ASSEMBLING AND PREPARING

AUTION

- Always use genuine LG components to ensure safety and product performance.
- The product warranty will not cover damage or injury caused by the use of unauthorised components.
- It is recommended that use the supplied components.
- The product figures and screen displays used in this manual are examples to help consumers use the product and may differ from the actual product.
- Do not apply foreign substances (oils, lubricants, etc.) to the screw parts when assembling the product. (Doing so may damage the product.)
- Applying excessive force when tightening screws may cause damage to the monitor. Damage caused in this way will not be covered by the product warranty.
- Do not carry the monitor upside down by just holding the base. This may cause the monitor to fall off the stand and could result in personal injury.
- When lifting or moving the monitor, do not touch the monitor screen. The force applied to the monitor screen
 may cause damage to it.
- For wave pattern on appearance, unlike the general method of coating, it's applied to added glittering
 material in raw material. With no peeled-off appearance, it has good durability. Please use it with confidence
 because there is no problem in using the product at all.

NOTE

- The components may look different from those illustrated here.
- Without prior notice, all product information and specifications contained in this manual are subject to change to improve the performance of the product.
- To purchase optional accessories, visit an electronics store or an online shopping site, or contact the retailer from which you purchased the product.
- The power cord provided may differ depending upon the region.

Supported Drivers and Software

You can download and install the latest version from the LGE website (www.lg.com).

- Monitor Driver / OnScreen Control / LG Calibration Studio

Product and Button Description

Using the button

The monitor can be operated by pressing a button.

Basic functions

Power On (Press) Power Off (Press and Hold) Move Menu (Press¹) Select Menu (Press and Hold²)

- 1 The desired function can be selected by moving the menu.
- 2 You can enter the menu to change the function while the monitor is on.

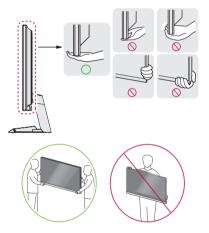

Menu Settings

Ċ	Power off the monitor.
	Changes the external input.
	Adjusts the volume.
-\	Adjusts the brightness.

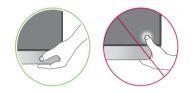

Moving and Lifting the Monitor

When moving or lifting the monitor, follow these instructions to prevent the monitor from being scratched or damaged and to ensure safe transportation, regardless of its shape or size.

- Place the monitor in the original box or packing material before attempting to move it.
- Before moving or lifting the monitor, disconnect the power cord and all other cables.
- Hold the bottom and side of the monitor frame firmly. Do not hold the panel itself.
- When holding the monitor, the screen should face away from you to prevent it from being scratched.
- When transporting the monitor, do not expose the monitor to shock or excessive vibration.
- When moving the monitor, keep it upright and never turn the monitor on its side or tilt it sideways.

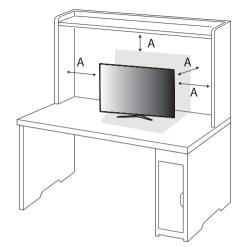

- Avoid touching the monitor screen as much as possible.
 - This may result in damage to the screen or some of the pixels used to create images.
- If you use the monitor panel without the stand base, its power button may cause the monitor to become
 unstable and fall, resulting in damage to the monitor or human injury. In addition, this may cause the power
 button to malfunction.

Installing on a Table

- Lift the monitor and place it on the table in an upright position. Place the monitor at least 100 mm away from the wall to ensure sufficient ventilation.

A: 100 mm

<u>A</u>CAUTION

- Unplug the power cord before moving or installing the monitor. There is risk of electric shock.
- Make sure to use the power cord that is provided in the product package and connect it to a grounded power outlet. (Depending on country)

Using the Kensington Lock

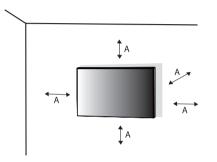

For more information on installation and usage, refer to the Kensington lock owner's manual or visit the website at http://www.kensington.com.

Connect the monitor to a table using the Kensington security system cable.

Installing on the Wall

This monitor meets the specifications for the wall mount plate or other compatible devices.

Install the monitor at least 100 mm away from the wall and leave about 100 mm of space at each side of the monitor to ensure sufficient ventilation. Detailed installation instructions can be obtained from your local retail store. Alternatively, please refer to the manual for how to install and set up a tilting wall mounting bracket.

A: 100 mm

NOTE

• The Kensington security system is optional. You can obtain optional accessories from most electronics stores.

Installing the Wall Mount Plate

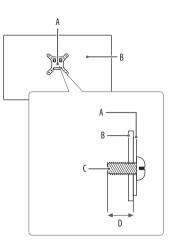

To install the monitor to a wall, attach a wall mounting bracket (optional) to the back of the monitor. Make sure that the wall mounting bracket is securely fixed to the monitor and to the wall.

