HP Web Delivery

Reliably share business-critical documents on the Web

Simplify information exchange and realize cost savings with HP Web Delivery, helping ensure improved work processes via the Web.

HP Web Delivery is an add-on software module to HP Output Server,[1] the core platform in any HP Output Management solution—the intelligent link that gets critical documents from virtually any application to nearly any destination reliably, efficiently, and cost-effectively. HP Web Delivery extends these delivery capabilities to the Web and helps ensure that the right information gets to the right people, instantly.

Fast, effective delivery

- **Expedite document delivery.** Streamline business processes and reduce the time from document creation to document delivery.
- **Get convenient and customized information delivery.** Each web delivery recipient can access customized content from their personal web page, at their convenience. In addition, users can easily share their content with others.
- **Reliably deliver documents throughout the supply chain.** Eliminate costly process breakdowns that occur with manual information distribution.

Cost savings

- **Immediate access to important business documents.** No more waiting for documents to arrive—saving time and money.
- **Improved work efficiency and collaboration.** Easy search and retrieval saves on personnel costs spent locating documents.
- **Eliminate or dramatically reduce printing.** Reduce and/or eliminate costs for additional print devices, paper, supplies, and personnel costs.

Flexible format

- **Easily capture documents and information** from a wide variety of applications, including SAP, Oracle®, Windows® desktops, and command line utilities, and deliver them to the Web.
- **Deliver documents anyone can view.** Web documents deliver information in a format that can be accessed with a standard web browser.
- **Eliminate information overload.** HP Web Delivery includes advanced capabilities, so subscribers are automatically notified and have secured access to just the content they need.
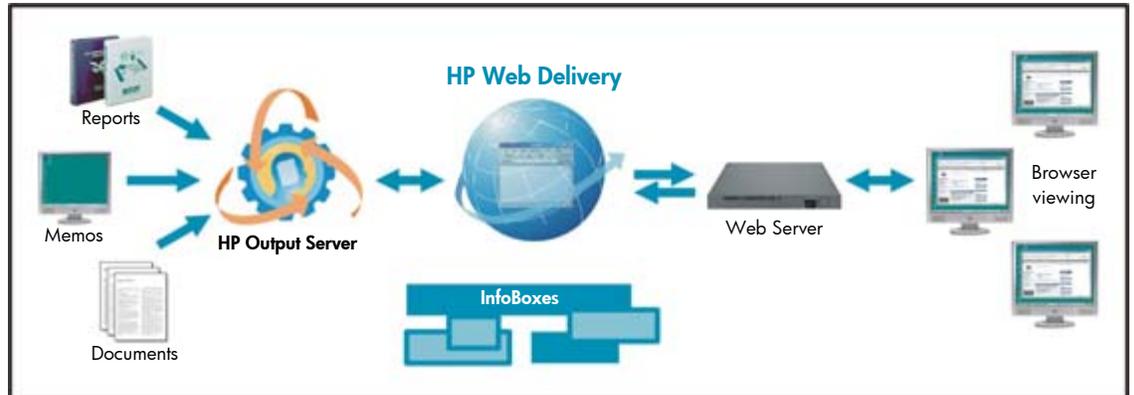

Visibility

- **Categorize information in the best ways for the enterprise.** Either the system administrator or end users can organize the content to suit their specific business processes.
- **Receive notification of document status.** When a document is viewed or when a new document is published, notifications are sent to subscribed users.
- **Track and control all output.** Ensure the delivery of reports and other business-critical documents with a centralized point of input and monitoring of all output to the Web.
- **Quickly find specific content.** Search published documents based on the title, description, category, or content.
- **Keep information secure.** HP Web Delivery lets users specify who sees what, and enables protected information distribution to internal personnel, as well as external partners and suppliers.
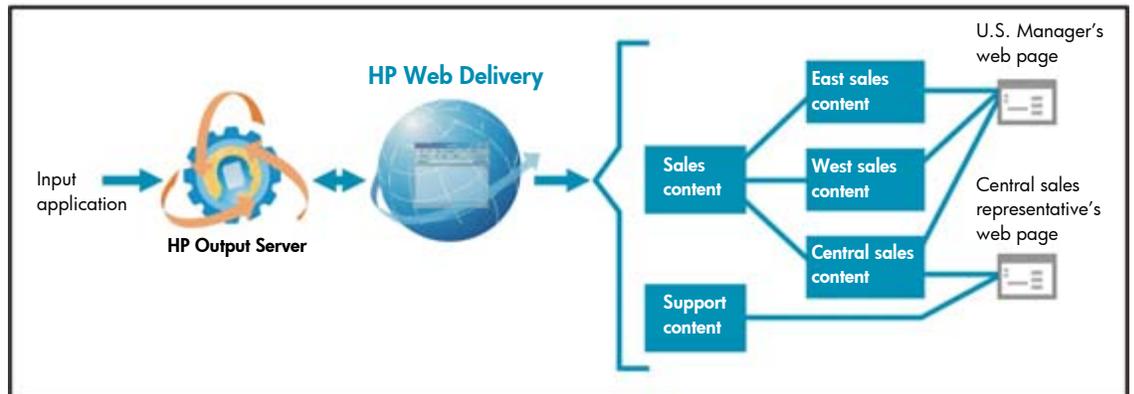

