istand®3 display housing wall mounting, ceiling mounting landscape/portrait	158–159

# Titan II crank/motor

## Rolling projection screen for home cinema

delivery free  
of charge!\*

### Our standard

housing: powder-coated in RAL 9003 Signal white  
screen surface: Polar PU

- sheet steel housing W 10.5 x H 10.5 cm
- variable fixing points due to specially developed fixing consoles for wall or ceiling mounting, allow displacement in the range of 50 cm from the outer edge of the housing
- crank drive: maintenance-free drive with integrated unwinding limit stop, detachable crank
- motor drive: high-quality silenced 230V/50Hz electrical plug-in drive, motor drive on the right seen from the direction of projection
- screen surface Polar PU – Flame retardant, meets the requirements of DIN 4102 – B1
- design according to DIN 56950-4: 2015 Safety requirements and inspections for serially manufactured projection screens

# Dolomit II crank

Professional rolling projection screen for wall-/ceiling mounting or installation in suspended ceiling systems

delivery free  
of charge!\*

## Our standard

housing: powder-coated in RAL 9016 Traffic white  
screen surface: Polar PU

- aluminium housing W 11 x H 11 cm
- mounting grooves on all sides of the housing enable flexible mounting options on the wall or ceiling, easy installation with Quick mounting kit: position – hinging – securing
- optional: - professional installation system for suspended ceilings with pre-assembly frame  
- suspended ceiling mounting kit to bridge the gap between raw ceiling and suspended ceiling
- crank drive: maintenance-free drive with integrated unwinding limit stop, detachable crank
- formats up to W 300 x H 300 cm
- screen surface Polar PU – Flame retardant, meets the requirements of DIN 4102 – B1
- design according to DIN 56950-4: 2015 Safety requirements and inspections for serially manufactured projection screens

# Scala II crank

The premium projection screen for versatile and professional use

delivery free  
of charge!\*

## Our standard

housing: powder-coated in RAL 9016 Traffic white  
screen surface: Polar PU

- aluminium housing W 12.5 x H 12.5 cm
- mounting grooves on all sides of the housing enable flexible mounting options on the wall or ceiling, easy installation with Quick mounting kit: position – hinging – securing
- **revision option without need of dismantling of the entire screen**
- optional: - professional installation system for suspended ceilings with pre-assembly frame  
- suspended ceiling mounting kit to bridge the gap between raw ceiling and suspended ceiling
- crank drive: maintenance-free drive with integrated unwinding limit stop, detachable crank
- formats up to W 375 x H 234 cm
- screen surface Polar PU (up to W 300 cm) – Flame retardant, meets the requirements of DIN 4102 – B1
- screen surface Polar TA (from W 300 cm) – Meets the fire protection requirements of DIN 4102 – B2
- design according to DIN 56950-4: 2015 Safety requirements and inspections for serially manufactured projection screens

# Kontrast motor

The exclusive projection screen of luxury design for sophisticated demands

delivery free  
of charge!\*

## Our standard

housing: powder-coated in RAL 9016 Traffic white  
screen surface: Polar PU

- aluminium housing W 12.5 x H 12.5 cm, housing technology in noise-insulated construction
- mounting grooves on all sides of the housing enable flexible mounting options on the wall or ceiling, easy installation with Quick mounting kit: position – hinging – securing
- **revision option without need of dismantling of the entire screen**
- **Housing with patented, automatic cover closing, thus perfect optical integration into the room. The cover closing offers additional protection against external influences**
- motor drive: high-quality silenced 230V/50Hz electrical plug-in drive, with thermal protection switch, motor drive on the right seen from the direction of projection
- formats up to W 300 x H 250 cm
- screen surface Polar PU – Flame retardant, meets the requirements of DIN 4102 – B1
- design according to DIN 56950-4: 2015 Safety requirements and inspections for serially manufactured projection screens

The multi-functional projection screen for congresses and events

delivery free  
of charge!\*

## Our standard

housing (up to format W 600 x H 400 cm): powder-coated in RAL 9016 Traffic white

housing (from W 600 cm): galvanized

screen surface: Polar TA

- steel housing from W 15 x H 15 cm (up to size W 600 x H 400 cm)
- housing galvanised from W 30 x H 30 cm (from size W 600 cm)
- mounting on ceiling by angles located at the outside of the housing
- **revision options without need of dismounting the housing up to size W 600 x H 400 cm**
- optional: professional installation system for suspended ceilings up to size W 600 x H 400 cm
- motor drive: high-quality silenced 230V/50Hz electrical plug-in drive, with thermal protection switch, motor drive on the right seen from the direction of projection
- formats up to 1.200 cm
- screen surface Polar TA – Meets the fire protection requirements of DIN 4102 – B2
- design according to DIN 56950-4: 2015 Safety requirements and inspections for serially manufactured projection screens

