# MagForce DUO 2-in-1 Adapter

-  Ultra HD
-  Fast Data Speed
-  Magnetic Cable Management
-  Plug & Play Driverless
-  Compact & Portable

### Part no

ULCHDA-SGR

### Colour

• Space Grey

## MagForce DUO 2-in-1 Adapter

The MagForce DUO Charge is designed to connect a USB-C enabled computer (Windows/Mac/Chromebook) to HDMI inputs on monitors and other display devices such as TVs and projectors.

In addition to connecting your computer to a display device, the adapter can charge laptops which support USB Power Delivery with up to 100W of power when a USB power adapter is connected (not included - supplied with your laptop or available separately).

The cable supports display resolutions up to 4K Ultra HD (3840 x 2160) at 60Hz and has been designed with premium materials to produce a product which is both elegant and robust.

## Laptop Port Shortages Solved

The MagForce DUO is a 2-in-1 adapter for your USB-C devices. It features the extra ports many modern laptop users need for more screens and USB peripherals, in the office or on the road.

The premium metal alloy adapter's HDMI port supports a maximum resolution of 4K [60Hz]\*, and its USB-A port [USB 3.2 Gen 1] enables data transfer speeds up to 5Gbps.

\*Maximum refresh rate is dependent on the capabilities of the host computer. Your laptop/device must support DP 1.4 for 4K@60Hz resolution.

### Made Compact with Patented MagForce Technology

ALOGIC's new MagForce technology magnetically contains your in-built adapter cable when your adapter is idle, significantly reducing the space the adapter occupies.

The ultra-light adapter's slimline features make it a perfect companion on your desk, in your pocket, or in your bag.

### A Stylish and Durable Adapter

The MagForce adapter is purpose-built to absorb the daily push and pull of an adapter's life. It is constructed out of an exceptionally resilient mix of metal alloy casing, soft-touch TPE [thermoplastic elastomer] and silicon reinforcement, so you can stay connected without disruption.

### User Interface

<b>Input</b>	USB-C (Male) - To Computer
<b>Output</b>	HDMI (Female) USB-A (Female), USB 3.2 Gen 1, 5Gbps

### Physical Characteristics

<b>Product Dimensions</b>	31x11x105 mm (LxWxH - Folded) 31x11x205 mm (LxWxH - Unfolded)
<b>Cable Length</b>	135mm (approx.)
<b>Weight</b>	30g

### Package Includes

- 1x MagForce DUO 2-in-1 Adapter
- 1x User Manual

### Resolution

- 4096x2160 60Hz | Computers with DP 1.4 support
- 4096x2160 30Hz | Computers with DP 1.2 support

The device supports HDMI 2.0 features including:

- HDCP 1.4 and 2.2 Support
- HDR Support
- HDMI Deep Color Support: 8/10/12bit 4:4:4 format
- RGB 4:4:4/ YCbCr 4:2:2/ YCbCr 4:2:0 Color Space Support

### Device Compatibility

Windows, MacOS, Chromebook  
Computer USB-C port must support DisplayPort Alt Mode video output for HDMI port to function.

### Warranty

2 Year
