

Lenovo ThinkSystem SR650 V3 Server

Product Guide

The Lenovo ThinkSystem SR650 V3 is an ideal 2-socket 2U rack server for small businesses up to large enterprises that need industry-leading reliability, management, and security, as well as maximizing performance and flexibility for future growth. The SR650 V3 is based on the new 5th generation Intel Xeon Scalable processor family (formerly codenamed "Emerald Rapids").

The SR650 V3 is designed to handle a wide range of workloads, such as databases, virtualization and cloud computing, virtual desktop infrastructure (VDI), infrastructure security, systems management, enterprise applications, collaboration/email, streaming media, web, and HPC.

Figure 1. Lenovo ThinkSystem SR650 V3 with 2.5-inch front drive bays (3.5-inch drive configurations also available)

[360° View](#)

[Full 3D Tour](#)

Did you know?

The SR650 V3 server has been designed to take advantage of the features of the 5th generation Intel Xeon Scalable processors, such as the full performance of 385W 64-core processors, support for 5600 MHz memory and PCIe Gen 5.0 support. The SR650 V3 is a very configuration-rich offering, supporting more than 30 different drive bay configurations in the front, middle and rear of the server and 5 different slot configurations at the rear of the server. This level of flexibility ensures that you can configure the server to meet the needs of your workload.

Key features

Combining performance and flexibility, the SR650 V3 server is a great choice for enterprises of all sizes. The server offers a broad selection of drive and slot configurations and offers numerous high performance features. Outstanding reliability, availability, and serviceability (RAS) and high-efficiency design can improve your business environment and can help save operational costs.

Scalability and performance

The SR650 V3 offers numerous features to boost performance, improve scalability and reduce costs:

- Supports one or two fifth-generation Intel Xeon Processor Scalable processors
 - Up to 64 cores and 128 threads
 - Core speeds of up to 3.9 GHz
 - TDP ratings of up to 385 W
- Supports one or two fourth-generation Intel Xeon Processor Scalable processors
 - Up to 60 cores and 120 threads
 - Core speeds of up to 3.7 GHz
 - TDP ratings of up to 350 W
- Support for DDR5 memory DIMMs to maximize the performance of the memory subsystem:
 - Up to 32 DDR5 memory DIMMs, 16 DIMMs per processor
 - 8 memory channels per processor (2 DIMMs per channel)
 - Supports 1 DIMM per channel operating at 5600 MHz (5th Gen processors) or 4800 MHz (4th Gen processors)
 - Supports 2 DIMMs per channel operating at 4800 MHz (5th Gen processors) or 4400 MHz (4th Gen processors)
 - Using 256GB 3DS RDIMMs, the server supports up to 8TB of system memory
- Supports up to eight single-width GPUs or three double-wide GPUs, for substantial processing power in a 2U system.
- The server is Compute Express Link (CXL) v1.1 Ready. With CXL 1.1 for next-generation workloads, you can reduce compute latency in the data center and lower TCO. CXL is a protocol that runs across the standard PCIe physical layer and can support both standard PCIe devices as well as CXL devices on the same link.
- Supports up to 40x 2.5-inch drive bays, by using combinations of front-accessible (up to 24 bays), mid bays (8 bays) and rear-accessible (8 bays).
- Supports 20x 3.5-inch drive bays for lower-cost high-capacity HDD storage. 2.5-inch and 3.5-inch drive bays can be mixed if desired.
- Supports 36x NVMe drives without oversubscription of PCIe lanes (1:1 connectivity). The use of NVMe drives maximizes drive I/O performance, in terms of throughput and latency.
- Supports 14x SATA drives using the onboard SATA controller (no additional adapter needed), enabling lower cost, high capacity storage solution for cold or archival storage workloads.
- Supports high-speed RAID controllers from Broadcom providing 12 Gb SAS connectivity to the drive backplanes. A variety of PCIe 3.0 and PCIe 4.0 RAID adapters are available.
- Supports up to two externally accessible 7mm hot-swap drives for operating system boot functions. Optional RAID-0 or RAID-1.
- Supports M.2 drives for convenient operating system boot functions or data storage. Available M.2 adapters support either one M.2 drive or two M.2 drives. Optional RAID-0 or RAID-1.
- Up to 12x PCIe slots (10x rear, 2x front), plus a slot dedicated to an OCP 3.0 adapter. 2.5-inch drive configurations also support an additional internal bay for a cabled RAID adapter or HBA.
- The server has a dedicated industry-standard OCP 3.0 small form factor (SFF) slot, supporting a variety of Ethernet network adapters. A simple-swap mechanism with a thumbscrew and pull-tab enables tool-less installation and removal of the adapter. The adapter supports shared BMC network sideband connectivity to enable out-of-band systems management.

- The server offers PCI Express 5.0 I/O expansion capabilities that doubles the theoretical maximum bandwidth of PCIe 4.0 (32GT/s in each direction for PCIe Gen 5, compared to 16 GT/s with PCIe Gen 4 and 8 GT/s with PCIe Gen 3). A PCIe 5.0 x16 slot provides 128 GB/s bandwidth, enough to support a dual-port 200GbE network connection.

Availability and serviceability

The SR650 V3 provides many features to simplify serviceability and increase system uptime:

- Designed to run 24 hours a day, 7 days a week
- The server offers Single Device Data Correction (SDDC, also known as Chipkill), Adaptive Double-Device Data Correction (ADDDC, also known as Redundant Bit Steering or RBS), and memory mirroring for redundancy in the event of a non-correctable memory failure. Note: ADDDC is not supported with 9x4 RDIMMs.
- The server offers hot-swap drives, supporting RAID redundancy for data protection and greater system uptime.
- Available M.2 adapters support RAID-1 (using Intel VROC) which can enable two SATA or two NVMe M.2 drives to be configured as a redundant pair.
- The server has up to two hot-swap redundant power supplies and up to six hot-swap redundant fans to provide availability for business-critical applications.
- Optional front-accessible slots and drives so that most major components and cables (except power) are located at the front of the server
- The light path diagnostics feature uses LEDs to lead the technician to failed (or failing) components, which simplifies servicing, speeds up problem resolution, and helps improve system availability.
- Solid-state drives (SSDs) offer more reliability and performance than traditional mechanical HDDs for greater uptime.
- Proactive Platform Alerts (including PFA and SMART alerts): Processors, voltage regulators, memory, internal storage (SAS/SATA HDDs and SSDs, NVMe SSDs, M.2 storage), fans, power supplies, RAID controllers, server ambient and subcomponent temperatures. Alerts can be surfaced through the XClarity Controller to managers such as Lenovo XClarity Administrator, VMware vCenter, and Microsoft System Center. These proactive alerts let you take appropriate actions in advance of possible failure, thereby increasing server uptime and application availability.
- The built-in XClarity Controller continuously monitors system parameters, triggers alerts, and performs recovery actions in case of failures to minimize downtime.
- Built-in diagnostics in UEFI, using Lenovo XClarity Provisioning Manager, speed up troubleshooting tasks to reduce service time.
- Lenovo XClarity Provisioning Manager supports diagnostics and can save service data to a USB key drive or remote CIFS share folder for troubleshooting and reduce service time.
- Auto restart in the event of a momentary loss of AC power (based on power policy setting in the XClarity Controller service processor)
- Offers a diagnostics port on the front of the server to allow you to attach an external diagnostics handset for enhanced systems management capabilities.
- Support for the XClarity Administrator Mobile app running on a supported smartphone or tablet and connected to the server through the service-enabled USB port, enables additional local systems management functions.
- Three-year or one-year customer-replaceable unit and onsite limited warranty (varies by geography), 9 x 5 next business day. Optional service upgrades are available.

Manageability and security

Systems management features simplify local and remote management of the SR650 V3:

- The server includes XClarity Controller 2 (XCC2) to monitor server availability. Optional upgrade to XCC Platinum to provide remote control (keyboard video mouse) functions, support for the mounting of remote

media files (ISO and IMG image files), boot capture, power capping and new XCC2 Platinum features. New XCC2 Platinum features include System Guard, new security modes including a CNSA-compliant mode, a FIPS 140-3-compliant mode and enhanced NIST 800-193 support, and a new Neighbor Group feature.

- Dedicated Ethernet port at the rear of the server for remote management (BMC management).
- Lenovo XClarity Administrator offers comprehensive hardware management tools that help to increase uptime, reduce costs and improve productivity through advanced server management capabilities.
- UEFI-based Lenovo XClarity Provisioning Manager, accessible from F1 during boot, provides system inventory information, graphical UEFI Setup, platform update function, RAID Setup wizard, operating system installation function, and diagnostic functions.
- Support for Lenovo XClarity Energy Manager, which captures real-time power and temperature data from the server and provides automated controls to lower energy costs.
- An integrated industry-standard Unified Extensible Firmware Interface (UEFI) enables improved setup, configuration, and updates, and simplifies error handling.
- Support for industry standard management protocols, IPMI 2.0, SNMP 3.0, Redfish REST API, serial console via IPMI
- An integrated hardware Trusted Platform Module (TPM) supporting TPM 2.0 enables advanced cryptographic functionality, such as digital signatures and remote attestation.
- Administrator and power-on passwords help protect from unauthorized access to the server.
- Supports Secure Boot to ensure only a digitally signed operating system can be used. Supported with HDDs and SSDs, as well as 7mm and M.2 drives.
- Industry-standard Advanced Encryption Standard (AES) NI support for faster, stronger encryption.
- Intel Execute Disable Bit functionality can prevent certain classes of malicious buffer overflow attacks when combined with a supported operating system.
- Intel Trusted Execution Technology provides enhanced security through hardware-based resistance to malicious software attacks, allowing an application to run in its own isolated space, protected from all other software running on a system.
- Additional physical security features are an available chassis intrusion switch and available lockable front bezel.

Energy efficiency

The SR650 V3 offers the following energy-efficiency features to save energy, reduce operational costs, and increase energy availability:

- The server supports an advanced direct-water cooling (DWC) capability with the Lenovo Neptune Processor DWC Module, where heat from the processors is removed from the rack and the data center using an open loop and coolant distribution units, resulting in lower energy costs
- Energy-efficient system board components help lower operational costs.
- High-efficiency power supplies with 80 PLUS Platinum and Titanium certifications
- Solid-state drives (SSDs) consume as much as 80% less power than traditional spinning 2.5-inch HDDs.
- The server uses hexagonal ventilation holes, which can be grouped more densely than round holes, providing more efficient airflow through the system and thus keeping your system cooler.
- Optional Lenovo XClarity Energy Manager provides advanced data center power notification, analysis, and policy-based management to help achieve lower heat output and reduced cooling needs.

Comparing the SR650 V3 to the SR650 V2

The ThinkSystem SR650 V3 improves on the previous generation SR650 V2, as summarized in the following table.

Table 1. Comparing the ThinkSystem SR650 V3 to the previous generation SR650 V2

Feature	SR650 V2	SR650 V3	Benefits
Processor	<ul style="list-style-type: none"> • 2x 3rd Gen Intel Xeon Scalable Processors • Up to 40 cores • TDP ratings up to 270W • 64x PCIe 4.0 lanes per processor 	<ul style="list-style-type: none"> • 2x 4th Gen Intel Xeon Scalable Processors • Up to 60 cores • TDP ratings up to 385W • 80x PCIe 5.0 lanes per processor 	<ul style="list-style-type: none"> • Significant increase in cores per processor • Increased performance • Consolidation of more apps on same number of servers, reducing costs • New PCIe 5.0 support means higher performance networking and NVMe storage
Memory	<ul style="list-style-type: none"> • DDR4 memory operating up to 3200 MHz • 8 channels per CPU • 32 DIMMs (16 per processor), 2 DIMMs per channel • Supports RDIMMs and 3DS RDIMMs • Up to 8TB of system memory • Intel Optane Persistent Memory 200 Series 	<ul style="list-style-type: none"> • DDR5 memory operating up to 4800 MHz • 8 channels per CPU • 32 DIMMs (16 per processor), 2 DIMMs per channel • Supports RDIMMs, 3DS RDIMMs and 9x4 RDIMMs • Up to 8TB of system memory • No support for Intel Optane Persistent Memory 	<ul style="list-style-type: none"> • New DDR5 memory offers significant performance improvements over DDR4 • Support for lower-cost 9x4 DIMMs
Internal storage	<ul style="list-style-type: none"> • 20x 3.5" SAS/SATA/NVMe (12 front, 4 mid, 4 rear) • 40x 2.5" SAS/SATA/NVMe (24 front, 8 mid, 8 rear) • Up to 4x 3.5" or 8x 2.5" mid-chassis drive bays • Up to 4x 3.5" or 8x 2.5" rear drive bays • 2x Internal M.2 (optional RAID support) • 8x Onboard NVMe ports • NVMe Retimer adapters for 16x NVMe • 2x rear 7mm hot swap SAS/SATA/NVMe; optional RAID 	<ul style="list-style-type: none"> • 20x 3.5" SAS/SATA/NVMe (12 front, 4 mid, 4 rear) • 40x 2.5" SAS/SATA/NVMe (24 front, 8 mid, 8 rear) • Up to 4x 3.5" or 8x 2.5" mid-chassis drive bays • Up to 4x 3.5" or 8x 2.5" rear drive bays • 2x Internal M.2 (optional RAID support) • 20x Onboard NVMe ports • NVMe Retimer adapters for 16x NVMe • 2x rear 7mm hot swap SAS/SATA/NVMe 	<ul style="list-style-type: none"> • Flexible storage offerings • Up to 32x NVMe drives for high-performance storage • 7mm hot swap drives as boot drives

Feature	SR650 V2	SR650 V3	Benefits
RAID	<ul style="list-style-type: none"> 8-, 16- and 32-port RAID adapters with up to 8GB flash Support for Lenovo and Broadcom adapters Support for PCIe or Internal cabled (CFF) form factor adapters Support for NVMe drives connected to 940 RAID adapters (Tri-Mode) Storage HBAs available PCIe Gen 3 and Gen 4 adapter choices 	<ul style="list-style-type: none"> 8-, 16- and 32-port RAID adapters with up to 8GB flash Support for Lenovo and Broadcom adapters Support for PCIe or Internal cabled (CFF) form factor adapters Support for NVMe drives connected to 940 RAID adapters (Tri-Mode) Storage HBAs available PCIe Gen 3 and Gen 4 adapter choices with support for Gen 5 adapters when available 	<ul style="list-style-type: none"> Consistent RAID/HBA support Flexible config solution PCIe Gen 5 allows for greater storage performance

Components and connectors

The following figure shows the front of the SR650 V3.

