SCD843

Always close to your baby with comforting features

Private and secure with A-FHSS technology

The Philips Avent SCD843 enables you to maintain a secure and private connection with your baby at all times. Hear your baby with perfect sound quality and also see your baby in crystal clear vision (3.5" LCD), day or night.

Private and secure connection

- High-resolution 3.5" screen with crystal-clear night vision
- Energy-saving eco mode with connection indication
- Hear your baby with clear sound
- Private, secure connection with adaptive FHSS technology

Freedom, flexibility, comforting and soothing

- Excellent operating time for overnight monitoring
- Choose the best sound level for your surroundings
- Range up to 300 metres*
- Comforting night light and lullabies to calm your little one
- Vibration mode for subtle notifications
- Talk to your baby remotely

Reliability and reassurance

- Monitor the temperature in your baby's room
- Know you are connected with LED alerts

Highlights

3.5" colour screen with 2 x zoom

See your baby, day and night, with crystal-clear infrared night vision that automatically switches on in the dark. Enjoy your baby sleeping with the high-resolution, extra-large 3.5" colour screen. With 2 x digital zoom and pan for extra reassurance so you can see everything your baby is up to.

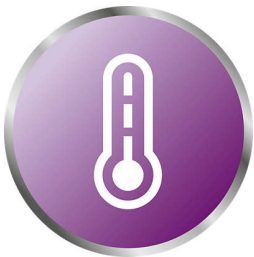

ECO mode

Switch on the ECO mode to reduce power consumption during quiet times in the baby's room, safe in the knowledge that you are still connected to your baby via the unique link indication. The ECO mode switches off the audio/video transmissions and the units only connect when the baby makes a sound.

Operating time up to 10 hours

The convenient rechargeable parent unit will give you the freedom of cordless monitoring for up to 10 hours before recharging is required.

Temperature sensor

The temperature sensor with customised alert allows you to monitor the climate in your baby's room. Your baby can't regulate its body temperature as well as you can and a slight change in temperature can make your baby restless. A customised temperature sensor will

immediately alert you, through the digital display on the parent unit, if the climate in your baby's room changes.

Sensitivity control

It allows you to set the microphone sensitivity of the baby unit. The microphone sensitivity determines what level of noise is picked up by the baby unit, e.g. you might want to hear when your baby cries, but you may be less interested in his or her babbling.

Always connected

Always know when your monitor is in range and connected. The parent unit will alert you when your monitor is out of range or when the power is low, helping you make sure that you are always connected to your baby.

Perfect clear sound video

Hear every tiny giggle, gurgle and hic-up with perfect clarity. Not only see but also hear your baby any time with high-quality, crystal-clear sound.

300m Range

Indoor range up to 50 metres*, Outdoor range up to 300 metres*.

Private, secure and adaptive FHSS

Unique handset pairing for a private, secure connection to your baby. Combined with the new Adaptive FHSS (Frequency Hopping Spread Spectrum) technology for minimal interference.

Night light and lullabies

There's nothing like a gentle lullaby and the warm tranquil glow of a night light to calm a restless baby. From any room in the house, you can select one of 5 relaxing tunes and switch on the night light, helping your baby to drift effortlessly to sleep in no time.

Vibration alert

Personalise your alert settings and be notified by a silent and subtle vibration of the parent unit.

Talk back

Sometimes all your baby needs is the soothing sound of your voice. With one click of this essential feature you can connect with your baby from anywhere around the home.