**Important note regarding DIN 56950-4 – All screens above 5 meters are equipped as standard with a safety gear and safety limit switches. The built-in switch meets the requirements demanded in stage technology. Therefore all the necessary criteria for the tendering and testing of technical equipment in production facilities are already fulfilled in our standard version.**

# Congress round housing

The multi-functional projection screen for congresses and events

delivery free  
of charge!\*

## Our standard

housing: powder-coated in RAL 9016 Traffic white or of your choice in RAL Classic at no extra charge  
screen surface: Polar TA

- aluminium housing diameter: 20 cm
- wall or ceiling mounting, mounting takes place by means using mounting brackets
- motor drive: high-quality silenced 230V/50Hz electrical plug-in drive, with thermal protection switch, motor drive on the right seen from the direction of projection
- formats up to W 500 x H 400 cm
- screen surface Polar TA – Meets the fire protection requirements of DIN 4102 – B2
- design according to DIN 56950-4: 2015 Safety requirements and inspections for serially manufactured projection screens

### Our standard

housing: powder-coated in RAL 9016 Traffic white  
travelling mechanism: powder-coated in RAL 9016 Traffic white  
screen surface: Polar GS

- aluminium housing W 19 x H 19 cm, robust travelling mechanism
- **ready for immediate use without need of further mounting work**
- cover flap closes positively with housing in the retracted state, manually operable cover plate, robust scissor mechanism for excellent flatness
- motor drive: high-quality silenced 230V/50Hz electrical plug-in drive, with thermal protection switch, motor drive on the right seen from the direction of projection
- crank drive: maintenance-free drive with integrated unwinding limit stop, detachable crank
- formats up to W 350 x H 300 cm, lower edge of the image at 80 cm
- screen surface Polar GS – Flame retardant, meets the requirements of DIN 4102 – B1
- design according to DIN 56950-4: 2015 Safety requirements and inspections for serially manufactured projection screens

### Our standard

housing:	powder-coated in metallic anthracite
travelling mechanism:	powder-coated in metallic anthracite
screen surface:	Polar PU

- aluminium housing W 12.5 x H 12.5 cm, travelling mechanism is optionally available
- Total width = projection screen + 22 cm (including handle and rollers)
- with a few simple steps, the screen is ready for use, the cover plate will be opened, closed and secured with clamping locks, equipped with a handle and castor rollers for the practical transport
- robust scissor mechanism for excellent flatness, screen is manually extracted at the rear scissor mechanism and thus provides quick assembly and disassembly
- formats up to W 240 x H 200 cm, lower edge of the image at 17 cm
- including travelling mechanism, the lower edge of the image is at 90 cm
- screen surface Polar PU – Flame retardant, meets the requirements of DIN 4102 – B1
- design according to DIN 56950-4: 2015 Safety requirements and inspections for serially manufactured projection screens

# Brillant-L

The projection screen for training, seminars and conferences

Color example: frame anodised in aluminium

delivery free  
of charge!\*

## Our standard

frame: aluminium in RAL 9016 Traffic white powder-coated  
screen surface: Polar GS

- circumferential aluminium frame W 10 x H 4 cm (frame on request in anodised aluminium – free of charge)
- rigid wall mounting by means of four fixing angles which can be moved in mounting grooves
- installation depth approx. 6 cm – up to a screen size W 450 x H 300 cm
- installation depth approx. 9.5 cm – from a screen size W 450 x H 300 cm (with additional central brace)
- external frame dimensions up to W 600 x H 400 cm
- screen surface Polar GS – Flame retardant, meets the requirements of DIN 4102 – B1
- surface is tensioned and screwed on by means of lugs on the backside of the frame, so that the frame is kept as precise image framing from the front, ensuring an absolute flatness
- delivery takes place in a disassembled state, assembly is recommended by the HKS team
- design according to DIN 56950-4: 2015 Safety requirements and inspections for serially manufactured projection screens

# Diplomat Tab Tension

Roller screen with tensioning mechanism on the sides

## Our standard

housing: white, aluminium  
screen surface: FlexWhite

4:3

4:3

16:10

16:9

- aluminium housing W 8.9 x H 10.5 cm
- extremely flexible and easy to assemble in the slot channel due to the mounting device; wall-or ceiling mounting, quick installation with Plug & Play solution
- Wall and ceiling brackets are included
- **Smart Motor**: voltage: 220V, frequency: 50Hz, Power: 121W, motor drive on the left seen from the direction of projection, incl. radio remote control
- optional: see page 76/77 – wall spacers (15, 30, 50 or 75 cm), radio remote control and much more
- the **tensioning mechanism** on the sides ensures the greatest possible flatness of the screen wall surface, weighting bar adds additional vertical tension
- screen surface **FlexWhite** – Elastic matt white screen, first-class colour reproduction, ideal for ultra high resolution projection (4K)
- others surfaces available on request (for example for rear projection or ARL)