Figure 2. Front view of the ThinkSystem SR650 V3 with 2.5-inch drive bays

For details on the front ports, including the optional front VGA port and optional external diagnostic port, see the [Local management](#) section.

The following figure shows the front configurations of the SR650 V3. The server supports either 2.5-inch hot-swap drives (8, 16 or 24 drive bays) or 3.5-inch hot-swap drives (8 or 12 bays) at the front. The server also supports three front PCIe slots (2 full-height, 1 OCP) in addition to 16x 2.5-inch drive bays.

Figure 3. Front view of the ThinkSystem SR650 V3

The following figure shows the components visible from the rear of the server. The figure shows one configuration, with eight PCIe slots, however there are additional rear configurations which include 3.5-inch drive bays, 2.5-inch drive bays, or 7mm drive bays.

Figure 4. Rear view of the ThinkSystem SR650 V3 (configuration with eight PCIe slots)

The following figure shows the locations of key components inside the server.

Figure 5. Internal view of the ThinkSystem SR650 V3

System architecture

The following figure shows the architectural block diagram of the SR650 V3, showing the major components and their connections.

Figure 6. SR650 V3 system architectural block diagram

Standard specifications

The following table lists the standard specifications.

Table 2. Standard specifications

Components	Specification
Machine types	7D75 - 1 year warranty 7D76 - 3 year warranty
Form factor	2U rack
Processor	One or two 5th Gen Intel Xeon Scalable processors (formerly codenamed "Emerald Rapids"), or one or two 4th Gen Intel Xeon Scalable processors (formerly codenamed "Sapphire Rapids"). Supports processors up to 64 cores, core speeds of up to 3.9 GHz, and TDP ratings of up to 385 W.
Chipset	Intel C741 "Emmitsburg" chipset, part of the platform codenamed "Eagle Stream"
Memory	32 DIMM slots with two processors (16 DIMM slots per processor). Each processor has 8 memory channels, with 2 DIMMs per channel (DPC). Lenovo TruDDR5 RDIMMs, 9x4 RDIMMs, and 3DS RDIMMs are supported. DIMMs operate at up to 5600 MHz at 1 DPC and up to 4800 MHz at 2 DPC.
Persistent memory	No support.

Components	Specification
Memory maximum	Up to 8TB by using 32x 256GB 3DS RDIMMs
Memory protection	ECC, SDDC (for x4-based memory DIMMs), ADDDC (for x4-based memory DIMMs excluding 9x4 RDIMMs, requires Platinum or Gold processors), and memory mirroring.
Disk drive bays	<p>Up to 20x 3.5-inch or 40x 2.5-inch hot-swap drive bays:</p> <ul style="list-style-type: none"> Front bays can be 3.5-inch (8 or 12 bays) or 2.5-inch (8, 16 or 24 bays) Middle bays can be 3.5-inch (4 bays) or 2.5-inch (8 bays) simple-swap Rear bays can be 3.5-inch (2 or 4 bays) or 2.5-inch (4 or 8 bays) Combinations of SAS/SATA, NVMe, or AnyBay (supporting SAS, SATA or NVMe) are available <p>The server also supports these drives for OS boot or drive storage:</p> <ul style="list-style-type: none"> Two 7mm drives at the rear of the server (in addition to any 2.5-inch or 3.5-inch drive bays) Internal M.2 module supporting up to two M.2 drives <p>See Supported drive bay combinations for details.</p>
Maximum internal storage	<ul style="list-style-type: none"> 2.5-inch drives: <ul style="list-style-type: none"> 1228.8TB using 40x 30.72TB 2.5-inch SAS SSDs 307.2TB using 40x 7.68TB 2.5-inch SATA SSDs 4,423.68TB using 36x 122.88TB 2.5-inch NVMe SSDs 96TB using 40x 2.4TB 2.5-inch SAS HDDs 3.5-inch drives: <ul style="list-style-type: none"> 480TB using 20x 24TB 3.5-inch SAS HDDs 480TB using 20x 24TB 3.5-inch SATA HDDs 307.2TB using 20x 15.36TB 3.5-inch SAS SSDs 153.6TB using 20x 7.68TB 3.5-inch SATA SSDs 153.6TB using 12x 12.8TB 3.5-inch NVMe SSDs
Storage controller	<ul style="list-style-type: none"> 14x Onboard SATA ports (Intel VROC SATA RAID, formerly known as Intel RSTe RAID) Up to 20x Onboard NVMe ports (includes Intel VROC NVMe RAID, with optional license for non-Intel NVMe SSDs) NVMe Retimer Adapter (supports Intel VROC NVMe RAID) 12 Gb SAS/SATA RAID adapters <ul style="list-style-type: none"> 8, 16 or 32 ports Up to 8GB flash-backed cache PCIe 4.0 or PCIe 3.0 host interface 12 Gb SAS/SATA HBA (non-RAID) <ul style="list-style-type: none"> 8-port and 16-port PCIe 4.0 or PCIe 3.0 host interface
Optical drive bays	No internal optical drive
Tape drive bays	No internal backup drive
Network interfaces	Dedicated OCP 3.0 SFF slot with PCIe 5.0 x16 host interface. Supports a variety of 2-port and 4-port adapters with 1, 10, 25 or 100 GbE network connectivity. One port can optionally be shared with the XClarity Controller 2 (XCC2) management processor for Wake-on-LAN and NC-SI support.

Components	Specification
PCIe slots	<p>Up to 12x PCIe slots (10x rear, 2x front), plus a slot dedicated to an OCP 3.0 adapter. 2.5-inch drive configurations also support an additional internal bay for a cabled RAID adapter or HBA.</p> <p><i>Rear:</i> Up to 10x PCIe slots, plus a slot dedicated to the OCP adapter. Slot are either PCIe 5.0 or 4.0 depending on riser selection and rear drive bay selection. The use of some slots requires two processors.</p> <p>Slots are configured using three riser cards. Riser 1 (slots 1-3) and Riser 2 (slots 4-6) are installed in slots in the system board, Riser 3 (slots 7-8) and Riser 4 (9-10) are cabled to ports on the system board. A variety of riser cards are available. See the I/O expansion for details.</p> <p><i>Front:</i> The server also supports slots at the front of the server (configurations with up to 16 drive bays): 2x PCIe x16 full-height half-length slots, plus 1x OCP 3.0 slot</p> <p><i>Internal:</i> For 2.5-inch front drive configurations, the server supports the installation of a RAID adapter or HBA in a dedicated area that does not consume any of the PCIe slots.</p>
GPU support	Supports up to 8x single-wide GPUs or up to 3x double-wide GPUs
Ports	<p>Front: 1x USB 3.2 G1 (5 Gb/s) port, 1x USB 2.0 port (also for XCC local management), External diagnostics port, optional VGA port.</p> <p>Rear: 3x USB 3.2 G1 (5 Gb/s) ports, 1x VGA video port, 1x RJ-45 1GbE systems management port for XCC remote management. Optional DB-9 COM serial port (installs in slot 3).</p> <p>Internal: 1x USB 3.2 G1 (5 Gb/s) connector for operating system or license key purposes</p>
Cooling	6x (with two processors installed) or 5x (with one processor installed) single-rotor or dual-rotor hot swap 60 mm fans, configuration dependent. Fans are N+1 redundant, tolerating a single-rotor failure. One fan integrated in each power supply. For customers with water infrastructure in their data center, the SR650 V3 also supports open-loop water cooling for efficient heat removal.
Power supply	Up to two hot-swap redundant AC power supplies, 80 PLUS Platinum or 80 PLUS Titanium certification. 750 W, 1100 W, 1800 W, 2400 W and 2600W AC options, supporting 220 V AC. 750 W and 1100 W options also support 110V input supply. In China only, all power supply options support 240 V DC. Also available is a 1100W power supply with a -48V DC input.
Video	Embedded graphics with 16 MB memory with 2D hardware accelerator, integrated into the XClarity Controller 2 management controller. Maximum resolution is 1920x1200 32bpp at 60Hz.
Hot-swap parts	Drives, power supplies, and fans.
Systems management	Operator panel with status LEDs. Optional External Diagnostics Handset with LCD display. Models with 8x or 16x 2.5-inch front drive bays can optionally support an Integrated Diagnostics Panel. XClarity Controller 2 (XCC2) embedded management controller, XClarity Administrator centralized infrastructure delivery, XClarity Integrator plugins, and XClarity Energy Manager centralized server power management. Optional XClarity Controller Platinum to enable remote control and other functions.
Security features	Chassis intrusion switch, Power-on password, administrator's password, Root of Trust module supporting TPM 2.0 and Platform Firmware Resiliency (PFR). Optional lockable front security bezel.
Operating systems supported	Microsoft Windows Server, Microsoft Windows 10 & 11, Red Hat Enterprise Linux, SUSE Linux Enterprise Server, VMware ESXi, Ubuntu Server. See the Operating system support section for specifics.
Limited warranty	Three-year or one-year (model dependent) customer-replaceable unit and onsite limited warranty with 9x5 next business day (NBD).
Service and support	Optional service upgrades are available through Lenovo Services: 4-hour or 2-hour response time, 6-hour fix time, 1-year or 2-year warranty extension, software support for Lenovo hardware and some third-party applications.
Dimensions	Width: 445 mm (17.5 in.), height: 87 mm (3.4 in.), depth: 766 mm (30.1 in.). See Physical and electrical specifications for details.

Components	Specification
Weight	Maximum: 38.8 kg (85.5 lb)

Models

ThinkSystem SR650 V3 models can be configured by using the [Lenovo Data Center Solution Configurator \(DCSC\)](#).

Topics in this section:

- [CTO models](#)
- [CTO models for Windows 10 and Windows 11](#)
- [CTO models for NVIDIA Bluefield-2 SmartNIC DPUs](#)
- [Base feature codes](#)
- [Preconfigured models](#)

CTO models

ThinkSystem SR650 V3 models can be configured by using the [Lenovo Data Center Solution Configurator \(DCSC\)](#).

Configure-to-order (CTO) models are used to create models with factory-integrated server customizations. For CTO models, two types of base CTO models are available for the SR650 V3 as listed in the columns in the following table:

- General purpose base CTO models are for general business (non-HPC) and is selectable by choosing **General Purpose** mode in DCSC.
- AI and HPC base models are intended for Artificial Intelligence (AI) and High Performance Computing (HPC) configurations and solutions are enabled using the **AI & HPC Hardware - ThinkSystem Hardware** mode in DCSC. These configurations, along with Lenovo EveryScale Solutions, can also be built using [System x and Cluster Solutions Configurator \(x-config\)](#). **Tip:** Some HPC and AI models are not listed in DCSC and can only be configured in x-config.

"For AI" models: The base CTO models listed in the table with "for AI" in the names are the only base models that support high-performance GPUs and accelerators (Controlled GPUs). These models are classified under US Government ECCN regulations and have limited market and customer availability. All other base models do not support high-performance GPUs.

Preconfigured server models may also be available for the SR650 V3, however these are region-specific; that is, each region may define their own server models, and not all server models are available in every region.

The following table lists the base CTO models of the ThinkSystem SR650 V3 server.

Table 3. Base CTO models

Machine Type/Model General purpose	Machine Type/Model for AI and HPC	Description
7D76CTO1WW	7D76CTOLWW	ThinkSystem SR650 V3 - 3yr warranty
7D76CTOEW	7D76CTOPWW	ThinkSystem SR650 V3 - 3yr warranty for AI
7D75CTO1WW	7D75CTOLWW	ThinkSystem SR650 V3 - 1yr warranty
7D77CTO1WW	7D77CTOLWW	ThinkSystem SR650 V3 – SAP HANA configurations with 3-year warranty

CTO models for Windows 10 and Windows 11

The SR650 V3 can run Windows 10 and Windows 11, however only a subset of adapters and drives can be installed. For ease of configuration, the following Base CTO models have been announced to assist building a configuration that can be used with the client operating systems. For more information, see the [Windows 10 and Windows 11](#) section.

Table 4. Base CTO models for SR650 V3 with Windows 10 and Windows 11

Machine Type/Model	Description
7D76CTO3WW	ThinkSystem SR650 V3 - 3yr Warranty for Windows Client OS
7D76CTOFWW	ThinkSystem SR650 V3 - 3yr Warranty for Windows Client OS for AI
7D75CTO3WW	ThinkSystem SR650 V3 - 1yr Warranty for Windows Client OS

CTO models for NVIDIA Bluefield-2 SmartNIC DPUs

The SR650 V3 supports the new VMware vSphere Distributed Services Engine (DSE) using the NVIDIA Bluefield-2 SmartNIC Data Processing Unit (DPU). This solution improves the performance of VMware vSphere by offloading tasks from server CPUs to the DPU thereby making data center applications more efficient.

When configuring VMware vSphere Distributed Services Engine using NVIDIA BlueField-2 DPUs, you will need to build the server in the DCSC configurator starting from the DPU-specific CTO models listed in the following table.

BlueField-3 support: These CTO models are not required for BlueField-3 DPUs.

For more information, see the [DPU adapter](#) section.

Table 5. Base CTO models for SR650 V3 with NVIDIA Bluefield SmartNIC DPU support

Machine Type/Model	Description
7D76CTO4WW and 7D76CTOGWW	ThinkSystem SR650 V3 DPU - 3 year Warranty
7D75CTO4WW	ThinkSystem SR650 V3 DPU - 1 year Warranty

Base feature codes

Models of the SR650 V3 are defined based on whether the server has 2.5-inch drive bays at the front (called the 2.5-inch chassis) or whether it has 3.5-inch drive bays at the front (called the 3.5-inch chassis). For models, the feature codes for these chassis bases are as listed in the following table.

Table 6. Chassis base feature codes

Feature code	Description
BLKK	ThinkSystem SR650 V3 24x2.5" Chassis
BLKJ	ThinkSystem SR650 V3 12x3.5" Chassis

Preconfigured models

The following tables list the available preconfigured models, grouped by region.

- [Models for Asia Pacific region](#)
- [Models for Australia and New Zealand](#)
- [Models for Brazil](#)
- [Models for EMEA region](#)
- [Models for Hong Kong, Taiwan, Korea \(HTK\)](#)
- [Models for India](#)
- [Models for Latin American countries \(except Brazil\)](#)

Refer to the Specifications section for information about standard features of the server.