---

[1] Although HP Web Delivery is installed with HP Output Server 3.5, a valid license agreement is required to utilize it.

HP Web Delivery exploits the speed and convenience of the Web to update and provide access to customized pages, including published reports and information tailored for each user.

To initiate output delivery to the Web, a document is sent from an input application to the HP Output Server. HP Web Delivery categorizes the content received from HP Output Server according to rules established by the system administrator or end-users. Users who subscribed to this content are then notified, so that they can securely access the customized content on their personal web page.

HP Output Management solutions

End-to-end solutions

HP Output Management solutions make it easy for you to deliver business-critical documents from virtually any business application to nearly any destination reliably and efficiently while saving money. Our solutions combine enterprise information delivery software with expert implementation, integration, software support, and customer training services. We make sure you have everything you need to provide a complete end-to-end business solution for your company.

Software products

HP Output Server is the core software platform of any HP Output Management solution. It enables reliable, efficient, and cost-effective document delivery to enterprise output destinations virtually anywhere in the world via print, fax, email, FTP, web, wireless devices, file, and other formats. Add-on software modules are available for enhanced capabilities such as report distribution, web publishing, and multi-language printing, as well as integrations with SAP, Oracle Applications, HP Software, and others.

HP Output Management software products run on a large variety of operating systems and platforms including UNIX®, Linux, or Microsoft® Windows.

Implementation and integration services

You can choose from an extensive portfolio of enterprise implementation and integration services specifically designed to assist you in smoothly bringing your HP Output Management solution into your IT environment. Our services team provides planning, implementation, integration, and other customization assistance required to meet your business needs.

This team is available to provide end-to-end enterprise integration, combining HP products and services with software from leading enterprise application providers such as Oracle Corporation (Siebel, PeopleSoft, JD Edwards), EMC Corporation (Documentum), Monotype (Andale), and others.

We can also integrate output management capabilities with forms applications and archiving or content management software, as well as with leading high-availability solutions—including HP Serviceguard and IBM High Availability Cluster Management. This prevents network and equipment failures from disrupting your ability to access critical information.

Support services

When it comes to software support and maintenance services, HP offers a wide range of options so you can rely on the precise level of assistance your company needs.

Our support options include 9x5, 13x5, or 24x7 service hours. As part of your maintenance contract, you get regular defect repair, access to expert personnel to answer any questions you may have, and ongoing software updates—everything you need to maintain an optimally running HP Output Management solution. Your account team also takes requests you may have to enhance the HP Output Management software products or services and feeds them into HP's product enhancement process for continual improvement.

Besides the basic support offerings, we offer advanced implementation and operations enhancement services that include your choice of services such as a system health check, upgrade or migration assistance, performance optimization and tuning, and more.

Customer training services

Training helps you get the most from your solution. HP offers an HP Output Management training curriculum for delivery at HP facilities, on-site at your company, or as self-paced instruction available on a DVD. Training is essential to keeping your employees equipped with the right knowledge to optimally manage and tune your HP Output Management implementation.

A flexible purchase program for your training needs is available to help you plan and budget.

Financing services

To assist with the adoption of the HP Output Management solution, HP Financial Services offers a complete array of leasing and financing options to enable you to work within your budget and ease your cash flow. We make it easy and economical for you to deploy world-class technology complete with hardware, software, and services, on terms tailored to your unique needs.