# Sesame 2.1

Award-winning housing with an innovative construction for ceiling installation in cavities

## Our standard

housing: white, aluminium  
screen surface: Xpert

1:1	4:3	16:10	16:9
-----	-----	-------	------

- aluminium housing W 16.1 x H 10 cm
- for ceiling mounting in suspended ceilings or in plaster ceilings, easy and fast access for the maintenance by external flange profiles (detachable)
- drop function: possibility of revision without disassembly of the housing
- optional: see page 76/77 specially designed holders for suspended ceilings (at the Sesame 2.1 will be for the assembly requires 1 pair of holders), ensure smooth installation up to a ceiling cavity of 100 cm, two threaded rods can also be connected, radio remote control
- **Smart Motor:** voltage: 220V, frequency: 50Hz, Power: 121W, motor drive on the right seen from the direction of projection, incl. radio remote control
- screen surface **Xpert** – hardly inflammable, meets the requirements of DIN 4102 - B1, white surface, PVC-free, excellent flatness
- screen rolls forward
- others surfaces available on request (for example for rear projection)

# Freya Tab Tension

## Screen with tensioning mechanism for the hidden ceiling installation

### Our standard

Housing: white, aluminium  
Screen surface: FlexWhite

4:3

16:10

16:9

2.35:1

- aluminium housing W 20.3 x H 17.8 cm
- for **ceiling mounting** in suspended ceilings or in plaster ceilings (simple and quick access for maintenance because of external flange profiles available from summer 2018)
- Possibility to install the housing first and later the screen surface, possibility of **revision** without dismounting the housing
- optional: see page 76/77 specially designed holders for suspended ceilings (Freya Tab Tension requires 2 pairs of holders for the assembly), ensure smooth installation up to a ceiling cavity of 100 cm, two threaded rods can also be connected, radio remote control
- **Smart Motor**: voltage: 230V, frequency: 50 / 60Hz, Power: 200W, motor drive on the left seen from the direction of projection, incl. radio remote control
- the tensioning function provides Freya Tab Tension with a flat viewing surface, and the surface flatness can be adjusted after time if needed, a new heavy weight bottom dowel in white finish provides extra vertical tensioning.
- screen surface **FlexWhite** – Elastic matt white front surface, first-class colour reproduction, ideal for ultra high resolution projection (4K)
- others surfaces available on request (for example for rear projection or ARL)

16:10

16:9

2.35:1

- aluminium housing W 16 x H 16 cm
- wall brackets and flexible mounting brackets for ceiling mounting
- housing offers a convenient wall-mountable channel attachment that saves valuable assembly time
- **Smart Motor:** voltage: 230V, frequency: 50 / 60Hz, Power: 200W, motor drive on the left seen from the direction of projection, incl. radio remote control
- optional: see page 76/77 radio remote control and much more
- the tensioning mechanism on the sides ensures the greatest possible flatness of the surface, **black** weighting bar gives additional vertical tension
- screen surface **FlexWhite** – Elastic matt white screen, first-class colour reproduction, ideal for ultra high resolution projection (4K)
- others surfaces available on request (for example for rear projection or ARL)

# Frame Vision Light

## Hochwertige Rahmenleinwand mit Spannmechanismus

### Our standard

Frame: black aluminium  
Screen surface: FlexWhite

- W 5.1 x D 3.3 cm – Wide, black aluminium frame
- easy installation of the frame profiles, smooth wall mounting because of easy-to-mount wall brackets
- screen surface **FlexWhite** – Elastic matt white front surface, first-class color reproduction, ideal for ultra high resolution projection (4K)
- screen surface attached on the frame attached without need of any tools
- in order to achieve an optimal flatness, the surface can be adjusted in a tensioning groove
- others surfaces available on request (for example for rear projection or ARL)

# UFS – Ultimate Folding Screen

Portable projection screen for mobile use, e.g. for rental applications

## Our standard

Frame: aluminium tube frame  
Screen surface: Matt White XT1000V or CineFlex CH1200V