Common to all models:

- Power supplies are Platinum unless otherwise stated
- All models include a Toolless Slide Rail Kit

Models for Asia Pacific region

The following table lists the models for the Asia Pacific region: Australia, Bangladesh, Brunei, Hong Kong, India, Japan, Korea, Sri Lanka, Malaysia, New Zealand, Philippines, Singapore, Thailand, Taiwan, Vietnam

Models for Australia and New Zealand

AP models: Customers in Australia and New Zealand also have access to the [Asia Pacific region](#) models.

Common to all Australia and New Zealand models:

- All models include a Toolless Slide Rail Kit and Cable Management Arm

† Processor description: Processor model, number of cores, thermal design power (TDP), core frequency

Processors

The SR650 V3 supports processors in either the 5th Gen Intel Xeon Scalable Processor family or the 4th Gen Intel Xeon Scalable Processor family. The server supports one or two processors.

Topics in this section:

- Processor options
- Processor features
- Intel On Demand feature licensing
- One-processor configurations
- Thermal requirements for processors
- Lenovo Processor Neptune Core Module - Open-loop liquid cooling
- UEFI operating modes

Processor options

All supported processors have the following characteristics:

- 8 DDR5 memory channels at 2 DIMMs per channel
- Up to 4 UPI links between processors at up to 20 GT/s
- Up to 80 PCIe 5.0 I/O lanes

The following table lists the 5th Gen processors that are currently supported by the SR650 V3.

Table 17. 5th Gen Intel Xeon Processor support

* These processors are single-socket capable processors and are only available in configure-to-order builds or in preconfigured models. Not available as option part numbers.

Configuration notes:

- Processor options include a heatsink but do not include a system fan

Processor features

Processors supported by the SR650 V3 introduce new embedded accelerators to add even more processing capability:

- QuickAssist Technology (Intel QAT)

Help reduce system resource consumption by providing accelerated cryptography, key protection, and data compression with Intel QuickAssist Technology (Intel QAT). By offloading encryption and decryption, this built-in accelerator helps free up processor cores and helps systems serve a larger number of clients.

- Intel Dynamic Load Balancer (Intel DLB)

Improve the system performance related to handling network data on multi-core Intel Xeon Scalable processors. Intel Dynamic Load Balancer (Intel DLB) enables the efficient distribution of network processing across multiple CPU cores/threads and dynamically distributes network data across multiple CPU cores for processing as the system load varies. Intel DLB also restores the order of networking data packets processed simultaneously on CPU cores.

- Intel Data Streaming Accelerator (Intel DSA)

Drive high performance for storage, networking, and data-intensive workloads by improving streaming data movement and transformation operations. Intel Data Streaming Accelerator (Intel DSA) is designed to offload the most common data movement tasks that cause overhead in data center-scale deployments. Intel DSA helps speed up data movement across the CPU, memory, and caches, as well as all attached memory, storage, and network devices.

- Intel In-Memory Analytics Accelerator (Intel IAA)

Run database and analytics workloads faster, with potentially greater power efficiency. Intel In-Memory Analytics Accelerator (Intel IAA) increases query throughput and decreases the memory footprint for in-memory database and big data analytics workloads. Intel IAA is ideal for in-memory databases, open source databases and data stores like RocksDB, Redis, Cassandra, and MySQL.

- Intel Advanced Matrix Extensions (Intel AMX)

Intel Advanced Matrix Extensions (Intel AMX) is a built-in accelerator in all Silver, Gold, and Platinum processors that significantly improves deep learning training and inference. With Intel AMX, you can fine-tune deep learning models or train small to medium models in just minutes. Intel AMX offers discrete accelerator performance without added hardware and complexity.

The processors also support a separate and encrypted memory space, known as the SGX Enclave, for use by Intel Software Guard Extensions (SGX). The size of the SGX Enclave supported varies by processor model. Intel SGX offers hardware-based memory encryption that isolates specific application code and data in memory. It allows user-level code to allocate private regions of memory (enclaves) which are designed to be protected from processes running at higher privilege levels.

The following table summarizes the key features of all supported 5th Gen processors in the SR650 V3.

Table 19. 5th Gen Intel Xeon Processor features

CPU model	Die	Cores/threads	Core speed (Base / TB max†)	L3 cache*	Max memory speed	UPI 2.0 links & speed	PCIe lanes	TDP	Accelerators				SGX Enclave Size
									QAT	DLB	DSA	IAA

† The maximum single-core frequency at with the processor is capable of operating

* L3 cache is 1.875 MB per core or larger. Processors with a larger L3 cache per core are marked with an *

** Bronze 3408U processor does not support Hyper-Threading Technology

‡ SKUs with a U suffix as well as some other SKUs have no UPI links and are single-socket only

Intel On Demand feature licensing

Intel On Demand is a licensing offering from Lenovo for certain 4th Gen and 5th Gen Intel Xeon Scalable processors that implements software-defined silicon (SDSi) features. The licenses allow customers to activate the embedded accelerators and to increase the SGX Enclave size in specific processor models as their workload and business needs change.

The available upgrades are the following:

- Up to 4x QuickAssist Technology (Intel QAT) accelerators
- Up to 4x Intel Dynamic Load Balancer (Intel DLB) accelerators
- Up to 4x Intel Data Streaming Accelerator (Intel DSA) accelerators
- Up to 4x Intel In-Memory Analytics Accelerator (Intel IAA) accelerators
- 512GB SGX Enclave, an encrypted memory space for use by Intel Software Guard Extensions (SGX)

See the [Processor features](#) section for a brief description of each accelerator and the SGX Enclave.

The following table lists the ordering information for the licenses. Accelerator licenses are bundled together based on the suitable workloads each would benefit with the additional accelerators.

Licenses can be activated in the factory (CTO orders) using feature codes, or as field upgrades using the option part numbers. With the field upgrades, they allow customers to only activate the accelerators or to increase the SGX Enclave size when their applications can best take advantage of them.

Intel On Demand is licensed on individual processors. For servers with two processors, customers will need a license for each processor and the licenses of the two processors must match. If customers add a second processor as a field upgrade, then you must ensure that the Intel On Demand licenses match the first processor.

Each license enables a certain quantity of embedded accelerators - the total number of accelerators available after activation is listed in the table. For example, Intel On Demand Communications & Storage Suite 4 (4L47A89451), once applied to the server, will result in a total of 4x QAT, 4x DLB and 4x DSA accelerators to be enabled the processor. The number of IAA accelerators is unchanged in this example.

Table 21. Ordering information for Intel on Demand

Part number	Feature code	License bundle	Accelerators and SGX Enclave enabled after the upgrade is applied (NC = No change)				
			QAT	DLB	DSA	IAA	SGX Enclave
4L47A89451	BX9C	Intel On Demand Communications & Storage Suite 4 (CSS4)	4	4	4	NC	No change
4L47A89452	BX9D	Intel On Demand Analytics Suite 4 (AS4)	NC	NC	4	4	No change
4L47A89453	BX9A	Intel On Demand Communications & Storage Suite 2 (CSS2)	2	2	NC	NC	No change
4L47A89454	BX9B	Intel On Demand Analytics Suite 1 (AS1)	NC	NC	NC	1	No change
4L47A89455	BX9E	Intel On Demand SGX 512GB Enclave	NC	NC	NC	NC	512 GB

The following table lists the 5th Gen processors that support Intel on Demand. The table shows the default accelerators and default SGX Enclave size, and it shows (with green highlight) what the total new accelerators and SGX Enclave would be once the Intel On Demand features have been activated.

Table 22. Intel On Demand support by processor - 5th Gen processors

Configuration rules:

- Not all processors support Intel On Demand upgrades - see the table for those that do not support Intel On Demand
- Upgrades can be performed in the factory (feature codes) or in the field (part numbers) but not both, and only one time
- Upgrades cannot be removed once activated
- SGX Enclave upgrades are independent of the accelerator upgrades; install either or both as desired
- For processors that support more than one upgrade, all upgrades must be performed at the same time
- Only one of each type of upgrade can be applied to a processor (eg 2x BX9A is not supported; 4x BX9B is not supported)
- The following processors support two accelerator upgrades, Intel On Demand Analytics Suite 4 (4L47A89452) and Intel On Demand Communications & Storage Suite 4 (4L47A89451); the table(s) above shows the accelerators based on both upgrades being applied.
 - Intel Xeon Platinum 8460Y+
 - Intel Xeon Platinum 8480+
 - Intel Xeon Platinum 8568Y+
 - Intel Xeon Platinum 8592+
- The number of accelerators listed for each upgrade is the number of accelerators that will be active one the upgrade is complete (ie the total number, not the number to be added)
- If a server has two processors, then two feature codes must be selected, one for each processor. The upgrades on the two processors must be identical.
- If a one-processor server with Intel On Demand features activated on it has a 2nd processor added as a field upgrade, the 2nd processor must also have the same features activated by purchasing the appropriate part numbers.

One-processor configurations

The SR650 V3 can be used with only one processor installed. Most core functions of the server (including the XClarity Controller) are connected to processor 1 as shown in the [System architecture](#) section.

With only one processor, the server has the following capabilities:

- 16 memory DIMMs for a 4TB maximum
- Rear slots: Slot 1-3 (riser 1) and slots 7-8 (riser 3) are available; (Slots 4-6 in Riser 2 are not available)
- Front slots: Slot 12 (Slot 11 is not available)

Drive support is as follows (see the [Storage configurations](#) section for specifics):

- Front SAS/SATA drives are supported - 8, 16, 24 drives (2.5-inch) or 8, 12 drives (3.5-inch)
- Front NVMe drives are supported - up to 8 drives (2.5-inch) or 4 drives (3.5-inch)
- Rear SAS/SATA drives are supported - 4x 3.5-inch drives or up to 4x 2.5-inch drives
- M.2 drives are supported
- 7mm rear drives are supported

Controller support is as follows:

- 12x onboard SATA
- 12x NVMe (8x onboard + 1x 4-port retimer adapter)
- RAID adapters/HBAs installed in slots 1-3
- Internal RAID/HBA controller (CFF form factor) with SAS/SATA-only configurations

Riser 3 is supported under the following conditions:

- No onboard NVMe connections are available
- With the x8/x8 PCIe Riser3 (BPKH or BPKF) selected, Slots 7 and 8 are both connected each with x8 lanes
- With the x16/x16 PCIe Riser3 (BLL9 or BPKG) selected, Slot 7 is connected with x16 lanes; Slot 8 is not connected
- The processor selected is not one of the following vRAN processors (insufficient PCIe lanes): 5423N, 5433N, 6403N, 6423N, 6433N, 6443N

The following components are not supported:

- Middle NVMe drive bays are not supported (SAS/SATA is supported)
- Rear 4x 3.5-inch drive bay backplane (this backplane gets power from Riser 2 which requires CPU 2)

Thermal requirements for processors

For thermal requirements for processors, see the Thermal Rules section in the Information Center for the SR650 V3:

https://pubs.lenovo.com/sr650-v3/thermal_rules

Lenovo Processor Neptune Core Module - Open-loop liquid cooling

The SR650 V3 also supports advanced direct-water cooling (DWC) capability with the Lenovo Processor Neptune Core Module. This module implements a liquid cooling solution where heat from the processors is removed from the rack and the data center using an open loop and coolant distribution units.

With the Processor Neptune Core Module, all heat generated by the processors is removed from the server using water. This means that the server fans and data center air conditioning units only need to remove the heat generated by the other components. This results in lower air conditioning costs and it enables the use of slower fans which results in lower overall power consumption.

Typical power saving of 23% (up to 9.9KW per rack) are possible, based on 18x SR650 V3 servers in a rack (DC level PUE weighted) at 30°C ambient temperature. Power savings are configuration dependent.

The following figure shows the Lenovo Processor Neptune Core Module.

Figure 7. Lenovo Processor Neptune Core Module

The Processor Neptune Core Module also includes a leak detection module which can detect a leakage of more than 0.5ml (about 10 drops) along the length of the tube and then issue an event to the XClarity Controller. XCC will then post an error to the System Event Log and enable further actions. Once the liquid evaporates, a further event is issued to XCC.

The Processor Neptune Core Module is only available in CTO orders, not as a field upgrade. Ordering information is listed in the following table.

Table 24. Lenovo Processor Neptune Core Module

Part number	Feature code	Description
CTO only	BXBC*	ThinkSystem V3 1U/2U Neptune Processor Direct Water Cooling Solution

* In DCSC, this feature code is listed in the Processor tab

Configuration notes:

- The Processor Neptune Core Module requires water infrastructure be available in the rack cabinet and data center, as described in the [Water infrastructure](#) section.
- All processor SKUs are supported
- Either one or two CPUs are supported
- All front drive bay configurations are supported
- Slot 6 is not available for adapters - the water loop is routed through the space otherwise occupied by slot 6
- Rear drive bays are supported
- 7mm drive bays are supported only in slot 3
- M.2 adapters are supported based on the configurations in the [Storage configurations](#) section
- Standard fans can be configured in most configurations
- The use of a cable management arm (CMA) is not supported

For more information, see the Thermal Rules page:
https://pubs.lenovo.com/sr650-v3/thermal_rules

The following figure shows the Lenovo Neptune Processor DWC Module installed in the SR650 V3 (risers removed to show internal components).

Figure 8. Lenovo Neptune Processor DWC Module installed in the SR650 V3

UEFI operating modes

The SR650 V3 offers preset operating modes that affect energy consumption and performance. These modes are a collection of predefined low-level UEFI settings that simplify the task of tuning the server to suit your business and workload requirements.

The following table lists the feature codes that allow you to specify the mode you wish to preset in the factory for CTO orders.

UK and EU customers: For compliance with the ERP Lot9 regulation, you should select feature BFYE. For some systems, you may not be able to make a selection, in which case, it will be automatically derived by the configurator.

Table 25. UEFI operating mode presets in DCSC

Feature code	Description
BFYB	Operating mode selection for: "Maximum Performance Mode"
BFYC	Operating mode selection for: "Minimal Power Mode"
BFYD	Operating mode selection for: "Efficiency Favoring Power Savings Mode"
BFYE	Operating mode selection for: "Efficiency - Favoring Performance Mode"

The preset modes for the SR650 V3 are as follows:

- **Maximum Performance Mode** (feature BFYB): Achieves maximum performance but with higher power consumption and lower energy efficiency.
- **Minimal Power Mode** (feature BFYC): Minimize the absolute power consumption of the system.
- **Efficiency Favoring Power Savings Mode** (feature BFYD): Maximize the performance/watt efficiency with a bias towards power savings. This is the favored mode for SPECpower benchmark testing, for example.
- **Efficiency Favoring Performance Mode** (feature BFYE): Maximize the performance/watt efficiency with a bias towards performance. This is the favored mode for Energy Star certification, for example.

