Description

The LevelOne IGS-2108P Hilbert 8-Port Industrial Gigabit PoE Smart Lite switch is a next-generation Ethernet Switch offering powerful better PoE functionality and usability that delivers the cost-effectively business and transports Ethernet services via copper connections. the IGS-2108P offers 8 (10M/100M/1G) RJ45, of which 8 are PoE+ (support 802.3at/af) ports to enable high speed network at mission-critical environment. With the industrial standard DIN-rail mount, plus the clearly visible status LEDs provide simple monitoring of port link activity.. can be matched with the latest LevelOne IP Locator, the software is the easiest to use switch discovery tool, it can search all Hilbert series switches, instantly know the forgotten IP and other info. Compatible with mainstream Windows and Mac operating systems.

The LevelOne IGS-2108P provides high HW performance and environment flexibility for Enterprises. IGS-2108P is ideal to deliver management simplicity, optimum user experience, and lower total cost of ownership.