- first screen completely manufactured using the CNC (Computer Numerical Controlled) manufacturing process
- **lock & Load-Lock** allows very easy assembly – construction ensures a rigid frame and high stability and protection of locking components
- the surface is stretched from the front on the frame, on the back of the frame, the feet are attached
- protection of locking components
- standard legs are available in three different heights (H 292 cm, H 329 cm or H 366 cm), frame can be attached to the feet in 15.2 cm increments
- optionally recommended for extra **stability**: Heavy duty legs – from a frame height of over 229 cm, Extra heavy duty legs – from a frame height of over 320 cm
- surface **Matt White XT1000V** – for front projection, reflects a uniformly bright image, more accurate colour balance  
**CineFlex CH1200V** – for rear projection, neutral grey reflective diffusion surface, offers high resolution and contrast
- the delivery includes a durable polyethylene carrying case with wheels and carrying handles

content

Technical changes, misprints and deviating forms, colours and designs reserved.  
For misprints we accept no liability.

# MOW-S

Motorised height adjustment elements for a display up to max. 60 or 120 kg

delivery free  
of charge!\*

## Our standard

column: RAL 9016 Traffic White

front panel: decor Bardolino Oak nature – further decors **without extra costs** on p. 160 – 161

- for an excellent integration of the motorised wall mount into an already existing furnishing, the powder coating according to RAL Classic of the column and the decor of the rectilinear front panel can be individually adapted to each room
- display up to 84"
- VESA-standard 100x100 – 800x400
- load capacity: up to 60 kg – **MOW-S 060 B**  
up to 120 kg – **MOW-S 120 B**
- vertical travel of approx. 50 cm
- dimensions of the column: H 204 x W 49 x D 11 cm
- integrated cable management takes place inside the column, power and data lines to the display will be outside the column in an accompanying cable routing
- suitable for wall or wall-floor mounting
- for levelling uneven floors 2 adjustable feet included in the base

# MOW 150

Motorised wall bracket for a display up to max. 130 kg

delivery free  
of charge!\*

## Our standard

column: anodised

- the MOW 150 is an ideal bracket for safely installing very large and heavy displays
- VESA-standard 100x100 – 800x400
- load capacity up to max. 130 kg, an ideal bracket for safely install a Microsoft Surface Hub (for example)
- vertical travel approx. 50 cm
- dimensions H 151 x W 89 x D 23 cm
- native cable management takes place behind the column, integrated rear storage for example mini PC
- wall mounting with two metal angles, which can be adjusted in height, installation depth approx. 7 cm
- 4 levelling screws for levelling uneven floors
- delivery takes place in a disassembled state

# VST-D with S-foot

## Height-adjustable display stand with detachable rear panel

delivery free  
of charge!\*

Example with VESA 100x100 – 1.250x600

### Our standard

column: RAL 9007 Grey aluminium

S-foot: RAL 9005 Jet black, fine structure

- display stand with steel sheet column
- display up to 84"
- VESA-standard 100x100 – 800x400, further VESA sizes on request
- load capacity up to max. 60 kg or max. 120 kg
- vertical travel of approx. 50 cm – available in raster, manual or motorised version
- dimensions: H 177 x W 119 x D 70 cm (with adjustable feet)  
H 188 x W 119 x D 70 cm (with rollers)
- the very smooth running is ensured by a ball-bearing carriage, which is guided between 2 aluminium profiles
- behind the detachable rear panel is the integrated cable management, as well as an integrated bracket for mini PC inside the column
- VST-D motor has an up and down switch to move the display in height
- equipped with 4 castor rollers (approx. 10 cm Ø), 2 of them lockable
- also available with adjustable feet (instead of rollers), for levelling on uneven floors

content

Technical changes, misprints and deviating forms, colours and designs reserved.  
For misprints we accept no liability.

# Holder for preview monitors

## The perfect preview monitor-holder for speakers

delivery free  
of charge!\*

- the bottom holder is mainly used as a holder for preview monitors
- speakers can use the **preview monitor** to see where the presentation is located and, for example, which pictures are visible to the listener just behind him on the screen
- in the theater for example, the holder can be used for the text passage
- at meetings, the floor stand does not disturb the speaker's field of vision
- depending on the requirements of your customer, we manufacture the bottom holder **individually** for your display – for a **minimum** ground distance
- basic construction: powder-coated sheet steel, aluminium
- stepless tilt adjustment allows the user to have an optimal viewing angle on the display
- the display is to be provided by the customer
- optionally with 4 castor rollers, of which 2 are lockable or equipped with adjustable feet
- delivery takes place in an established state

content

Technical changes, misprints and deviating forms, colours and designs reserved.  
For misprints we accept no liability.

