

Xerox® Colour 560/570 Printer

Features	• Fiery technology increases your profits by delivering high-impact documents with vibrant images and colour that exceed your customers' expectations and also meets tight turnaround times and allows you to do more work by automating manual tasks and removing bottlenecks that slow down production. • With Fiery technology, you can produce effective marketing pieces with the widest range of output options, including automatic identification of job elements such as text, images and spot colours. This feature also eliminates the need to re-programme jobs, making the process simple and quick. It is ideal for producing powerful marketing materials, personalised communications and packaging and photo publishing applications. • Fiery ColourWise gives high-quality colour out-of-the-box and integrates the essential components of Fiery Graphic Arts Package, Premium Edition, Fiery Spot-On and the Fiery Colour Profiler Suite to control and manage colour throughout your workflow. • The Fiery Command WorkStation increases your production and reduces errors and waste by centralising job management via its intuitive user interface. Simplify your labor-intensive document composition and imposition tasks even more by using Fiery SeeSequence Impose and Compose's intuitive interface. • Fiery JDF technology connects EFI solutions and Fiery-enabled solutions, so you can move job information through your system faster and more efficiently. By supporting the Adobe PDF Print Engine, Fiery servers also offer a native end-to-end PDF workflow, therefore improving the consistency and flexibility of your printed output from design to print. • Using Fiery servers and Fiery Command Workstation, you get a new level of integration for process and profit improvement, including seamless connectivity to Xerox® FreeFlow® for workflow automation.		
Connectivity	Direct Connection (Single IP), Network Switch, (Dual IP)
