

ThinkPad L14 Gen 1 (AMD)

As work cultures change globally, choose this 14" portable to stay productive from anywhere. It is powered by the new AMD Ryzen PRO processors – with up to 8 cores for fluid performance when multitasking and multi-layered security that protects sensitive business data. The 12-hour battery is optimized for mobile use, and faster internet speeds can be enabled through WiFi 6 technology or using the optional 4G WWAN module.

The device features an optional IR camera with built-in privacy shutter and an onboard fingerprint reader to secure device access. AMD Memory Guard enables full memory encryption to help protect data should the PC be lost or stolen.

Choose between FHD and HD display options; both come with an anti-glare coating that makes it easier to see the screen under harsh lighting conditions.

Minimal preloaded applications mean maximum battery life and responsiveness for users, and faster deployment for IT admins.

Lenovo devices that are a class apart

The mid-range ThinkPad L Series offers enterprise docking, enhanced security features and optional remote management capabilities.