For details about these preset modes, and all other performance and power efficiency UEFI settings offered in the SR650 V3, see the paper "Tuning UEFI Settings for Performance and Energy Efficiency on Intel Xeon Scalable Processor-Based ThinkSystem Servers", available from <https://lenovopress.lenovo.com/lp1477>.

Memory options

The SR650 V3 uses Lenovo TruDDR5 memory operating at up to 5600 MHz. The server supports up to 32 DIMMs with 2 processors. The processors have 8 memory channels and support 2 DIMMs per channel (DPC). The server supports up to 8TB of memory using 32x 256GB 3DS RDIMMs and two processors.

With 5th Gen Intel Xeon processors, DIMMs operate at the following speeds, up to the memory bus speed of the processor selected. See the [Processor features](#) section for specifics.

- 1 DIMM per channel (DPC) using RDIMMs: Up to 5600 MHz
- 1 DPC using 3DS RDIMMs: Up to 5200 MHz
- 2 DPC using RDIMMs or 3DS RDIMMs: Up to 4400 MHz
- 2 DPC using Performance+ RDIMMs: Up to 4800 MHz

With 4th Gen Intel Xeon processors, DIMMs operate at the following speeds, up to the memory bus speed of the processor selected:

- 1 DPC: Up to 4800 MHz
- 2 DPC: Up to 4400 MHz

Lenovo TruDDR5 memory uses the highest quality components that are sourced from Tier 1 DRAM suppliers and only memory that meets the strict requirements of Lenovo is selected. It is compatibility tested and tuned to maximize performance and reliability. From a service and support standpoint, Lenovo TruDDR5 memory automatically assumes the system warranty, and Lenovo provides service and support worldwide.

The following table lists the 5600 MHz memory options that are currently supported by the SR650 V3. These DIMMs are only supported with 5th Gen Intel Xeon processors, with the exceptions listed in the memory rules below.

Table 26. 5600 MHz memory options

Part number	Feature code	Description	DRAM technology
Performance+ - 5600 MHz			
4X77A90991	BZ4U	ThinkSystem 32GB TruDDR5 Performance+ 5600MHz (2Rx8) RDIMM	16Gb
10x4 RDIMMs - 5600 MHz			
4X77A88049	BWHW	ThinkSystem 32GB TruDDR5 5600MHz (1Rx4) RDIMM	16Gb
4X77A88052	BWHS	ThinkSystem 64GB TruDDR5 5600MHz (2Rx4) RDIMM	16Gb
4X77A88058	BWHV	ThinkSystem 96GB TruDDR5 5600MHz (2Rx4) RDIMM	24Gb
4X77A93887	C4EA	ThinkSystem 128GB TruDDR5 5600MHz (2Rx4) RDIMM	32Gb
x8 RDIMMs - 5600 MHz			
4X77A88087	BWJE	ThinkSystem 16GB TruDDR5 5600MHz (1Rx8) RDIMM	16Gb
4X77A88051	BWJC	ThinkSystem 32GB TruDDR5 5600MHz (2Rx8) RDIMM	16Gb
3DS RDIMMs - 5600 MHz			
4X77A88054	BWHU	ThinkSystem 128GB TruDDR5 5600MHz (4Rx4) 3DS RDIMM	16Gb
4X77A88055	BX8X	ThinkSystem 256GB TruDDR5 5600 MHz (8Rx4) 3DS RDIMM	16Gb

The following table lists the 4800 MHz memory options that are currently supported by the SR650 V3. These DIMMs are only supported with 4th Gen Intel Xeon processors plus four specific 5th Gen processors as listed in the memory rules below. The 128GB 5600MHz RDIMM is also supported with 4th Gen processors.

Table 27. 4800 MHz memory options

Part number	Feature code	Description	DRAM technology
10x4 RDIMMs - 4800 MHz			
4X77A77030	BNF6	ThinkSystem 32GB TruDDR5 4800MHz (1Rx4) 10x4 RDIMM	16Gb
4X77A77032	BNF9	ThinkSystem 64GB TruDDR5 4800MHz (2Rx4) 10x4 RDIMM	16Gb
4X77A87034	BZC2	ThinkSystem 96GB TruDDR5 4800MHz (2Rx4) RDIMM	24Gb
4X77A93887	C4EA	ThinkSystem 128GB TruDDR5 5600MHz (2Rx4) RDIMM	32Gb
x8 RDIMMs - 4800 MHz			
4X77A77029	BKTL	ThinkSystem 16GB TruDDR5 4800MHz (1Rx8) RDIMM	16Gb
4X77A77031	BKTM	ThinkSystem 32GB TruDDR5 4800MHz (2Rx8) RDIMM	16Gb

For more information on DDR5 memory, see the Lenovo Press paper, *Introduction to DDR5 Memory*, available from <https://lenovopress.com/lp1618>.

The following rules apply when selecting the memory configuration:

- In DCSC, 4800 MHz memory can only be selected with 4th Gen Intel Xeon Scalable processors, and 5600 MHz memory can only be selected with 5th Gen Intel Xeon Scalable processors. The only exceptions are listed below.
- An exception to the above rule are the following 5th Gen processors, which only support 4800 MHz memory DIMMs:
 - Intel Xeon Bronze 3508U 8C 125W 2.1GHz Processor
 - Intel Xeon Silver 4509Y 8C 125W 2.6GHz Processor
 - Intel Xeon Silver 4510 12C 150W 2.4GHz Processor
 - Intel Xeon Silver 4510T 12C 115W 2.0GHz Processor
- An exception to the above rule is the following 5600 MHz DIMM which is supported with both 4th Gen

and 5th Gen processors (operates at up to 4800 MHz with 4th Gen processors):

- ThinkSystem 128GB TruDDR5 5600MHz (2Rx4) RDIMM, 4X77A93887
- The SR650 V3 only supports quantities of 1, 2, 4, 6, 8, 12, or 16 DIMMs per processor; other quantities not supported. Additional quantity requirements:
 - 24GB and 48GB DIMMs are only supported in quantities 1, 6, 8 per processor (2, 4, 12, 16 not supported)
 - 96GB DIMMs are only supported in quantities 1, 6, 8, 12, 16 per processor (2, 4 not supported)
- The 48GB RDIMM (4X77A87033) and 96GB RDIMM (4X77A87034) are supported with all 4th Gen processors
- The server supports three types of DIMMs: 9x4 RDIMMs, RDIMMs, and 3DS RDIMMs; UDIMMs and LRDIMMs are not supported
- Mixing of DIMM types is not supported (9x4 DIMMs with 10x4 RDIMMs, 9x4 DIMMs with 3DS RDIMMs, 10x4 RDIMMs with 3DS RDIMMs)
- Mixing of DRAM technology (16Gb, 24Gb, 32Gb) is not supported. See the column in the above table.
- Mixing of 24GB, 48GB and 96GB DIMMs (24Gb DRAM) is not supported; if using any of these DIMMs then all installed memory must be the same part number
- Mixing x4 and x8 DIMMs is not supported
- Mixing of DIMM rank counts is supported. Follow the required installation order installing the DIMMs with the higher rank counts first.
- Mixing of DIMM capacities is supported, however only two different capacities are supported across all channels of the processor. Follow the required installation order installing the larger DIMMs first.
- Memory mirroring is not supported with 9x4 DIMMs
- The mixing of 128GB 3DS RDIMMs and 256GB 3DS RDIMMs is supported
- The use of the 128GB 3D RDIMM feature BY8F has the following requirements for thermal reasons:
 - If the front drive bays are 12x 3.5-inch, then middle and rear drive bays are not supported
 - Additional ambient temperature requirements - see https://pubs.lenovo.com/sr650-v3/thermal_rules for information

For best performance, consider the following:

- Ensure the memory installed is at least the same speed as the memory bus of the selected processor.
- Populate all 8 memory channels.

The following memory protection technologies are supported:

- ECC detection/correction
- Bounded Fault detection/correction
- SDDC (for 10x4-based memory DIMMs; look for "x4" in the DIMM description)
- ADDDC (for 10x4-based memory DIMMs, not supported with 9x4 DIMMs)
- Memory mirroring

See the Lenovo Press article, [RAS Features of the Lenovo ThinkSystem Intel Servers](#) for more information about memory RAS features.

If memory channel mirroring is used, then DIMMs must be installed in pairs (minimum of one pair per processor), and both DIMMs in the pair must be identical in type and size. 50% of the installed capacity is available to the operating system.

Memory rank sparing is implemented using ADDDC/ADC-SR/ADDDC-MR to provide DRAM-level sparing feature support.

Internal storage

The SR650 V3 has three drive bay zones and supports up to 20x 3.5-inch or 40x 2.5-inch hot-swap drive bays or a combination of drive bays, depending on the selected chassis and backplane configuration. The server also supports configurations without any drive bays if desired.

The three drive bay zones are as follows:

- Front:
 - Up to 12x 3.5-inch hot-swap bays, or
 - Up to 24x 2.5-inch hot-swap bays
- Middle:
 - 4x 3.5-inch simple-swap bays, or
 - 8x 2.5-inch simple-swap bays
- Rear:
 - Up to 4x 3.5-inch hot-swap bays, or
 - Up to 8x 2.5-inch hot-swap bays
 - Also supports 2x 7mm hot-swap drives bays

The server also supports one or two M.2 drives, installed in an M.2 adapter internal to the server.

In this section:

- [NVMe drive support](#)
- [Tri-Mode support - RAID 940 and RAID 9450 adapters](#)
- [Front drive bays](#)
- [Mid drive bays](#)
- [Rear drive bays](#)
- [Storage configurations](#)
- [Field upgrades](#)
- [RAID flash power module \(supercap\) support](#)
- [7mm drives](#)
- [M.2 drives](#)
- [SED encryption key management with SKLM](#)

NVMe drive support

The SR650 V3 supports NVMe drives to maximize storage performance.

- Up to 36 NVMe drives in a 2.5-inch drive configuration, without oversubscription (that is, each x4 drive has a dedicated x4 (4 lanes) connection to the processor, either direct to the processor or via a retimer adapter)
 - Up to 24 installed in front bays
 - Up to 28 installed in the front and rear bays
 - Up to 32 installed in front and mid bays
 - Up to 36 installed in front, mid and rear bays
- Up to 8 NVMe drives in a 3.5-inch drive configuration, without oversubscription
 - All installed in mid bays

Riser 3 support with onboard NVMe: When Riser 3 is configured, the use of the onboard NVMe connections is supported up to 12x NVMe drives. Two 8-bay backplanes are required, with 4 bays unused. A quantity of 16x or more NVMe drives requires the use of an adapter if Riser 3 is configured.

The specifics of these configurations are covered in the [Storage configurations](#) section. The tables in those sections indicate the number of NVMe drives in each configuration.

In addition, the SR650 V3 supports two 7mm NVMe drives for use as boot drives.

Tri-Mode support - RAID 940 and RAID 9450 adapters

The RAID 940 and RAID 9450 adapters support NVMe through a feature named Tri-Mode support (or Trimode support). This feature enables the use of NVMe U.3 drives at the same time as SAS and SATA drives. Tri-Mode requires an AnyBay backplane. Cabling of the controller to the backplanes is the same as with SAS/SATA drives, and the NVMe drives are connected via a PCIe x1 link to the controller.

NVMe drives connected using Tri-Mode support provide better performance than SAS or SATA drives: A SATA SSD has a data rate of 6Gbps, a SAS SSD has a data rate of 12Gbps, whereas an NVMe U.3 Gen 4 SSD with a PCIe x1 link will have a data rate of 16Gbps. NVMe drives typically also have lower latency and higher IOPS compared to SAS and SATA drives. Tri-Mode is supported with U.3 NVMe drives and requires an AnyBay backplane.

Tri-Mode requires U.3 drives: Only NVMe drives with a U.3 interface are supported. U.2 drives are not supported. See the [Internal drive options](#) section for the U.3 drives supported by the server.

Front drive bays

The front drive bay zone supports the following configurations:

- 8x or 12x 3.5-inch drive bays (all hot-swap)
- 8x, 16x or 24x 2.5-inch drive bays (all hot-swap)
- 4x 2.5-inch drive bays (all hot-swap) with support for front PCIe slots
- No backplanes and no drives (supports [field upgrades](#))

The specific combinations that are supported in the SR650 V3 are shown in the following figures. The feature codes listed are the backplane feature codes when ordering CTO and correspond to the feature codes listed in the table below the figure. Note that NVMe and AnyBay backplanes may be available either PCIe Gen4 (G4) or PCIe Gen5 (G5) as listed in the figures.

Figure 9. SR650 V3 front drive bay configurations - 3.5-inch drive bays

Figure 10. SR650 V3 front drive bay configurations - 2.5-inch drive bays, all the same drive type

Figure 11. SR650 V3 front drive bay configurations - 2.5-inch drive bays, combinations

Figure 12. SR650 V3 front drive bay configurations - 2.5-inch drive bays with front PCIe slots

The backplanes used to provide these drive bays are listed in the following table.

Field upgrades: All front backplanes are available as part numbers for field upgrades along with required cable option kits, as described in the [Field upgrades](#) section below.

