# ThinkSmart Hub

This next-generation meeting room system facilitates superior collaboration and teamwork from anywhere around the globe. Built on the Microsoft Teams Room platform, it enables employees to chat in real time. It comes with strong features like the 8th generation Intel Core i5 Processor for a seamless experience; a compact design and a completely redesigned clutter-reducing cable management system give the tabletop an organized look and feel.

Enjoy immersive sound from anywhere in the meeting room with its four built-in 3W speakers and four dual-array mics. The 10.1" FHD (1920 x 1200) antiglare, smudge-resistant display features 320 nits brightness; its 360-degree rotatable touchscreen allows users to share control and collaborate effectively.

With one-touch start functionality, join meetings instantly without any delay. Plus, it has the subscription-based ThinkSmart Manager console – a centralized location from where IT teams can deploy, manage, and troubleshoot all Hub devices.

IT teams can monitor, manage, and troubleshoot any number of ThinkSmart Hub devices from one centralized location.

## Digitally manage meeting facilities with one device

Combining innovative technology with personalized services, ThinkSmart solutions will improve the way employees work together in today's work-from-anywhere world.
