

# ThinkPad E15 Gen 2 (Intel)

With remote working on the rise, businesses need to invest in endpoint devices that prioritize performance with portability and security. This 15.6" entry-level ThinkPad offers all that, at a price that will fit most budgets. Latest Intel processors, dual SSD storage, and intelligent cooling technology help boost everyday productivity. MIL-SPEC durability means it can withstand accidental knocks or spills and the battery lasts the full workday – making this an excellent choice for mobile workers.

Prioritizes security with features like a fingerprint reader integrated with the power button and an optional IR camera for fool-proof biometric authentication. There's also a Kensington lock slot to physically secure the device and a privacy cover on the camera that protects user privacy.

Disruption-free online meetings are critical for effective remote collaboration. This device comes with AI-based noise cancellation technology and integrated wireless Bluetooth earbuds that pair automatically with the device for seamless web calls.

Minimal preloaded applications mean maximum battery life and responsiveness for users, and faster deployment for IT admins.