Table 28. Backplanes for front drive bays

Feature	Description	Bays	PCIe Gen	SAS Gen	Max qty
Front 3.5-inch drive backplanes					
B8LP	ThinkSystem 2U 8x3.5" SAS/SATA Backplane	8	-	12Gb	1
B8LT	ThinkSystem 2U 12x3.5" SAS/SATA Backplane	12	-	12Gb	1
BPL8	ThinkSystem 2U 8x3.5" SAS/SATA+4 AnyBay Backplane	12	Gen4	24Gb	1
BPL9	ThinkSystem 2U 8x3.5" SAS/SATA+4 NVMe Backplane	12	Gen4	24Gb	1
BQ2S	ThinkSystem 2U 12x3.5" SAS/SATA with Rear 4-Bay Expander Backplane	12*	-	12Gb	1
Front 2.5-inch drive backplanes					
B8LU	ThinkSystem 2U 8x2.5" SAS/SATA Backplane	8	-	12Gb	3
BH8D	ThinkSystem 2U/4U 8x2.5" NVMe Backplane	8	Gen4	-	3
BS7Y	ThinkSystem V3 2U 8x2.5" NVMe Gen5 Backplane	8	Gen5	-	3
BH8B	ThinkSystem 2U/4U 8x2.5" AnyBay Backplane	8	Gen4	24Gb	3
BLL2	ThinkSystem V3 2U 8x2.5" AnyBay Gen5 Backplane	8	Gen5	24Gb	3
BQ2T	ThinkSystem 2U 24x2.5" SAS/SATA with Rear 4-Bay Expander Backplane	24*	-	12Gb	1
Integrated Diagnostics Panel (for 2.5-inch configurations with 8 or 16 bays only)					
BMJA	ThinkSystem 2U 16x2.5" Front Operator Panel v2	-	-	-	1

* Backplane has an onboard SAS expander that provides connectivity to front SAS/SATA drive bays using only an 8-port controller, plus support for 4x rear drives in a separate backplane (order the rear backplane separately). See below for additional information and requirements.

The use of front drive bays has the following configuration rules:

- The SR650 V3 also supports configurations without any drive bays, allowing for drive bay upgrades as described in the [field upgrades](#) section.
- Most backplanes require connections to controllers that provides enough ports to connect each drive (eg 8 ports for an 8-bay backplane). The only exceptions to that are the backplanes with built-in SAS expanders - these backplanes require a fewer number of controller ports to connect to the front drives, and also include a connection to up to 4x rear drive bays. Connections to mid-chassis backplanes or to 8x rear drive bays require additional controller ports. Supported connections are as follows:
 - For the ThinkSystem 2U 12x3.5" SAS/SATA with Rear 4-Bay Expander Backplane, feature BQ2S:
 - 12x3.5" front drives only: requires a single 8i controller
 - 12x3.5" + 4x3.5" (Rear): requires a single 8i controller, 8i to front+rear
 - 12x3.5" + 4x3.5" (Mid): requires 16i controller - 8i to front, 8i to middle
 - 12x3.5" + 4x3.5" (Mid) + 4x3.5" (Rear): requires 16i controller, 8i to front+rear, 8i to middle
 - For the ThinkSystem 2U 24x2.5" SAS/SATA with Rear 4-Bay Expander Backplane, feature BQ2T:
 - 24x2.5" front drives only: requires a single 8i controller
 - 24x2.5" + 4x2.5" (Rear): requires a single 8i controller, 8i to front+rear
 - 24x2.5" + 8x2.5" (Mid): requires 16i controller - 8i to front, 8i to middle
 - 24x2.5" + 8x2.5" (Mid) + 8x2.5" (Rear): requires 32i controller - 8i to front, 8i to middle, 8i to rear

For specifics configurations, see the [Storage configurations](#) section.

- If you are building a server configuration that includes the ThinkSystem 2U 24x2.5" SAS/SATA with Rear 4-Bay Expander Backplane (feature BQ2T) and the order also includes a rack cabinet, then you can configure at most 6 drives to be installed in the factory. The remaining drives must be ordered separately using the option part numbers for the drives. This requirement does not apply if the order does not include a rack cabinet. The requirement is due to the shock/vibration limits of the 24x 2.5-inch backplane.
- If 3.5-inch front drive bays are used, an internal (CFF) RAID adapter or HBA is not supported as the adapter and bays occupy the same physical space
- Any 8x 2.5-inch and 16x 2.5-inch drive configuration (SAS/SATA, AnyBay, or NVMe) can optionally be configured for use with the Integrated Diagnostics Panel as described in the [Local management](#) section. 3.5-inch drive configurations do not support the Integrated Diagnostics Panel. With the Integrated Diagnostics Display, 8-bay configurations can be upgrade to 16 bays, however 16-bay configurations cannot be upgrade to 24 bays.

Mid drive bays

The SR650 V3 supports simple-swap drives installed in the middle of the server chassis. The drive bays are accessible by removing the top lid of the server and levering the mid drive chassis up at the front.

The following configurations are supported:

- 4x 3.5-inch simple-swap SAS/SATA drive bays
- 8x 2.5-inch simple-swap SAS/SATA drive bays
- 8x 2.5-inch simple-swap NVMe drive bays

The drive bays in the open position are shown in the following figure.

Simple-swap drive bays: The drives that are installed in the mid-chassis drive bays are simple-swap, not hot-swap, even though the drives use hot-swap drive trays.

M.2 support: When mid drive bays are configured, the M.2 adapter is installed on the mid drive bay mechanical as shown in the images.

Figure 13. Mid-chassis drive bays

The backplanes used to provide these drive bays are listed in the following table.

Table 29. Backplanes for mid-chassis drive bays

Feature code	Description	PCIe Gen	Maximum supported
Mid - 3.5-inch drive backplane			
BCQK	ThinkSystem 2U 4x3.5" SAS/SATA Middle Backplane	-	1
Mid - 2.5-inch drive backplane			
BCQL	ThinkSystem 2U 4x2.5" SAS/SATA Middle Backplane	-	2‡
BDY7	ThinkSystem 2U 4x2.5" Middle NVMe Backplane	Gen4	2‡
BS81	ThinkSystem 2U 4x2.5" Middle NVMe Gen5 Backplane	Gen5	

‡ 2.5-inch drive backplanes for the mid-chassis area must be installed in pairs. NVMe and SAS/SATA cannot be mixed.

Field upgrades: Backplanes are available as part numbers for field upgrades along with require cable option kits, as described in the [Field upgrades](#) section below.

The use of drive bays in the mid-chassis area has the following configuration rules:

- All processors are supported. Higher TDP processors will require the performance heatsinks.
- Full-length adapter cards are not supported
- GPUs (including low profile GPUs such as the NVIDIA A2) are not supported
- The use of mid drive bays requires Riser 1 be installed, since power for the mid bay backplanes comes from Riser 1

Rear drive bays

The SR650 V3 supports hot-swap drives installed at the rear of the server chassis. Supported configurations are as follows:

- 3.5-inch hot-swap drives
 - 2x SAS/SATA drive bays
 - 4x SAS/SATA drive bays
- 2.5-inch hot-swap drives
 - 4x SAS/SATA drive bays
 - 4x NVMe Gen5 drive bays
 - 4x AnyBay Gen5 drive bays
 - 8x SAS/SATA drive bays

The configurations are shown in the following figure.

Figure 14. Rear 2.5-inch and 3.5-inch drive bay configurations

The backplanes used to provide these drive bays are listed in the following table.

7mm drives: The SR650 V3 supports two 7mm drives. See the [7mm drives](#) section for details.

Table 30. Backplanes for rear drive bays

Feature code	Description	PCIe Gen	Maximum supported
Rear - 3.5-inch drive backplanes			
BAG7	ThinkSystem 2U 2x3.5" SAS/SATA Rear Backplane	-	1
B8L3	ThinkSystem 1U/2U 4x3.5" SAS/SATA Backplane	-	1
Rear - 2.5-inch drive backplanes			
B8LV	ThinkSystem 2U 4x2.5" SAS/SATA Backplane	-	1
BQZM	ThinkSystem 4x2.5" NVMe Gen 5 Backplane	Gen5	
BSE3	ThinkSystem 4x2.5" AnyBay Gen5 Backplane	Gen5	1
B97X	ThinkSystem 2U 8x2.5" SAS/SATA Rear Backplane	-	1

Field upgrades: Backplanes are available as part numbers for field upgrades along with require cable option kits, as described in the [Field upgrades](#) section below.

The use of rear drive bays has the following configuration rules:

- The use of rear bays restricts the number of slots and the choice of risers that are supported. See the [I/C expansion](#) section for details.
- The use of rear drive bays may require that Riser 1 or Riser 2 be installed, since power for the rear backplane comes from that riser.
- Configurations with 4x 2.5-inch rear drive bays are not supported with 7mm drive bays, as they use the same power connector

Storage configurations

This section describes the various combinations of front and rear drives that the server supports, as well as M.2 support.

Tip: These tables are based on Config Matrix V5.6 in TRD V3.63

In this section:

- [Overview of configurations - 3.5-inch front drive bays](#)
- [Overview of configurations - 2.5-inch front drives supporting rear slots \(no front PCIe slots\)](#)
- [Overview of configurations - 2.5-inch front drives supporting 12 PCIe slots \(front & rear\)](#)
- [Details - 3.5-inch front drive bays](#)
- [Details - 2.5-inch front drives supporting rear slots \(no front PCIe slots\)](#)
- [Details - 2.5-inch front drives supporting 12 PCIe slots \(front & rear\)](#)

The following tables summarize the storage configurations for the SR650 V3. For details, including processor requirements, M.2 and 7mm support, and controller selections, see each of the Details tables.

Platinum processor support: Some storage configurations are only supported with certain processors:

- Configurations with "NP" (No Platinum) in the CPU column are supported with Bronze, Silver and Gold processors, but not Platinum processors.
- Configurations with "PO" (Platinum Only) in the CPU column are only supported with Platinum processors

For example, config 98-1 is only for Platinum processors, however config 98-2 is for all other processors.

Overview - 3.5-inch front drives

The following table summarizes the configurations that use 3.5-inch front drive bays.

Click to jump down to the [details of the 3.5-inch front drive configurations](#).

Return to [Storage configurations](#).

Field upgrades: For part number upgrades, see the [Drive bays field upgrades - 3.5-inch chassis](#) section.

Overview - 2.5-inch front drives supporting 12 PCIe slots (front & rear)

The following table summarizes the configurations that use 2.5-inch front drives supporting 12 PCIe slots (front & rear). Such a configuration supports up to 16x 2.5-inch drive bays + PCIe slots at the front of the server.

Click to jump down to the [details of the 2.5-inch front drive configurations](#).

Return to [Storage configurations](#).

Field upgrades: For part number upgrades, see the [Drive bay field upgrades - 2.5-inch chassis with front slots](#) section.

Table 33. Overview - 2.5-inch front drives supporting 12 PCIe slots (front & rear)

Details - 3.5-inch front bays

The following table details the configurations that use 3.5-inch front drive bays.

Click to go to the [overview of the 3.5-inch front drive configurations](#).

Return to [Storage configurations](#).

In the table:

- **M.2 + VROC (SATA)** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with SATA drives. RAID is optional, provided using VROC.
- **M.2 + VROC (NVMe)** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with NVMe drives. RAID is optional, provided using VROC.
- **M.2 + RAID adapter** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with either a RAID 5350-8i adapter (supporting SATA drives) or a RAID 540-8i (supporting NVMe drives). Adapter installs in a rear PCIe slot.
- **M.2 Integrated RAID** means the M.2 RAID NVMe adapter (B8P9) with a Marvell controller or the M.2 RAID B540i-2i SATA/NVMe Adapter with a Broadcom controller. RAID-0 and RAID-1 are supported.
- **7mm + VROC (SATA)** means the 7mm SATA/NVMe kit (BU0N) with SATA drives. RAID is optional, provided using VROC.
- **7mm + VROC (NVMe)** means the 7mm SATA/NVMe kit (BU0N) with NVMe drives. RAID is optional, provided using VROC.
- **7mm + RAID adapter** means the 7mm SATA/NVMe kit (BU0N) with either a RAID 5350-8i adapter (supporting SATA drives) or a RAID 540-8i (supporting NVMe drives). Adapter installs in a rear PCIe slot.
- **7mm Integrated RAID** means the 7mm NVMe RAID kit (B8P3) with a Marvell controller or the 7mm SATA/NVMe RAID kit (BYFG) with a Broadcom controller. RAID-0 and RAID-1 are supported.

Tip: M.2 and 7mm are mutually exclusive: they are not supported together in the same configuration

* For M.2 or 7mm: Requires 2 processors; 1P not supported

Details - 2.5-inch front bays supporting rear slots (no front PCIe slots)

The following table details the configurations that use 2.5-inch front bays supporting rear slots (no front PCIe slots).

Click to go to the [overview of the 2.5-inch front drive configurations](#).

Return to [Storage configurations](#).

In the table:

- **M.2 + VROC (SATA)** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with SATA drives. RAID is optional, provided using VROC.
- **M.2 + VROC (NVMe)** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with NVMe drives. RAID is optional, provided using VROC.
- **M.2 + RAID adapter** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with either a RAID 5350-8i adapter (supporting SATA drives) or a RAID 540-8i (supporting NVMe drives)
- **M.2 Integrated RAID** means the M.2 RAID NVMe adapter (B8P9) with a Marvell controller or the M.2

RAID B540i-2i SATA/NVMe Adapter with a Broadcom controller. RAID-0 and RAID-1 are supported.

- **7mm + VROC (SATA)** means the 7mm SATA/NVMe kit (BU0N) with SATA drives. RAID is optional, provided using VROC.
- **7mm + VROC (NVMe)** means the 7mm SATA/NVMe kit (BU0N) with NVMe drives. RAID is optional, provided using VROC.
- **7mm + RAID adapter** means the 7mm SATA/NVMe kit (BU0N) with either a RAID 5350-8i adapter (supporting SATA drives) or a RAID 540-8i (supporting NVMe drives)
- **7mm Integrated RAID** means the 7mm NVMe RAID kit (B8P3) with a Marvell controller or the 7mm SATA/NVMe RAID kit (BYFG) with a Broadcom controller. RAID-0 and RAID-1 are supported.

Tip: M.2 and 7mm are mutually exclusive: they are not supported together in the same configuration

* For M.2 or 7mm: Requires 2 processors; 1P not supported

† NP (No Platinum) means the configuration does not support Platinum processors — only Bronze, Silver and Gold are supported. PO (Platinum Only) means the configuration only supports Platinum processors.

Details - 2.5-inch front drives supporting 12 PCIe slots (front & rear)

The following table details the configurations that use 2.5-inch front drives supporting 12 PCIe slots (front & rear). Such a configuration supports up to 16x 2.5-inch drive bays + PCIe slots at the front of the server.

Click to go to the [overview of the 2.5-inch front drive configurations](#).

Return to [Storage configurations](#).

