Supports baby's individual drinking rhythm

A teat that works like a breast

The Natural Response Teat releases milk only when baby actively drinks. Babies can drink at their own rhythm like on the breast, so easy to combine breast and bottle feeding. Finding the right teat is important. See more info below.

Easy to combine breast and bottle feeding

- Natural latch on with breast-shaped teat
- Teat releases milk when baby actively drinks

Other benefits

- No-drip nipple design prevents spills and lost milk
- Simple to use, easy to clean and quick to assemble
- Easy to hold even for little hands
- Choose the right teat flow for your baby
- Compatible across the Philips Avent range
- Natural Response Teats and Bottles are BPA free*
- Be patient as your baby adjusts

Vents air away from your baby's tummy

- Designed to reduce colic and discomfort

Finding the right teat is important

- Finding the right teat is important

Highlights

Natural Response Teat

The Natural Response Teat works with your baby's natural feeding rhythm, making it easy to combine breast feeding and bottle feeding. The teat has a unique opening which only releases milk when the baby actively drinks. So when they pause to swallow and breathe, the milk pauses too.

Natural latch on

The wide, soft and flexible teat is designed to mimic the shape and feel of a breast, helping the baby to latch on and feed comfortably.

Finding the right teat is important

We all learn at our own pace. Suckling is a skill and some babies develop it quicker than others. That's why some babies might initially benefit from our "First Flow" teat (Teat 0) before progressing to the Natural Response teats. Switch

to the "First Flow" teat when your baby takes longer than 20 minutes to drink 50 ml/1.7 oz using the Natural Response teats. Try a Natural Response teat with a higher flow rate if your baby is playing with the teat instead of drinking or seems frustrated. If feeding difficulties persist, consult a healthcare professional.

Anti-colic valve

Anti-colic valve is designed to keep air away from baby's tummy during feeding, to help reduce colic and discomfort.

No-drip nipple

The nipple opening is designed to release milk only when the baby is feeding. So you can confidently avoid milk loss whether at home or on the go.

Find the right teat flow

Every baby feeds differently and develops at their own pace. We've designed a range of flow rates so you can find the perfect one for your baby and personalise your bottle. If your newborn baby is consistently not taking enough milk throughout the feeding sessions or has complications in getting milk, switch to a teat with a higher flow rate. If persistent feeding issues occur, consult a healthcare professional.

Simple to use and clean

Wide bottle neck makes filling and cleaning easy. Only a few parts for quick and simple assembly.

Easy to hold

The ergonomic bottle is easy to grip at any angle to give maximum comfort during feeding. Easy for your hands and tiny hands to hold.

Highlights

Compatible across the range

Mix and match our breast pump, bottle and cup parts and create the product that works for you, when you need it.

BPA-free*

The Philips Avent Natural Response bottles and teats are made of BPA free* material. Plus, all the Natural Response teats are made out of soft silicone.

Be patient as your baby adjusts

Our new Natural Response Baby Bottles are different from free-flow baby bottles. Just like breastfeeding, it could take a few tries to get it right. That's perfectly natural.