Wall Mount (mm)	300 x 200
Standard screw	M6 x L18
Number of screws	4
Wall Mount Plate (Optional)	0LW480B

NOTE

- Use the screws specified by VESA standards.
- The wall mount kit includes the installation guide and all necessary parts.
- The wall mounting bracket is optional. You can obtain optional accessories from your local dealer.
- The length of the screw may differ for each wall mounting bracket. If you use screws longer than the standard length, it may damage the inside of the product.
- For more information, please refer to the user manual for the wall mounting bracket.
- Be careful not to apply too much force while mounting the wall mount plate as it may cause damage to the screen.
- Remove the stand before installing the monitor on a wall mount by performing the stand attachment in reverse.

- Unplug the power cord before moving or installing the monitor to avoid electric shock.
- Installing the monitor on the ceiling or on a slanted wall may result in the monitor falling off, which could lead to injury. Use an authorised LG wall mount and contact the local dealer or qualified personnel.
- To prevent injury, this apparatus must be securely attached to the wall in accordance with the installation instructions.
- Applying excessive force when tightening screws may cause damage to the monitor. Damage caused in this
 way will not be covered by the product warranty.
- Use the wall mounting bracket and screws that conform to VESA standards. Damage caused by the use or misuse of inappropriate components will not be covered by the product warranty.
- When measured from the back of the monitor, the length of each installed screw must be 8 mm or less.

A: Wall Mount Plate B: Back of the Monitor C: Standard screw D: Max. 8 mm

USING THE MONITOR

• Illustrations in this manual may differ from the actual product.

After pressing the power button or **MENU** button on the remote control, select the corresponding input from the [Input] menu or press the \Box + (Input) button on the remote control to select the desired input.

AUTION

- If you use generic cables not certified by LG, the screen may not display or there may be image noises.
- Do not press the screen for a prolonged time. This may cause image distortion.
- Do not display a still image on the screen for a prolonged time. This may cause image retention. Use a PC screensaver if possible.
- When connecting the power cord to the outlet, use a grounded (3-hole) power strip or a grounded power outlet. (Depending on country)
- The monitor may flicker when turned on in an area where the temperature is low. This is normal.
- Sometimes red, green, or blue spots may appear on the screen. This is normal.

Connecting to a PC

- This monitor supports the Plug and Play* feature.
- * Plug and Play: A feature that allows you to add a device to your computer without having to reconfigure anything or install any manual drivers.

HDMI Connection

Transmits digital video and audio signals from your PC to the monitor.

NOTE

- Using a DVI to HDMI / DP (DisplayPort) to HDMI cable may cause compatibility issues.
- Use a certified cable with the HDMI logo attached. If you do not use a certified HDMI cable, the screen may
 not display or a connection error may occur.
- Recommended HDMI cable types
 - High Speed HDMI[®]/[™] cable
 - High Speed HDMI[®]/[™] cable with Ethernet

DisplayPort Connection

Transmits digital video and audio signals from your PC to the monitor.

NOTE

- There may be no video or audio output depending on the DP (DisplayPort) version of the PC.
- Make sure to use the supplied DisplayPort cable of the product. Otherwise, this may cause the device to malfunction.
- If you are using a Mini DisplayPort output graphics card, use a Mini DP to DP (Mini DisplayPort to DisplayPort) cable or gender that supports DisplayPort1.4. (Sold separately)

Connecting AV Devices

HDMI Connection

HDMI transmits digital video and audio signals from your AV device to the monitor.

NOTE

- Using a DVI to HDMI / DP (DisplayPort) to HDMI cable may cause compatibility issues.
- Use a certified cable with the HDMI logo attached. If you do not use a certified HDMI cable, the screen may
 not display or a connection error may occur.
- Recommended HDMI cable types
 - High Speed HDMI[®]/[™] cable
- High Speed HDMI $^{\circledast}/^{m}$ cable with Ethernet

Connecting Peripherals

USB Device connection

ENGLISH

The USB port on the product functions as a USB hub.

NOTE

- It is recommended you install all Windows Updates to keep your Windows up-to-date before connecting to the product for use.
- Peripheral devices are sold separately.
- A keyboard, mouse, or USB device can be connected to the USB port.
- The charging speed may vary depending on the device.

AUTION

- Cautions when using a USB device.
- A USB device with an automatic recognition program installed, or that uses its own driver, may not be recognised.
- Some USB devices may not be supported or may not work properly.
- It is recommended to use a USB hub or hard disk drive with power supplied. (If the power supply is not adequate, the USB device may not be recognised properly.)

Optical Output Speaker Connection

It supports optical output speaker connection and can connect monitors and audio devices.

NOTE

- Peripheral products are sold separately.
- Depending on the audio settings of the PC and the external device, speaker function may be limited.

Headset Connection

Connect peripherals to the monitor via the headset port.

NOTE

- Peripheral devices are sold separately.
- Depending on the audio settings of the PC and external device, headset and speaker functions may be limited.
- If you use angled earphones, it may cause a problem with connecting another external device to the monitor. Therefore, it is recommended to use straight earphones.

Angled

Straight (Recommend)

• The microphone works only when the USB port on the monitor is connected to the USB port on the PC.

REMOTE CONTROL

The descriptions in this manual are based on the buttons on the remote control. Please read this manual carefully to use the monitor correctly.

To install batteries, open the battery cover, place batteries (1.5 V AAA) matching \bigoplus and \bigcirc terminals to the labels inside the compartment, and close the battery cover.