In the table:

- **M.2 + VROC (SATA)** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with SATA drives. RAID is optional, provided using VROC.
- **M.2 + VROC (NVMe)** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with NVMe drives. RAID is optional, provided using VROC.
- **M.2 + RAID adapter** means the M.2 SATA/x4 NVMe adapter (4Y37A79663) with either a RAID 5350-8i adapter (supporting SATA drives) or a RAID 540-8i (supporting NVMe drives)
- **M.2 Integrated RAID** means the M.2 RAID NVMe adapter (B8P9) with a Marvell controller or the M.2 RAID B540i-2i SATA/NVMe Adapter with a Broadcom controller. RAID-0 and RAID-1 are supported.
- **7mm + VROC (SATA)** means the 7mm SATA/NVMe kit (BU0N) with SATA drives. RAID is optional, provided using VROC.
- **7mm + VROC (NVMe)** means the 7mm SATA/NVMe kit (BU0N) with NVMe drives. RAID is optional, provided using VROC.
- **7mm + RAID adapter** means the 7mm SATA/NVMe kit (BU0N) with either a RAID 5350-8i adapter (supporting SATA drives) or a RAID 540-8i (supporting NVMe drives)
- **7mm Integrated RAID** means the 7mm NVMe RAID kit (B8P3) with a Marvell controller or the 7mm SATA/NVMe RAID kit (BYFG) with a Broadcom controller. RAID-0 and RAID-1 are supported.

Tip: M.2 and 7mm are mutually exclusive: they are not supported together in the same configuration

Table 36. Details - 2.5-inch front drives supporting 12 PCIe slots (front & rear)

* For M.2 or 7mm: Requires 2 processors; 1P not supported

Field upgrades

The SR650 V3 is orderable without drive bays, allowing you to add a backplane, cabling and controllers as field upgrades. The server also supports upgrading some configurations by adding additional front drive bays (for example, upgrading from 8 to 16x 2.5-inch drive bays).

Upgrade path: The key criteria for upgrade support is to ensure that the target configuration is one of the supported drive bay configurations as listed in the [Supported drive bay combinations](#) section.

For example, if you are upgrading a 2.5-inch SAS/SATA drive configuration from 8 bays (Config 9) to 16 bays (Config 12), you will need these additional options:

- 4XH7A60930, ThinkSystem V3 2U 8x2.5" SAS/SATA Backplane Option Kit
- 4X97A82935, ThinkSystem SR650 V3 2.5" Chassis Front BP2 SAS/SATA Cable Kit

To add drive bays you will need to order both drive backplanes and cable kits. Backplane kits do not include cables.

In this section:

- [Drive bay field upgrades - 3.5-inch chassis](#)

- Drive bay field upgrades - 2.5-inch chassis with SAS/SATA and Gen4 front bays
- Drive bay field upgrades - 2.5-inch chassis with Gen5 front bays
- Drive bay field upgrades - 2.5-inch chassis with front slots
- Upgrading to an internal (CFF) adapter
- 2.5-inch drive bay fillers

Drive bay field upgrades - 3.5-inch chassis

The table below lists the backplane kits and cable kits needed to build one of the supported 3.5-inch chassis configurations.

The Config numbers listed here match the configuration listed in the Storage configuration [Overview](#) and [Details](#) sections.

Return to [Field upgrades](#).

For more information about the backplane kits and cable kits, see the Lenovo server options site:
https://serveroption.lenovo.com/cable_kit_options/

Table 37. Drive bay field upgrade for the 3.5-inch chassis (Blue = SAS/SATA, Purple = AnyBay, Red = NVMe)

Drive bay field upgrades - 2.5-inch chassis with SAS/SATA and Gen4 front bays

The tables below lists the backplane kits and cable kits needed to build one of the supported 2.5-inch chassis configurations with either SAS/SATA or Gen4 front backplanes.

The Config numbers listed here match the configuration listed in the Storage configuration [Overview](#) and [Details](#) sections.

Return to [Field upgrades](#).

Note: Front drive cable kits are based on the location of the backplane in the server. The three backplane locations are BP1, BP2 and BP3 as shown in the following figure.

Figure 15. Backplane numbering

For more information about the backplane kits and cable kits, see the Lenovo server options site: https://serveroption.lenovo.com/cable_kit_options/

Table 38. Drive bay field upgrade for the 2.5-inch chassis (SAS/SATA and Gen4 NVMe/AnyBay) (Blue = SAS/SATA, Purple = AnyBay, Red = NVMe)

Drive bay field upgrades - 2.5-inch chassis with Gen5 front bays

The tables below lists the backplane kits and cable kits needed to build one of the supported 2.5-inch chassis configurations with Gen5 NVMe or AnyBay front backplanes.

The Config numbers listed here match the configuration listed in the Storage configuration [Overview](#) and [Details](#) sections.

Return to [Field upgrades](#).

Upgrading to an internal (CFF) adapter

If you want to add an internal (CFF) storage adapter (HBA, RAID adapter or SAS expander) to a configuration, you will need to order the cable kit as listed in the following table. Suitable upgrades are either replacing an existing adapter in a rear PCIe slot, or adding the CFF adapter to a server without any storage adapter installed.

The cable kit to order is listed in the following table.

Table 41. Cable kit when upgrading to an Internal HBA/RAID adapter

Part number	Description
4X97A82941	ThinkSystem SR650 V3 Internal HBA/RAID Adapter Cable Kit

The cable kit includes the cables need to connect to backplanes. Contents of the kit is listed in the following page:

https://serveroption.lenovo.com/cable_kit_options/cable_kit_sr650v3_internal_hba_raid_adapter

When adding drive bays, you will also need to add the appropriate CFF storage controller.

2.5-inch drive bay fillers

Backplane option kits include the necessary drive bay fillers, however if needed, additional blanks can be ordered as listed in the following table.

Table 42. Drive bay fillers for 2.5-inch bays

Part number	Description
4XH7A99569	ThinkSystem 2.5" 1x1 HDD Filler by 8 units (contains 8x single drive-bay fillers)

RAID flash power module (supercap) support

If you plan to add one of the RAID adapters that includes a RAID flash power module (supercap) as a field upgrade, then you may also need to order a Supercap installation kit for the supercap, depending on the location where the supercap will be installed. For CTO orders, the components needed are automatically derived when you select the RAID adapter.

The adapters that this applies to are as follows:

- Any supported RAID 9350 adapter
- Any supported RAID 940 adapter

The location of the supercaps depends on the mid-chassis drive cage used in the server, as shown in the following table.

Table 43. Supercap support

Mid drive cage	Supercaps supported	Location of supercaps	Supercap holder
No mid drive cage	4	Mounted on the air baffle	Not needed
2.5-inch drives	2	Mounted on the left side of the mid drive cage	Integrated into the left side of the 2.5-inch mid drive cage
3.5-inch drives	1	Mounted under the system fan cage	Included with the server or part of ThinkSystem SR650 V3 Middle 4x3.5" SAS/SATA Backplane Option Kit (4XH7A82916) (see below)

For 3.5-inch drive bay configurations, if the server already has 3.5-inch mid-chassis drive bays, then the supercap holder is already present under the system fan cages. If you plan to add 3.5-inch mid-chassis drive bays by adding ThinkSystem SR650 V3 Middle 4x3.5" SAS/SATA Backplane Option Kit (4XH7A82916), then the supercap holder is part of the option kit.

7mm drives

The SR650 V3 supports two 7mm drives, either both SATA or both NVMe, at the rear of the server. These drives go in place of either PCIe slot 3 (Riser 1) or PCIe slot 6 (Riser 2) as shown in the following figure.

Figure 16. Rear 7mm drive bay configurations

For CTO orders, the configuration includes the drive bays and the cage the the drive bays are mounted on. The cage required depends on where the 7mm drives are located (Riser 1 or Riser 2) and whether there are PCIe slots above the 7mm drive bays. The following table lists the ordering information.

Table 44. CTO feature code for 7mm drives

Feature code	Description	RAID	Max qty
Backplane - 7mm drives			
BU0N	ThinkSystem 7mm SATA/NVMe 2-Bay Rear Enablement Kit v2	VROC or separate PCIe adapter	1
B8P3	ThinkSystem 2U 7mm Drive Kit w/ NVMe RAID	Integrated (Marvell)	1
BYFG	ThinkSystem 7mm SATA/NVMe 2-Bay Rear Hot-Swap RAID Enablement Kit	Integrated (Broadcom)	1
VROC RAID support for ThinkSystem 7mm SATA/NVMe 2-Bay Rear Enablement Kit v2 (BU0N) (optional)			
BS7U	On Board SATA Software RAID Mode for 7mm (VROC SATA)	-	1
BS7R	Intel VROC (VMD NVMe RAID) Standard for 7mm (VROC NVMe)	-	1
Hardware RAID support for ThinkSystem 7mm SATA/NVMe 2-Bay Rear Enablement Kit v2 (BU0N) (optional; an alternative to VROC)			
BVL2	ThinkSystem RAID 5350-8i for 7MM SATA boot Enablement	Adaptec	1
BW1V	ThinkSystem RAID 5350-8i Internal Adapter for 7MM SATA boot Enablement	Adaptec	
BVL4	ThinkSystem RAID 540-8i for 7MM NVMe boot Enablement	Broadcom	1

The use of the 7mm rear drive bays has the following configuration rules:

- The 7mm rear drive kit is supported in either slot 3 or slot 6 but not both at the same time.
- 7mm drive bays are not supported in configurations with 4x 2.5-inch rear drive bays, as they use the same power connector
- M.2 and 7mm are mutually exclusive: they are not supported together in the same configuration
- For ThinkSystem 7mm SATA/NVMe 2-Bay Rear Enablement Kit v2 (feature BU0N):
 - The 7mm drive bays support either SATA drives or NVMe drives but not both. You specify SATA or NVMe in the configurator using feature codes BTTV (SATA) or BTTW (NVMe).
 - RAID support is implemented using VROC (no adapter needed) or with the use of an additional RAID adapter installed in a slot
 - If RAID is enabled using VROC, select these feature codes:
 - VROC SATA support: On Board SATA Software RAID Mode for 7mm (feature BS7U)
 - VROC NVMe support:
 - Intel VROC (VMD NVMe RAID) Standard for 7mm (feature BS7R)
 - Intel VROC RAID1 Only for 7mm (feature BZ4Y)
 - If RAID is enabled using a RAID adapter, the adapter is installed in any of PCIe slots 1-6:
 - RAID support for 7mm SATA drives requires a RAID 5350-8i adapter (feature BVL2)
 - RAID support for 7mm NVMe drives requires a RAID 540-8i adapter operating in Tri-Mode (feature BVL4)
 - The use of VROC SATA RAID is not supported by virtualization hypervisors such as ESXi, KVM, Xen, and Hyper-V. VROC NVMe RAID is supported by hypervisors, however.
- For ThinkSystem 2U 7mm Drive Kit w/ NVMe RAID (feature B8P3)
 - The adapter only supports NVMe drives
 - RAID functionality is integrated into the 7mm adapter using a Marvell 88NR2241 NVMe RAID Controller
- For ThinkSystem 7mm SATA/NVMe 2-Bay Rear Hot-Swap RAID Enablement Kit (feature BYFG)
 - The adapter supports either SATA or NVMe drives
 - RAID functionality is integrated into the 7mm adapter using a Broadcom RAID Controller

7mm drive field upgrades

For field upgrades, using the following ordering information. The kit includes two cages for use depending on your PCIe slot configuration. The cages are for either Riser 1 or Riser 2.

HW RAID support: The 7mm Enablement Kit part numbers below do not include the RAID adapter optionally used for 7mm HW RAID support. If you wish to enable hardware RAID support for 7mm, you will need to order either the 5350-8i for SATA RAID support or 540-8i for NVMe RAID support. In addition, the 540-8i, once installed, will need to be configured to operate in Tri-mode to enable NVMe RAID.

Table 45. Field upgrade part number for 7mm drives

Part number	Description	Purpose
7mm Enablement Kits		
4XH7A87068	ThinkSystem SR650 V3 7mm SATA/NVMe 2-Bay Non-Raid Enablement Kit <ul style="list-style-type: none"> • 2-bay SATA/NVMe hot-swap drive enclosure • 1x 2FH+7mm SSD Riser cages (with 2 FH PCIe slots) • 7mm SSD Riser Cage (without PCIe slots) • 2x 7mm drive bay fillers • Signal and power cables for onboard connections 	7mm drive bays for SATA or NVMe drive support. Optional RAID support using VROC SATA or VROC NVMe (does not include cables needed for RAID support)
4XH7A88463	ThinkSystem SR650 V3 7mm NVMe 2-Bay RAID Enablement Kit	7mm drive bays for NVMe drive support. RAID support is integrated into the adapter using an onboard Marvell 88NR2241 NVMe RAID controller.
4XH7A93807	ThinkSystem SR650 V3 7mm RAID B540p-2HS SATA/NVMe Enablement Kit	7mm drive bays for NVMe drive support. RAID support is integrated into the adapter using an onboard Broadcom RAID controller.
4X97A90536	ThinkSystem SR650 V3 x4 M.2/7mm CFF RAID Cable Kit	Cable kit when adding 7mm drives and connecting to an internal (CFF) RAID adapter instead of a regular PCIe (SFF) RAID adapter. Requires 4XH7A88465.
RAID adapters for optional 7mm HW RAID support (for use with 4XH7A88465)		
4Y37A72482	ThinkSystem RAID 5350-8i PCIe 12Gb Adapter	RAID adapter for SATA RAID-1 with 2x 7mm SATA drives
4Y37A78834	ThinkSystem RAID 540-8i PCIe Gen4 12Gb Adapter	RAID adapter for NVMe RAID-1 with 2x 7mm NVMe drives <p>Tip: Once the 540-8i adapter is installed, it will need to be configured to operate in Tri-mode to enable NVMe RAID.</p>

M.2 drives

The SR650 V3 supports one or two M.2 form-factor SATA or NVMe drives for use as an operating system boot solution or as additional storage. The M.2 drives install into an M.2 module which is mounted horizontally in the server:

- In servers without mid-chassis drives, the M.2 module is mounted on the air baffle
- With a mid-chassis drive cage (2.5-inch or 3.5-inch), the M.2 module is mounted on the drive cage, as shown in the [Mid drive bays](#) section.

The supported M.2 module is listed in the following table. For field upgrades see the [M.2 field upgrades](#) section below.

