

LENOVO DEVICES THAT ARE A CLASS APART

ThinkBook combines the style and user experience of consumer devices with the security and business-class support of ThinkPad.

ThinkBook 16p G3 ARH

This 16" device powered with up to AMD Ryzen 9 Processor is built for new-gen business professionals who need to stay productive from anywhere. NVIDIA GeForce RTX graphics can handle everything from running heavy applications to multitasking. Support of WiFi6 ensures a connected network and enables fast retrieval of files even in network-congested environments. With a battery life of up to 9.6 hours, users can stay productive for long when they are in the field.

- ▶ AMD Ryzen™ 5 / 7 / 9 Processor
- ▶ 16" screen, WQXGA (2560x1600) Dolby Vision
- ▶ Powered by up to Windows 11 Pro

REASONS TO BUY

- 1 2.5K WQXGA resolution ensures the images are detailed and everything on the screen is of the highest quality. While AI-based noise cancellation dual-array microphones minimize the background noise- perfect for disruption-free VoIP calls on the go.
- 2 Up to 32GB LPDDR5 memory and up to 1TB SSD storage allow mobile users to archive or back-up data spreadsheets and ensure superior productivity on memory-intensive applications.
- 3 Minimal preloaded applications mean maximum battery life and responsiveness for users, and faster deployment for IT admins.
