Bass , Treble and Balance

## English OSD language

You can enjoy and relax with the simple and easy GUI
