

ProCurve Manager Plus (PCM+)<sup>1</sup>

Number of managed devices <sup>2</sup>	PCM+ 1.6 upgrade to PCM+ 2.3 customers	New PCM+ customers	PCM+ 2.x 100-device customers or unlimited-device license
Networks with up to 350 managed devices	J9056A: PCM+ 2.3 upgrade-50-device license To add more devices, add J9058A: +100-device license	J9057A: PCM+ 2.3 50-device license To add more devices, add J9058A: +100-device license	Free upgrade downloaded from the Web Previous device license is maintained To add more devices, add J9058A: +100-device license
Networks with over 350 managed devices	Purchase J9059A: PCM+ 2.3 unlimited-device license	Purchase J9059A: PCM+ 2.3 unlimited-device license	Free upgrade downloaded from the Web Previous unlimited-device license is maintained

## FAQs:

**Q: How do I upgrade from PCM+ 1.6 to PCM+ 2.3?**

To upgrade from PCM+ 1.6 to PCM+ 2.3, you will need to purchase PCM+ 1.6 upgrade to PCM+ 2.3, a 50-device starter license (J9056A). To add more devices up to 350, add up to three +100-device licenses (J9058A); for more than 350 devices, purchase the unlimited-device license (J9059A).

**Q: If I have PCM+ 2.x already, do I need to purchase the upgrade to PCM+ 2.3?**

No, PCM+ 2.3 is a free upgrade, downloadable from the ProCurve Web site, for current users of PCM+ 2.0, PCM+ 2.1, or PCM+ 2.2. Your previous device license is maintained. To add more devices, purchase the +100-device license (J9058A) or the unlimited-device license (J9059A).

**Q: As a new user of PCM+, what licenses do I need to purchase?**

If you are a new user of PCM+ 2.3, you need to purchase PCM+ 2.3 50-device starter license (J9057A). To add more devices up to 350, add three +100-device licenses (J9058A). To add more than 350 devices, purchase the unlimited-device license (J9059A) or continue adding +100-device licenses (J9058A) as needed.

## ProCurve Mobility Manager (PMM)

Number of managed devices <sup>3</sup>	PCM+/PMM 1.x upgrade to PCM+/PMM 2.0 customers	New PCM+/PMM 2.0 customers
Networks with up to 750 managed devices	J9081A: PMM 1.x upgrade to PMM 2.0 unlimited-device license	J9074A: PMM 2.0 50-device license To add more devices, add J9075A: +100-device license
Networks with over 750 managed devices	J9081A: PMM 1.x upgrade to PMM 2.0 unlimited-device license	J9076A: PMM 2.0 unlimited-device license

## FAQs:

**Q: How do I upgrade from PMM 1.x to PMM 2.0?**

To upgrade from PMM 1.x to PMM 2.0, you need to purchase the upgrade license (J9081A), which comes with unlimited-device support. PMM 2.0 requires the PCM+ 2.3 license, which is a free upgrade for PCM 2.x users.

**Q: As a new user of PMM, what licenses do I need to purchase?**

If you are a new user of PMM 2.0,

*Networks with up to 750 managed devices:*

Purchase base 50-device license (J9074A). To add more devices, add additional +100-device licenses (J9075A) for a total of 750 devices.

*Networks with over 750 managed devices:*

Purchase an unlimited-device license (J9076A).

PMM 2.0 requires the purchase and installation of PCM+ 2.3 license. For current users of PCM+ 2.0, 2.1, and 2.2, PCM+ 2.3 is a free upgrade.

## ProCurve Network Immunity Manager (NIM)

Number of managed devices <sup>2</sup>	New PCM+ /NIM customers	PCM+ /NIM 1.0 100-device customers
Networks with up to 450 managed devices	J9060A: NIM 1.x 50-device license To add more devices, add J9061A: +100-device license	Free upgrade downloaded from the Web Previous device license is maintained To add more devices, add J9061A: +100-device license
Networks with over 450 managed devices	J9062A: NIM 1.x unlimited-device license	Free upgrade downloaded from the Web Previous device license is maintained

### FAQs:

**Q: If I have NIM 1.0 already, do I need to purchase the upgrade to NIM 1.x?**

No, NIM 1.x is a free upgrade, downloadable from the ProCurve Web site, for current users of NIM 1.0. Your previous device license is maintained. To add more devices, purchase the +100-device license (J9061A).

**Q: As a new user of NIM, what licenses do I need to purchase?**

If you are a new user of NIM 1.x,

*Networks with up to 450 managed devices:*

Purchase base 50-device license (J9060A). To add more devices, purchase additional +100-device licenses (J9061A) for a total of 450 devices.

*Networks with over 450 managed devices:*

Purchase the unlimited-device license (J9062A).

NIM 1.x requires the purchase and installation of PCM+ 2.3 license.

## ProCurve Identity Driven Manager (IDM)

Number of managed devices	PCM+ /IDM 1.x upgrade to PCM+ /IDM 2.x customers	New PCM+ /IDM 2.x customers	PCM+ /IDM 2.x 500-user customers
Networks with up to 500 or fewer users	J9013A: IDM 2.x upgrade–500-user license	J9012A: IDM 2.x 500-user license	Free upgrade downloaded from the Web Previous user license is maintained To add more users, add J9014A: +2,000-user license
Networks with over 500 or more users	J9013A: IDM 2.x upgrade–500-user license and then add J9014A: IDM 2.x +2,000-user license	J9012A: IDM 2.x 500-user license and then add J9014A: IDM 2.x +2,000-user license	Free upgrade download from the Web Previous device license is maintained

### FAQs:

**Q: How do I upgrade from IDM 1.x to IDM 2.x?**

To upgrade from IDM 1.x to IDM 2.x, you will need to purchase upgrade license for 500 users (J9013A). To add more users, purchase a +2,000-user license (J9014A). IDM 2.3 requires the purchase and installation of PCM+ 2.3 license.

**Q: If I have IDM 2.x already, do I need to purchase the upgrade to IDM 2.3?**

No, IDM 2.3 is a free upgrade, downloadable from the ProCurve Web site, for current users of IDM 2.x. Your previous user license is maintained. To add more users, add a +2,000-user license (J9014A).

**Q: As a new user to IDM, what licenses do I need to purchase?**

If you are a new user to IDM 2.x,

*500 or fewer users:*

Purchase the starter 500-user license (J9012A).

*500 or more users:*

Purchase the starter 500-user license (J9012A) and then add a +2,000-user license (J9062A). You must purchase the 500-user license before adding a +2000-user license.

IDM 2.x requires the purchase and installation of PCM+ 2.x license.

<sup>1</sup> Refer to product data sheet for hardware specifications.

<sup>2</sup> Any network device with a bridged MIB or ProCurve access point or WESM.

<sup>3</sup> Any network device specific ProCurve devices such as access point, WESM, and radio ports.
