Description

The LevelOne IGS-2128 Hilbert Industrial gigabit smart lite switch is a next-generation Ethernet Switch offering powerful better functionality and usability that delivers the cost-effectively business and transports Ethernet services via fiber or copper connections. IGS-2128 delivers 24 (10M/100M/1G) RJ45 ports and 4 Combo GbE RJ45/SFP ports. With the standard 19" Rack mount, plus the clearly visible status LEDs provide simple monitoring of port link activity.. can be matched with the latest LevelOne IP Locator, the software is the easiest to use switch discovery tool, it can search all Hilbert series switches, instantly know the forgotten IP and other info. Compatible with mainstream Windows and Mac operating systems.

The LevelOne IGS-2128 provides high HW performance and environment flexibility for Enterprises. IGS-2128 is ideal to deliver management simplicity, optimum user experience, and lower total cost of ownership.
