Highlights

- Fully MFi Certified
- Apple Authorization Chipset
- High quality tinned copper wires
- Cable with durable and smooth edges design
- Perfect length for outdoor experience
- Perfect length for indoor experience

Features

Fully MFi Certified

MFi is a logo licensing that Apple authorized to its accessories manufacturers of external parts, namely "Made for iOS". The testing process is extremely harsh, and the passing rate is only 2%. TP-LINK cables have passed the test to ensure 100% compatibility with any devices with Lightning connection.
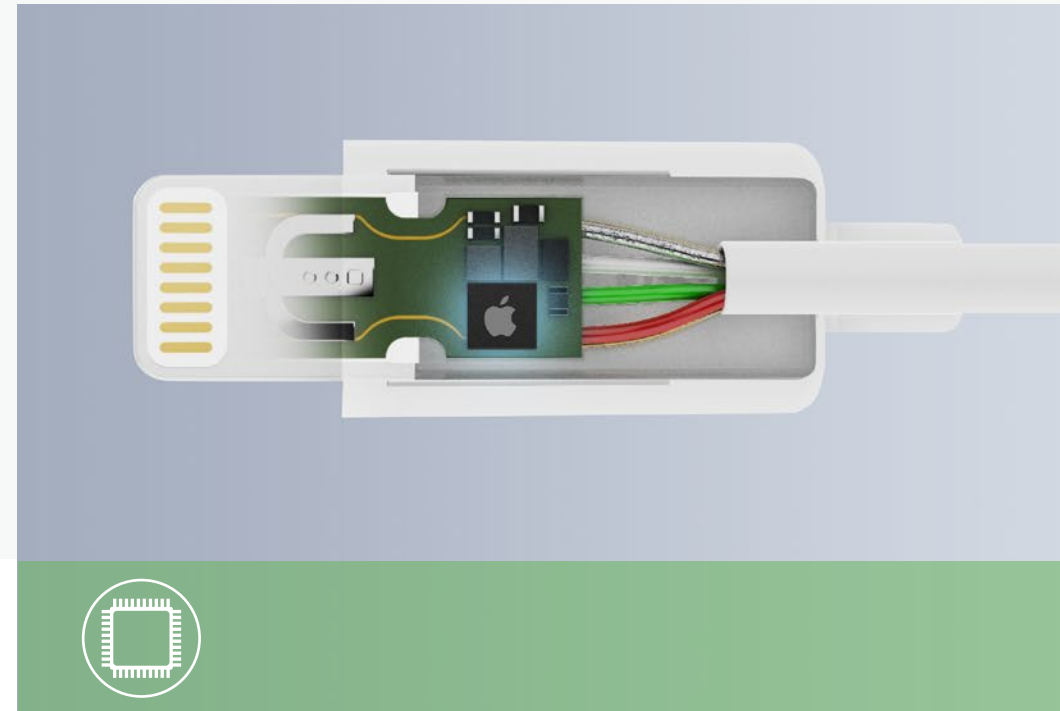

Apple Authorization Chipset

TP-LINK cables adopt the Apple Authorization Chipset to prevent damage from reverse current and voltage.
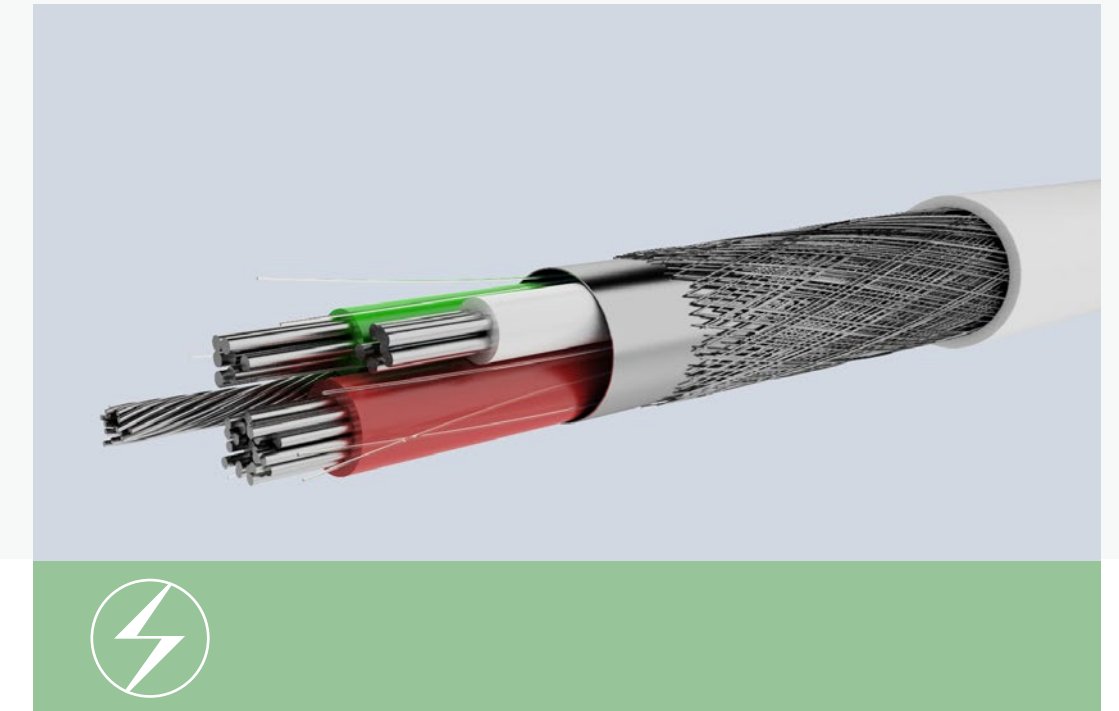

High quality tinned copper wires

Made of 68 high quality tinned copper wires, which feature little electrical resistance, minimal voltage drop, and anti-oxidation as well as anti-corrosion properties, providing stable electrical power, fast and safe data transfer to your devices than similar cables.

Features

Cable with durable and smooth edges design

Featuring user-friendly design, which the USB and Lightning connector are easily to be grabbed, and the PVC braided USB cable with connector being bend-tested and plug tested for 1600+times, designed for long-term use, more durable than original or cables without the Apple MFi certification.

Perfect length for outdoor experience

1 meter Lightning Connector is able to provide users with perfect length to use and charge outdoor, for example: Reach the power bank while still being portable to use at the same time, Plug into a car charger and charge on the road

Perfect length for indoor experience

At the same time, it can provide users with perfect length to use and charge indoor, for example: Reach the wall charger while still being used the devices in bed
