- More comfortable experience
- Personalised experience, 8 + 16 setting levels
- With the rechargeable battery

Store breast milk securely

- For safe storage and transport
- Ultimate protection for your breast milk

Finding the right teat is important

- Finding the right teat is important

Highlights

Natural motion Technology

Express more milk in less time* with a cushion that stimulates and expresses milk just like your baby. It seamlessly adjusts from stimulation mode to expression mode, and applies just the right amount of nipple stimulation and suction for maximum milk flow. Based on milk flow initiation time (time to Milk Ejection Reflex - MER) results.*

Adaptive silicone cushion

The silicone cushion gently flexes and adapts to fit your unique nipple's size and shape. Fits 99.98% of all nipple sizes.

Finding the right teat is important

If your newborn baby is consistently not taking enough milk throughout the feeding sessions or has complications in getting milk, switch to a teat with a higher flow rate. If persistent feeding issues occur, consult a healthcare professional.

Find the right teat flow

Every baby feeds differently and develops at their own pace. We've designed a range of flow rates so you can find the perfect one for your baby and personalise your bottle. All of the Natural Response Teats are made of soft silicone.

Personalise your needs

Finely tune every session to your needs with a wide range of stimulation and expression settings. Our breast pump offers 8 stimulation and 16 expression levels for a personalised experience.

Portable Pump

Express on the go without having to worry about a power supply. Our rechargeable battery comes with a micro-USB adapter and lasts for up to 3 sessions on a single full charge.

Leak-proof stackable cups

Express, store and feed your breast milk efficiently, with our new storage cup. Sterilise and reuse the storage cup with the Philips Avent pump or teats—one system, many options!

With breast milk storage bags

Philips Avent breast milk storage bags provide safe and secure storage for your precious breast milk. They can be stored in the fridge or freezer and are pre-sterilised for immediate use.

Includes our Natural bottles

The wide, breast-shaped teat promotes natural latch-on similar to the breast, making it easy for your baby to combine breast and bottle feeding.

Specifications

Power

Mains voltage: 100V - 240 V
