

SafeDome™ Cable Lock for iMac® 24" - Master Keyed

Keep your iMac secured.

K68990M

Product Description

Users of the new 24" iMac require a non-intrusive solution to secure their investment that matches the Apple aesthetic. The SafeDome™ Cable Lock for iMac® 24" provides class-leading security without impacting functionality and requires no hardware modifications. Verified and tested for industry-leading standards in torque/pull, foreign implements, lock lifecycle, corrosion and other environmental conditions, this lock comes with a five-year limited warranty. So you can rest assured knowing you're covered by Kensington, inventor and a worldwide leader in laptop security locks.

Features

- SafeDome™ technology delivers a sleek, sturdy metal housing that has been tested against the most rigorous and thorough standards in the industry and can be quickly and easily attached to the iMac stand. No tools required.
- The heavy-duty ClickSafe® lock fits directly into the SafeDome, providing superior anti-theft security for your iMac in one click.
- The thicker ultra cable is 60% stronger than a standard cable. Made of woven carbon steel and covered by an anti-shearing sleeve for our highest level of protection against cutting attempts.
- Full adjustability allows the iMac base to move around the desktop as far as the lock cable will allow and the ability to tilt the screen for optimal viewing remains fully functional.
- A special cable management pass-through allows you to route cables for wired USB accessories such as a keyboard or mouse.
- Verified and tested, each Kensington lock is precision engineered to meet or exceed rigorous industry standards for strength, physical endurance and mechanical resilience.
- Register & Retrieve™, Kensington's online key registration program, allows for quick, secure and free key replacement if ever lost or stolen.
- With a five-year limited warranty, you can rest assured knowing you're covered by Kensington, inventor and a worldwide leader in laptop security locks.
- Master Keyed allows both the user and administrators to unlock or reset locks at any time.
