ThinkPad L13 Gen 2 (Intel)

Though thin and lightweight, this laptop is packed with up to 11th Generation Intel Core processors and up to Intel Iris Xe graphics for easy handling of day-to-day workloads. Plus, with more privacy and security features than most competitors – an integrated webcam cover, optional match-on-chip fingerprint reader, IR camera and smart card reader – it's designed for enterprises that want to secure their endpoints and boost the productivity of their users.

Mobile users need a device that won't easily run out of power; this laptop lasts up to 12 hours on a single charge with option to recharge to 80% capacity in just 60 minutes.

A newly added Thunderbolt 4 port gives users faster access to external drives plus more docking options that enable users to connect to up to two 4K displays or one 5K display.

Minimal preloaded applications mean maximum battery life and responsiveness for users, and faster deployment for IT admins.
