# ThinkPad L15 Gen 2 (AMD)

Although mid-range, this business laptop comes with built-in biometric security and other modern features that help users stay productive from anywhere. It is powered by the new AMD Ryzen 5000 PRO series processors with up to 8 cores for fluid performance when multitasking. The expansive 15.6" anti-glare display, with an ultra-narrow border, is great for creating or viewing content. Integrated ThinkShield features plus AMD security provides layers of defenses against even sophisticated security threats.

Mobile users will appreciate the 10.6-hour battery that can optionally be charged to 80% capacity in just one hour. There are 2x USB-C ports for quick transfer of videos, design files and large data sets, and to connect essential peripherals like an external monitor.

When working remotely, a weak WiFi signal can throttle productivity. The optional 4G WWAN module in the device uses a cellular network to provide reliable data connectivity from anywhere.

Minimal preloaded applications mean maximum battery life and responsiveness for users, and faster deployment for IT admins.

Lenovo devices that are a class apart

The mid-range ThinkPad L Series offers enterprise docking, enhanced security features and optional remote management capabilities.