To remove the batteries, perform the installation actions in reverse.

The illustrations may differ from the actual accessories.

- [Reset to Initial Settings]: Returns to the default settings.

Important Information for Preventing Image Retention

Unlike regular LED/LCD monitors, pixels in the OLED monitors emit light on their own, achieving a perfect black and creating clear images without blurring of light.

Image retention does not occur in normal use of the product, but can occur if the same screen is watched for a long time. Built-in features are available to protect the screen from possible image retention.

If a static image persists on the screen, the screen saver will automatically lower the full screen brightness, and the screen will turn off automatically after a certain period of time. When an image change is detected, the brightness is automatically restored to its original state. This is not a malfunction of the product.

Examples of Images that may Cause Image Retention

- Static images or images containing objects/information that are constantly visible in a fixed position on the screen (e.g., icons on the desktop, fixed windows such as menus, or logos while watching broadcasts, etc.)
- Fixed menu/icon on a game console or set-top box
- · Fixed menu on the top corner of the web browser

Recommendations For Preventing Image Retention

Using [Screen Move], [Screen Saver], [Image Cleaning] and [Pixel Cleaning]

- It is recommended to set Circle Menu > [OLED Care] > [Screen Move] to on.
 When [Screen Move] is turned on, the screen moves by a few pixels in four directions.
- It is recommended to set Circle Menu > [OLED Care] > [Screen Saver] to on.
 When [Screen Saver] is turned on, the screen automatically turns off when it is idle for a certain period of time.
- Circle Menu > [OLED Care] > [Image Cleaning]

[Image Cleaning]: Corrects screen problems that may occur when the monitor is turned on for a long time. Calibration takes 10 minutes to complete.

- * This feature runs automatically in the following events while entering the sleep mode or powering off:
- The monitor has been used for more than 4 hours since the completion of the most recent [Image Cleaning].
- Circle Menu > [OLED Care] > [Pixel Cleaning]

[Pixel Cleaning]: Corrects pixel problems that may occur when the monitor is turned on for a long time. Calibration takes more than one minute to complete.

- * This feature runs automatically in the following events while entering the sleep mode or powering off:
- The monitor has been used for more than 500 hours since the completion of the most recent [Pixel Cleaning].

Safety precautions for prolonged use

Due to the unique properties of OLED panels, the brightness may be reduced with prolonged use. Reduced brightness is permanent.

In addition, repeated use in conditions such as high temperature and high humidity or still images/high luminance may result in afterimages, image blurring, or screen malfunction.

TROUBLESHOOTING

Nothing is displayed on the screen.

- Is the monitor's power cord plugged in?
 - Check if the power cord is correctly plugged into the power outlet.
- If the monitor is in sleep mode (standby mode), move the mouse, or press any key on the keyboard, to switch the display on.
- Check if the computer is turned on.
- Is the monitor powered on?
 - Check if the input setting is correct. (MENU > [Input])
- Is the [The screen is not currently set to the recommended resolution.] message being displayed?
- This occurs when signals transferred from the PC (graphics card) are out of the recommended horizontal or vertical frequency range of the monitor. Please see the PRODUCT SPECIFICATION section of this manual to set the appropriate frequency.
- Is the [No Signal] message being displayed?
 - This is displayed when the signal cable between the PC and the monitor is missing or disconnected. Check the cable and reconnect it.
- Is the [Out of Range] message being displayed?
 - This occurs when signals transferred from the PC (graphics card) are out of the horizontal or vertical frequency range of the monitor. Please see the PRODUCT SPECIFICATION section of this manual to set the appropriate frequency.

Do you see an "Unrecognized monitor, Plug and Play (VESA DDC) monitor found" message?

- Have you installed the display driver?
 - Be sure to install the display driver from our web site: http://www.lg.com.
 - Make sure to check if the graphics card supports Plug and Play function.

Screen display is unstable and shaky. / Images displayed on the monitor leave shadow trails.

- Did you select the appropriate resolution?
 - If the selected resolution is HDMI 1080i 60/50 Hz (interlaced), the screen may be flickering. Change the
 resolution to 1080p or the recommended resolution.
 - Not setting the graphics card to the recommended (optimal) resolution may result in blurred text, a dimmed screen, a truncated display area or misalignment of the display.
- The setting methods may be different depending on the computer or operating system, and some
 resolutions may not be available depending on the performance of the graphics card. If this is the case,
 contact the manufacturer of the computer or graphics card for assistance.
- Are there spots on the screen?
- When using the monitor, pixilated spots (red, green, blue, white, or black) may appear on the screen. It is not an error, nor is it related to the monitor's performance.

Some features are disabled.

- Are some functions not available when you press MENU?
 - The OSD is locked. Disable [OSD Lock] in [General].

No sound from the headset port.

- Are images displayed using DisplayPort or HDMI input without sound?
 - Make sure that the headset port connections are made properly.
 - Use the power button or the **Dial** button on the remote control to increase the volume.
- Set the audio output of the PC to the monitor you are using. (The settings may differ depending on the operating system (OS) you use.)
- Set [Sound Out] to [H/P out].