Table 46. M.2 modules

Part number	Feature code	Description	SATA drives	NVMe drives	RAID	Maximum supported	Windows 10/11 support
4Y37A79663	BM8X	ThinkSystem M.2 SATA/x4 NVMe 2-Bay Adapter	Yes	Yes (x4 lanes)	VROC or adapter	1	Supported
4Y37A09750	B8P9	ThinkSystem M.2 NVMe 2-Bay RAID Adapter	No	Yes (x1 lane)	Integrated (Marvell)	1	No
4Y37A90063	BYFF	ThinkSystem M.2 RAID B540i-2i SATA/NVMe Adapter	Yes	Yes (x1 lane)	Integrated (Broadcom)	1	Supported

ThinkSystem M.2 SATA/x4 NVMe 2-Bay Adapter (4Y37A79663) optionally supports RAID with the addition of either VROC or a separate RAID adapter. For CTO orders, ordering information is listed in the following table.

Table 47. CTO feature codes to select M.2 RAID (ThinkSystem M.2 SATA/x4 NVMe 2-Bay Adapter only)

Feature code	Description	RAID support	Maximum supported
VROC for M.2 drives (optional, for RAID support)			
BS7Q	On Board SATA Software RAID Mode for M.2 (VROC SATA)	SATA	1
BS7M	Intel VROC (VMD NVMe RAID) Standard for M.2 (VROC NVMe)	NVMe	1
Controllers for RAID support of M.2 drives (optional; an alternative to VROC)			
BVL1	ThinkSystem RAID 5350-8i for M.2 SATA boot Enablement	SATA	1
BW1U	ThinkSystem RAID 5350-8i Internal Adapter for M.2 SATA boot Enablement	SATA	1
BVL3	ThinkSystem RAID 540-8i for M.2 NVMe boot Enablement	NVMe	1

Configuration notes:

- M.2 is not supported with all storage configurations - see [Storage configurations](#) for details.
- M.2 and 7mm are mutually exclusive: they are not supported together in the same configuration
- For field upgrades, an additional cable is needed as described in the [M.2 field upgrades](#) section below
- For ThinkSystem M.2 SATA/x4 NVMe 2-Bay Adapter (4Y37A79663):
 - RAID support is implemented using VROC (no adapter needed) or with the use of an additional RAID adapter installed in a slot
 - If RAID is enabled using VROC, select these feature codes:
 - VROC SATA support: On Board SATA Software RAID Mode for M.2 (feature BS7Q)
 - VROC NVMe support:
 - Intel VROC (VMD NVMe RAID) Standard for M.2 (feature BS7M)
 - Intel VROC RAID1 Only for M.2 (feature BZ4X)
 - If RAID is enabled using a RAID adapter, the adapter is installed in any of PCIe slots 1-6:
 - RAID support for M.2 SATA drives requires a RAID 5350-8i adapter (feature BVL1)
 - RAID support for M.2 NVMe drives requires a RAID 540-8i adapter operating in Tri-Mode (feature BVL3)
 - The adapter is not supported with 3.5-inch mid-chassis drive bays due to physical limitations
 - The use of VROC SATA RAID is not supported by virtualization hypervisors such as ESXi, KVM, Xen, and Hyper-V. VROC NVMe RAID is supported by hypervisors, however.
- For ThinkSystem M.2 NVMe 2-Bay RAID Adapter (4Y37A09750):
 - RAID is implemented using an onboard Marvell 88NR2241 NVMe RAID controller
- For ThinkSystem M.2 RAID B540i-2i SATA/NVMe Adapter (4Y37A90063):
 - RAID is implemented using an onboard Broadcom RAID controller

The ThinkSystem M.2 SATA/x4 NVMe 2-Bay Adapter has the following features:

- Supports one or two M.2 drives, either SATA or NVMe
- When two drives installed, they must be either both SATA or both NVMe
- Support 42mm, 60mm, 80mm and 110mm drive form factors (2242, 2260, 2280 and 22110)
- On the SR650 V3, RAID support is implemented using VROC or a separate RAID adapter
- Either 6Gbps SATA or PCIe 4.0 x4 interface to the drives depending on the drives installed
- Supports monitoring and reporting of events and temperature through I2C
- Firmware update via Lenovo firmware update tools
- When connected to a separate PCIe RAID adapter, supports SED drive encryption via the RAID adapter, otherwise no SED support

The ThinkSystem M.2 NVMe 2-Bay RAID Adapter (4Y37A09750) has the following features:

- Supports one or two NVMe M.2 drives
- Support 42mm, 60mm, 80mm and 110mm drive form factors (2242, 2260, 2280 and 22110)
- RAID support via an onboard Marvell 88NR2241 NVMe RAID Controller
- With 1 drive, supports single-drive RAID-0
- With 2 drives, supports 2-drive RAID-0, 2-drive RAID-1, or two single-drive RAID-0 arrays
- PCIe 3.0 x2 host interface; PCIe 3.0 x1 connection to each drive
- Management and configuration support via UEFI and OS-based tools
- Supports monitoring and reporting of events and temperature through I2C
- Firmware update via Lenovo firmware update tools
- No support for SED drive encryption

The ThinkSystem M.2 RAID B540i-2i SATA/NVMe Adapter (4Y37A90063) has the following features:

- Supports one or two M.2 drives, either SATA or NVMe
- Support 42mm, 60mm, 80mm and 110mm drive form factors (2242, 2260, 2280 and 22110)
- RAID support via an onboard Broadcom SAS3808N RAID Controller
- With 1 drive, supports JBOD
- With 2 drives, supports 2-drive RAID-0, 2-drive RAID-1, or JBOD
- PCIe 4.0 x2 host interface; PCIe 4.0 x1 connection to each drive
- Management and configuration support via UEFI and OS-based tools
- Supports monitoring and reporting of events and temperature
- Firmware update via Lenovo firmware update tools
- Supports SED drive encryption

M.2 field upgrades

For field upgrades, the SR650 V3 also requires an additional M.2 cable kit. Ordering information is listed in the following table.

Table 48. M.2 Cable Kits for field upgrades

Part number	Description	Purpose
M.2 Cable kits		
4X97A82924	ThinkSystem SR650 V3 x4 M.2 SATA/NVMe Non-RAID Cable Kit	Cable kit for ThinkSystem M.2 SATA/x4 NVMe 2-Bay Adapter (4Y37A79663) directly connect to system board (either no RAID, or VROC RAID)
4X97A88464	ThinkSystem SR650 V3 M.2 SATA/x4 NVMe SFF RAID Cable Kit	Cable kit for ThinkSystem M.2 SATA/x4 NVMe 2-Bay Adapter (4Y37A79663) connected to a PCIe RAID adapter
4X97A90536	ThinkSystem SR650 V3 x4 M.2/7mm CFF RAID Cable Kit	Cable kit for ThinkSystem M.2 SATA/x4 NVMe 2-Bay Adapter (4Y37A79663) connected to a Internal (CFF) RAID adapter
4X97A82925	ThinkSystem SR650 V3 M.2 NVMe 2-Bay RAID Cable Kit	Cable kit for ThinkSystem M.2 NVMe 2-Bay RAID Adapter (4Y37A09750)
4X97A93808	ThinkSystem SR650 V3/SR655 V3 M.2 RAID B540i-2i SATA/NVMe Cable Kit	Cable kit for ThinkSystem M.2 RAID B540i-2i SATA/NVMe Adapter (4Y37A90063)
RAID adapters for M.2 RAID support (4Y37A79663 only)		
4Y37A72482	ThinkSystem RAID 5350-8i PCIe 12Gb Adapter	RAID adapter to provide M.2 SATA RAID support
4Y37A78834	ThinkSystem RAID 540-8i PCIe Gen4 12Gb Adapter	RAID adapter to provide M.2 NVMe support using Tri-Mode Tip: Once the 540-8i adapter is installed, it will need to be configured to operate in Tri-mode to enable NVMe RAID.

SED encryption key management with SKLM

The server supports self-encrypting drives (SEDs) as listed in the [Internal drive options](#) section. To effectively manage a large deployment of these drives in Lenovo servers, IBM Security Key Lifecycle Manager (SKLM) offers a centralized key management solution.

The IBM Security Key Lifecycle Manager software is available from Lenovo using the ordering information listed in the following table.

Table 49. IBM Security Key Lifecycle Manager licenses

Part number	Feature	Description
SKLM Basic Edition		
7S0A007FWW	S874	IBM Security Key Lifecycle Manager Basic Edition Install License + SW Subscription & Support 12 Months
7S0A008VWW	SDJR	IBM Security Key Lifecycle Manager Basic Edition Install License + SW Subscription & 3 Years Of Support
7S0A008WWW	SDJS	IBM Security Key Lifecycle Manager Basic Edition Install License + SW Subscription & 4 Years Of Support
7S0A008XWW	SDJT	IBM Security Key Lifecycle Manager Basic Edition Install License + SW Subscription & 5 Years Of Support
SKLM For Raw Decimal Terabyte Storage

7S0A0098WW	SDK4	IBM Security Key Lifecycle Manager For Usable Decimal Petabyte Storage Resource Value Unit License + SW Subscription & 4 Years Of Support
7S0A0099WW	SDK5	IBM Security Key Lifecycle Manager For Usable Decimal Petabyte Storage Resource Value Unit License + SW Subscription & 5 Years Of Support

Controllers for internal storage

The SR650 V3 offers a variety of controller options for internal drives:

- For 2.5-inch and 3.5-inch drives:
 - Onboard SATA ports with software RAID support (Intel VROC SATA RAID, formerly known as Intel RSTe)
 - Onboard NVMe ports with software RAID support (Intel VROC NVMe RAID)
 - RAID adapters and HBAs for SAS/SATA drives (PCIe slot-based)
 - RAID adapters and HBAs for SAS/SATA drives (cabled in a dedicated space)
- For 7mm drive bays in the rear of the server (see the [7mm drives](#) section)
 - SATA controller integrated into the 7mm drive bay enclosure
 - NVMe controller integrated into the 7mm drive bay enclosure (Intel VROC for RAID)
- For M.2 drives internal to the server (see [M.2 drives](#) section)
 - SATA controller integrated on the M.2 adapters
 - NVMe controller integrated on the M.2 adapters (Intel VROC for RAID)

As well as supporting RAID adapters and HBAs that install in a PCIe slot, the SR650 V3 with 2.5-inch front drive bays supports a custom form factor (CFF) adapter that is mounted in the server and cabled to one of the onboard NVMe ports. CFF adapters are not supported with 3.5-inch front drives due to a lack of physical space.

The following table lists the adapters used for the internal storage of the server.

Table 50. Internal Storage adapter support

Part number	Feature code	Description	RAID levels	Maximum supported	Slots supported	Windows 10/11 support
Onboard SATA - Intel VROC SATA RAID (Intel RSTe)						
None	AVV0	On Board SATA Software RAID Mode	See VROC	1	Not applicable	Supported
Onboard NVMe - Intel VROC NVMe RAID						
None	BR9B	Intel VROC (VMD NVMe RAID) Standard (supports RAID 0, 1, 10 for all brands of drives)	See VROC	1	Not applicable	Supported
4L47A39164	B96G	Intel VROC (VMD NVMe RAID) Premium (license upgrade - to enable RAID-5 support)	See VROC	1	Not applicable	Supported
12Gb SAS/6Gb SATA HBA - Adaptec PCIe 3.0						
4Y37A72480	BJHH**	ThinkSystem 4350-8i SAS/SATA 12Gb HBA	None	4	1,2,3,4,5,6	No
4Y37A72481	BJHJ	ThinkSystem 4350-16i SAS/SATA 12Gb HBA	None	2	1,2,3,4,5,6	No
24Gb SAS/6Gb SATA HBA - Adaptec PCIe 4.0						
4Y37A97938	C6UL	ThinkSystem 4450-16i SAS/SATA PCIe Gen4 24Gb HBA	None	2	1,2,3,4,5,6	Supported
12Gb SAS/6Gb SATA HBA - Broadcom PCIe 4.0						
4Y37A78601	BM51	ThinkSystem 440-8i SAS/SATA PCIe Gen4 12Gb HBA	None	4	1,2,3,4,5,6	No
4Y37A78602	BM50	ThinkSystem 440-16i SAS/SATA PCIe Gen4 12Gb HBA	None	2	1,2,3,4,5,6	No
4Y37A09725	B8P1	ThinkSystem 440-16i SAS/SATA PCIe Gen4 12Gb Internal HBA	None	1	CFF bay	No
12Gb SAS/6Gb SATA RAID Adapters - Adaptec PCIe 3.0						
4Y37A72482	BJHK	ThinkSystem RAID 5350-8i PCIe 12Gb Adapter	0, 1, 10, 5	4	1,2,3,4,5,6	Supported
4Y37A84028	BRQV	ThinkSystem RAID 5350-8i PCIe 12Gb Internal Adapter	0, 1, 10, 5	1	CFF bay	Supported
4Y37A72483	BJHL	ThinkSystem RAID 9350-8i 2GB Flash PCIe 12Gb Adapter	0, 1, 10, 5, 50, 6, 60, 1 Triple, 10 Triple	4	1,2,3,4,5,6	Supported
4Y37A72484	BJHM	ThinkSystem RAID 9350-8i 2GB Flash PCIe 12Gb Internal Adapter	0, 1, 10, 5, 50, 6, 60, 1 Triple, 10 Triple	1	CFF bay	Supported
4Y37A72485	BJHN	ThinkSystem RAID 9350-16i 4GB Flash PCIe 12Gb Adapter	0, 1, 10, 5, 50, 6, 60, 1 Triple, 10 Triple	2	1,2,3,4,5,6	Supported

Part number	Feature code	Description	RAID levels	Maximum supported	Slots supported	Windows 10/11 support

12Gb SAS/6Gb SATA expander						
4Y37A09736	B8P6	ThinkSystem 48 port 12Gb Internal Expander	None	1	CFF bay	Supported
NVMe using Tri-Mode (NVMe x1) (no support for NVMe U.2 drives)						
4Y37A09728	BGM1	ThinkSystem RAID 940-8i 4GB Flash PCIe Gen4 12Gb Adapter for U.3	0, 1, 10, 5, 50, 6, 60	3	1,2,3,4,5,6	Supported
4Y37A09729	BGM0	ThinkSystem RAID 940-8i 8GB Flash PCIe Gen4 12Gb Adapter for U.3	0, 1, 10, 5, 50, 6, 60	3	1,2,3,4,5,6	Supported
4Y37A78600	BM36	ThinkSystem RAID 940-16i 4GB Flash PCIe Gen4 12Gb Adapter for U.3	0, 1, 10, 5, 50, 6, 60	1	1,2,3,4,5,6	Supported
4Y37A09730	BDY4	ThinkSystem RAID 940-16i 8GB Flash PCIe Gen4 12Gb Adapter for U.3	0, 1, 10, 5, 50, 6, 60	1	1,2,3,4,5,6	Supported
4Y37A97935	CBMY	ThinkSystem RAID 9450-8i 4GB Flash PCIe Gen4 24Gb Adapter for U.3	0, 1, 10, 5, 50, 6, 60, 1 Triple, 10 Triple	4	1,2,3,4,5,6	Supported
4Y37A97937	CBMZ	ThinkSystem RAID 9450-16i 8GB Flash PCIe Gen4 24Gb Adapter for U.3	0, 1, 10, 5, 50, 6, 60, 1 Triple, 10 Triple	2	1,2,3,4,5,6	Supported

Part number	Feature code	Description	RAID levels	Maximum supported	Slots supported	Windows 10/11 support
NVMe using x4 interface						
4C57A65446	B98C	ThinkSystem 4-Port PCIe Gen4 NVMe Retimer Adapter (4x drives)	None	4	1,2,3,4,5,6	Supported
4TA7A84579	BLKY	ThinkSystem PCIe Gen5 NVMe Retimer Adapter (4x drives)	None	4	1,2,3,4,5,6	Supported

* Only supported with 2.5-inch front drive bays. Not supported in configurations with 3.5-inch front drive bays.