## Slim steel sheet column with glass front or metal front (for touch display)

### Our standard

corpus: RAL 9016 Traffic White  
 metal front: RAL 9005 Jet black  
 glass front: RAL 9006 White aluminium (coated)  
 bottom plate: RAL 9005 Jet black, fine structure

- basic construction: sheet steel powder-coated
- **incl.** 42" touch display or 43" display without touch function (others on request)
- the istand®3 is optionally equipped with a glass front for a passive display (behind closed EGS glass panel) or with a metal front with cutout for an interactive touch display
- dimensions: infoterminal: H 212 x W 73,5 x D 16 cm  
 bottom plate: H 2 x W 99 x D 40 cm
- for transport and easy installation the istand®3 is divisible at about half height, the back consists of two detachable and lockable panels made of 1,5 mm sheet steel, protection of the internal technology
- well designed cable management, cable exits in the bottom plate allow the invisible connection for example in bottom tanks
- tilt protection by the bottom plate
- internal ventilation slots enable continuous operation (24/7)
- requirements for building materials of class B1 acc. to DIN 4102-1 have been demonstrably fulfilled – infoterminals are **flame retardant**

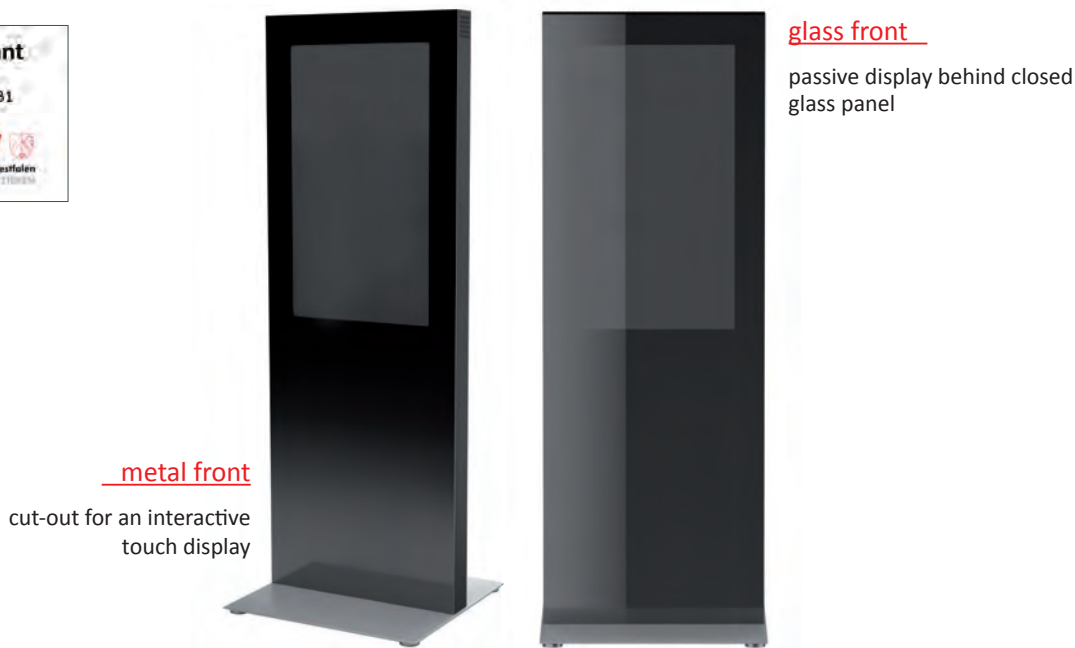

Technical changes, misprints and deviating forms, colours and designs reserved.

data sheet and drawing

## One-piece infoterminal with glass or metal front panel

### Our standard

corpus: RAL 9005 Jet black  
 metal front: RAL 9005 Jet black (metal)  
 glass front: RAL 9004 Signal Black (coated)  
 bottom plate: RAL 9005 Jet black, fine structure

- basic construction: sheet steel powder-coated
- the istand® 4 is optionally equipped with a glass front for a passive display (behind closed EGS glass panel) or with a metal front with cutout for an interactive touch display
- 43" display (to be provided by the customer)
- dimensions: infoterminal: H 203,5 x W 72,6 x D 12 cm  
 bottom plate: H 0,8 x W 74 x D 70 cm
- tilt protection by the bottom plate
- protection of the internal technology by the rear lockable door made of 1,5 mm sheet steel
- well designed cable management: integrated cable duct, 3-fold socket, four cable exits in the bottom (allow for invisible connection for example in floor tanks)
- bracket for mini PC and WLAN receiver inside
- internal ventilation slots enable continuous operation (24/7)
- requirements for building materials of class B1 acc. to DIN 4102-1 have been demonstrably fulfilled – infoterminals are **flame retardant**
