

PAYlift angled arm 120mm pole (SP2) - 02

ACA305-02

Accessible and secure payment transactions for all

Perfect for both attended and self-service operations, this payment “slider” puts the transaction into the hands of the wheelchair user. Simply press the button to release the lock and the payment device can be pulled towards the customer at the optimum angle. Once the transaction has been completed, PAYlift can easily be returned to its original position by the customer or the operator.

Designed for attended and self-service environments, offering accessible transactions for all users

Features a 120mm angled arm for optimal visibility and usability, especially for wheelchair users

Compatible with our standard SpacePole range, including MultiGrip™ and MultiClip™

Features an adjustable tilting range of -10° to 90° and 90° rotation for optimal positioning

Customer-operated slider function allows smooth pull and return of the payment device

5-year warranty
