

The Remote Control & Monitoring Management Software

RCMMS

The ATEN RCMMS is a Windows-based management software that provides convenient single-point access, monitor, and customizable control to multiple RCM devices within a network. By consolidating all types of RCM devices, such as KVM over IP extenders (e.g. RCMDVI00AT) and single-port (e.g. RCMVGA101) and multi-port KVM over IP switches (e.g. RCM416), RCMMS fulfills the administrators' need of centralized management of IT infrastructures in production lines even across isolated, secured environments.

Featuring Panel Array and WinClient viewer, RCMMS allows operators to easily monitor up to 25 device ports simultaneously in a single 5 x 5 view and provides instantaneous remote access to any specific PC / workstation as needed. Additionally, its Panel Array Grouping and single sign-on functions allow the consolidated management of all ATEN RCM devices for easy and convenient operation.

The RCMMS implements visualized flow charts which allow users to set advanced RPA (robotic process automation) scripts that can be executed according to a specified schedule with ease. It also provides flexible image settings suited for a variety of applications, as well as the popping up and enlarging viewer access onto a dedicated screen by double-click during monitoring, empowering operators to promptly deal with any urgent cases encountered.

With the help of RCMMS, operators in varying industries can immediately respond to and fix any issues and problems arose at a production line efficiently, putting them in complete control. RCMMS is an outstanding management software solution for high-tech production lines requiring durable and reliable over-IP server management.

Specifications

RCMMS	
License	
License Options	RCMMS001BAO (RCMMS basic version license for 1 port) RCMMS001AAO (RCMMS advanced version license for 1 port)
Viewer	WinClient Panel array mode (up to 5 x 5)
Compatible Appliances	
KVM over IP switches	RCM101A / RCMDVI101 / RCMVGA101 / RCMDP101U / RCM416 / RCM816 / RCM464V / RCMDVI00AT / RCMDVI40AT
Authentication & Authorization	Local user account authentication and management (administrator and normal user) Data secured by AES-256 encryption
Notification	System messages
Task scheduling	Export / Import database and configuration backup / restore (.db) Export / Import user accounts (.xlsx) Export / Import device lists (.dev) Export logs (.log)
Logs	System logs Device logs
Supported OS	Windows 7 / Windows 10
Multilingual Support	English, 繁體中文, 简体中文, 日本語, 한국어, Française, Español, Português, Deutsch, Русский.
Minimum Hardware Requirements	CPU: Intel Core i3 2+ GHz or above Memory: 4 GB or above Hard drive: 32 GB or above (with the program taking up 250 ~ 300 MB) Ethernet: 100 Mbps or above (Giga LAN recommended)
