

Color Variants

VP414111  
Stainless steel  
Width 38 cm

Included accessories  
2 x spatula.

Installation Accessories  
VA420004  
Connection strip for combination with other Vario appliances of the 400 series for flush mounting  
VA420010  
Connection strip for combination with other Vario appliances of the 400 series for surface mounting  
VA440010  
Stainless steel appliance cover with mounting strip

VP414111  
Vario Teppan Yaki 400 series  
Stainless steel  
Width 38 cm

Cooking directly on the hard-chromed metal surface, without any pots or pans  
Exact temperature control up to 240 °C  
Optimum heat distribution  
Solid stainless steel control knob  
Precision crafted 3 mm stainless steel  
For surface mounting with a visible edge or for flush mounting  
Can be combined perfectly with other Vario appliances of the 400 series

Cooking zones  
Usable area W 31 x D 44 cm.

Handling  
Control knobs with illuminated ring, cooking zone and temperature markings.  
Electronic temperature control from 120 °C to 240 °C.

Features  
Two zones, each 1500 W, can be operated together as a complete surface or each halve separately.  
Keeping warm setting.  
Cleaning stage.  
Even with traces of use, always easy to clean like a cast pan.

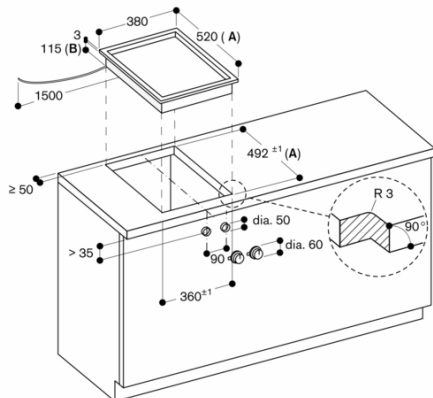

Safety  
Safety shut-off.  
Pre-heat and residual heat indicator.

Planning notes  
Depending on the type of installation (surface-mounted or flush-mounted, with or without an appliance cover), the specific location of the cut-out and the knob positions may vary.  
If combining several Vario appliances of the 400 series, a connection strip VA 420 must be placed between the appliances. Depending on the type of installation, the corresponding connection strip must be provided. The bearing capacity and stability, in the case of thinner worktops in particular, must be supported using suitable substructures. Take into account the appliance weight and additional loads.  
Additional instructions for flush mounting:  
Installation is possible in worktops made of stone, synthetics or solid wood. Heat resistance and watertight sealing of the cut edges must be observed. Concerning other materials please consult the worktop manufacturer.  
The groove must be continuous and even, so that uniform placing of the appliance on the gasket is ensured. Do not use discontinuous lining.  
The joint width may vary due to size tolerances of the combinations and of the worktop cut-out.  
If installing several appliances in individual cut-outs allow for a division bar of minimum 50 mm between the individual cut-outs.  
A minimum lateral clearance of at least 40 mm from adjacent heat-sensitive furniture or contact surfaces must be observed or thermal insulation fitted.  
Appliance can be snapped into the worktop from above.  
Appliance weight: approx. 12 kg.

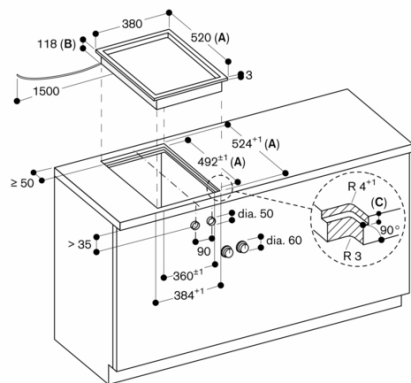

Connection  
Total connected load 3.0 KW.  
Connecting cable 1.5 m without plug.
