Installation (Drywall)

NOTE: These instructions are for installing the cabinet into drywall. If installing the cabinet into brick or cement, please see the reverse side.

1. To ensure the stability of your cabinet, StarTech.com recommends that you secure the unit to a 1" thick piece of plywood that has been mounted to the wall studs. Locate the studs in your wall and mount a sheet of plywood, making sure that the plywood is securely connected.

2. Mount the unit to the plywood using lag screws.