‡ Internal adapters (CFF) do not occupy any of the rear slots.

** This adapter is currently not available for CTO orders; it is only available as an option part number for field upgrades

Configuration notes:

- **Supercap support limits the number of RAID adapters installable**: RAID 9350 and 940 adapters include a power module (supercap) to power the flash memory. The server supports between 1 and 4 supercaps depending on the server configuration as described in the [RAID flash power module \(supercap\) support](#) section. The number of supercaps supported also determines the maximum number of RAID adapters with flash that can be installed in the server.
- **Field upgrades**: If you are adding a RAID adapter with supercap to the server as a field upgrade, you may need a supercap holder as described in the [RAID flash power module \(supercap\) support](#) section.
- **7mm drive support**: The storage adapters listed in the table below do *not* provide connectivity to the 7mm drive bays that are optionally available at the rear of the server. The 7mm drives have their own independent RAID controller. See the [7mm drives](#) section for details.
- **E810 Ethernet and X350 RAID/HBAs**: The use of both an Intel E810 network adapter and an X350 HBA/RAID adapter (9350, 5350 and 4350) is supported, however E810 firmware CVL4.3 or later is required. For details, see [Support Tip HT513226](#).

The following rules apply to the X450 (4450, 5450 and 9450) HBA and RAID adapters:

- The X450 adapters support 24Gb SAS, however 24Gb backplanes and 24Gb SAS drives are required
 - See the backplanes table in the [Internal storage](#) section to see which backplanes support 24Gb SAS
 - If a 12Gb backplane is used, then the X450 adapters will only operate at up to 12Gb SAS
 - 12Gb SAS drives will operate at up to 12Gb
 - SATA drives will operate at up to 6Gb
- The 4450 and 5450 adapters only support SAS/SATA drives; NVMe drives are not supported
- All 9450 adapters support Tri-Mode, with support for SAS, SATA, and NVMe U.3 drives. Tri-Mode connects to NVMe drives using a x1 connection.
- For specific adapter/backplane support in the SR650 V3, see the [Storage configurations](#) section.
- 9450-8i NVMe support:
 - U.3 NVMe drives, with a x1 interface per drive, up to 8 drives (Tri-Mode)
 - No support for U.2 drives
- 9450-16i NVMe support:
 - U.3 NVMe drives, with a x1 interface per drive, up to 16 drives (Tri-Mode)
 - No support for U.2 drives
- Only the following NVMe drive families are supported with the 9450 adapters:
 - PM1733a Read Intensive family except 1.92TB and 30.72TB drive
 - PM1743 Read Intensive family
 - PM9A3 Read Intensive family except 15.36TB
 - PS1010 Read Intensive family
 - 6500 ION Read Intensive family
 - P5800X Write Intensive family

- 7500 PRO Read Intensive family

The onboard SATA controller has the following features:

- Controller integrated into the Intel PCH
- 6 Gbps SATA host interface
- Supports up to 14x SATA drives
- Supports RAID-0, 1, 5, 10 (Intel VROC SATA RAID, previously known as RSTe)
- Supports JBOD
- Supports HDDs and SSDs; can be mixed

The onboard NVMe support has the following features:

- Controller integrated into the Intel processor
- Supports up to 20x NVMe drives direct connected to onboard ports; additional drives through retimer/switch adapters
- Each drive has PCIe 5.0 x4 host interface
- Supports JBOD - Intel and non-Intel NVMe SSDs
- Supports RAID-0, 1, 10 on Intel and non-Intel NVMe SSDs - Intel VROC Standard
- VROC Premium adds RAID-5 support on Intel and non-Intel NVMe SSDs

Tri-Mode support - RAID 940 and RAID 9450 adapters

The RAID 940 and RAID 9450 adapters support NVMe through a feature named Tri-Mode support (or Trimode support). This feature enables the use of NVMe U.3 drives at the same time as SAS and SATA drives. Tri-Mode requires an AnyBay backplane. Cabling of the controller to the backplanes is the same as with SAS/SATA drives, and the NVMe drives are connected via a PCIe x1 link to the controller.

NVMe drives connected using Tri-Mode support provide better performance than SAS or SATA drives: A SATA SSD has a data rate of 6Gbps, a SAS SSD has a data rate of 12Gbps, whereas an NVMe U.3 Gen 4 SSD with a PCIe x1 link will have a data rate of 16Gbps. NVMe drives typically also have lower latency and higher IOPS compared to SAS and SATA drives. Tri-Mode is supported with U.3 NVMe drives and requires an AnyBay backplane.

Tri-Mode requires U.3 drives: Only NVMe drives with a U.3 interface are supported. U.2 drives are not supported. See the [Internal drive options](#) section for the U.3 drives supported by the server.

Intel VROC onboard RAID

Intel VROC (Virtual RAID on CPU) is a feature of the Intel processor that enables Integrated RAID support.

There are two separate functions of VROC in the SR650 V3:

- Intel VROC SATA RAID, formerly known as Intel RSTe
- Intel VROC NVMe RAID

VROC SATA RAID (RSTe) is available and supported with all SATA drives. It offers a 6 Gb/s connection to each drive and on the SR650 V3 implements RAID levels 0, 1, 5, and 10. RAID 1 is limited to 2 drives per array, and RAID 10 is limited to 4 drives per array. Hot-spare functionality is also supported.

VROC NVMe RAID offers RAID support for any NVMe drives directly connected to the ports on the server's system board or via adapters such as NVMe retimers or NVMe switch adapters. On the SR650 V3, RAID levels implemented are based on the VROC feature selected as indicated in the following table. RAID 1 is limited to 2 drives per array, and RAID 10 is limited to 4 drives per array. Hot-spare functionality is also supported.

Performance tip: For best performance with VROC NVMe RAID, the drives in an array should all be connected to the same processor. Spanning processors is possible however performance will be unpredictable and should be evaluated based on your workload.

The SR650 V3 supports the VROC NVMe RAID offerings listed in the following table.

Tip: These feature codes and part numbers are only for VROC RAID using NVMe drives, not SATA drives

Table 51. Intel VROC NVMe RAID ordering information and feature support

Part number	Feature code	Description	Intel NVMe SSDs	Non-Intel NVMe SSDs	RAID 0	RAID 1	RAID 10	RAID 5
4L47A92670	BZ4W	Intel VROC RAID1 Only	Yes	Yes	No	Yes	No	No
4L47A83669	BR9B	Intel VROC (VMD NVMe RAID) Standard	Yes	Yes	Yes	Yes	Yes	No
4L47A39164	B96G	Intel VROC (VMD NVMe RAID) Premium	Yes	Yes	Yes	Yes	Yes	Yes

Configuration notes:

- If a feature code is ordered in a CTO build, the VROC functionality is enabled in the factory. For field upgrades, order a part number and it will be fulfilled as a Feature on Demand (FoD) license which can then be activated via the XCC management processor user interface.
- Intel VROC NVMe is supported on all Intel Xeon Scalable processors

Virtualization support: Virtualization support for Intel VROC is as follows:

- **VROC SATA RAID (RSTe):** VROC SATA RAID is supported with Windows, RHEL and SLES, however it is not supported by virtualization hypervisors such as ESXi, KVM, Xen, and Hyper-V. Virtualization is only supported on the onboard SATA ports in AHCI (non-RAID) mode.
- **VROC (VMD) NVMe RAID :** VROC (VMD) NVMe RAID is supported by ESXi, KVM, Xen, and Hyper-V. ESXi support is limited to RAID 1 only; other RAID levels are not supported. Windows and Linux OSes support VROC RAID NVMe, both for host boot functions and for guest OS function, and RAID-0, 1, 5, and 10 are supported. On ESXi, VROC is supported with both boot and data drives.

For specifications about the RAID adapters and HBAs supported by the SR650 V3, see the ThinkSystem RAID Adapter and HBA Comparison, available from:

<https://lenovopress.com/lp1288-lenovo-thinksystem-raid-adapter-and-hba-reference#sr650-v3-support=SR650%2520V3>

For details about these adapters, see the relevant product guide:

- SAS HBAs: <https://lenovopress.com/servers/options/hba>
- RAID adapters: <https://lenovopress.com/servers/options/raid>

Internal drive options

The following tables list the drive options for internal storage of the server.

2.5-inch hot-swap drives:

- 2.5-inch hot-swap 12 Gb SAS HDDs
- 2.5-inch hot-swap 24 Gb SAS SSDs
- 2.5-inch hot-swap 6 Gb SATA SSDs
- 2.5-inch hot-swap PCIe 5.0 NVMe SSDs
- 2.5-inch hot-swap PCIe 4.0 NVMe SSDs

2.5-inch 7mm hot-swap drives:

- 7mm 2.5-inch hot-swap 6 Gb SATA SSDs
- 7mm 2.5-inch hot-swap PCIe 4.0 NVMe SSDs

3.5-inch hot-swap drives:

- 3.5-inch hot-swap 12 Gb SAS HDDs
- 3.5-inch hot-swap 6 Gb SATA HDDs
- 3.5-inch hot-swap 24 Gb SAS SSDs
- 3.5-inch hot-swap 6 Gb SATA SSDs
- 3.5-inch hot-swap PCIe 4.0 NVMe SSDs

M.2 drives:

- M.2 SATA drives
- M.2 PCIe 4.0 NVMe drives

M.2 drive support: The use of M.2 drives requires an additional adapter as described in the [M.2 drives](#) subsection.

SED support: The tables include a column to indicate which drives support SED encryption. The encryption functionality can be disabled if needed. Note: Not all SED-enabled drives have "SED" in the description.

Table 52. 2.5-inch hot-swap 12 Gb SAS HDDs

Part number	Feature code	Description	SED support	Max Qty
2.5-inch hot-swap HDDs - 12 Gb SAS 15K

USB flash drive

For general portable storage needs, the server also supports the USB flash drive option that is listed in the following table.

Table 68. USB memory key

Part number	Feature	Description
4X77A77065	BNWN	ThinkSystem USB 32GB USB 3.0 Flash Drive

Internal backup units

The server does not support any internal backup units, such as tape drives or RDX drives. External backup units are available as described in the [External backup units](#) section.

Optical drives

The server supports the external USB optical drive listed in the following table.

Table 69. External optical drive

Part number	Feature code	Description
7XA7A05926	AVV8	ThinkSystem External USB DVD RW Optical Disk Drive

The drive is based on the Lenovo Slim DVD Burner DB65 drive and supports the following formats: DVD-RAM, DVD-RW, DVD+RW, DVD+R, DVD-R, DVD-ROM, DVD-R DL, CD-RW, CD-R, CD-ROM.

I/O expansion

The SR650 V3 supports a total of up to 12x PCIe slots, 10x at the rear and 2x at the front, plus 1x OCP 3.0 SFF slot for networking. The OCP slot can be either at the front or at the rear (but not both). Slot availability is based on riser selection and drive bays configured. The use of some slots requires that both processors be installed as listed below.

Topics in this section:

- [Slot layout and connections](#)
- [Ordering information](#)
- [Serial port](#)
- [Slot field upgrades](#)
- [OCP slot filler](#)

Slot layout and connections

The rear slots are provided by riser cards:

- Riser 1: Slots 1, 2 and 3, all full-height slots (connect to CPU 1)
- Riser 2: Slots 4, 5, and 6, all full-height slots (connect to CPU 2)
- Riser 3: Slot 7 and 8
 - When configured as Riser 3 only, where slots 7 and 8 are full-height slots:
 - Slot 7 connects to CPU 1
 - Slot 8 connects to CPU 2 (for a 2-socket server) or to CPU 1 (for a 1-socket server)
 - When configured as Riser 3+Riser 4, where slots 7 and 8 are low-profile slots:
 - Both slots connect to CPU 1
- Riser 4: Slots 9 and 10, both low-profile slots (connect to CPU 2)

The rear of the server also contains an OCP 3.0 slot, numbered as Slot 13 (connects to CPU 1).

Riser 3 support with onboard NVMe: When Riser 3 is configured, the use of the onboard NVMe connections is supported up to 12x NVMe drives. Two 8-bay backplanes are required, with 4 bays unused. A quantity of 16x or more NVMe drives requires the use of an adapter if Riser 3 is configured.

The slots in each riser are either PCIe x16 or PCIe x8 depending on the riser card selected as listed in the table below. All x8 slots are open-ended and physically support x16 adapters. Depending on the risers selected, slots are either PCIe 5.0 or PCIe 4.0. The OCP slot has a PCIe 5.0 x16 host interface when located at the rear of the server or PCIe 4.0 x16 when located at the front of the server.

The SR650 V3 also supports front-accessible PCIe slots: 2x PCIe 4.0 x16 slots plus a dedicated OCP 3.0 SFF slot with PCIe 4.0 interface for networking. Front-accessible slots are as follows:

- Slot 11: PCIe 4.0 x16 FHHL (connects to CPU 2)
- Slot 12: PCIe 4.0 x16 FHHL (connects to CPU 1)
- Front OCP slot (slot 14): PCIe 4.0 x16 (connects to CPU 1)

OCP slot: When front slots are configured, the rear OCP slot is disconnected and cannot be used.

As discussed in the [Internal storage](#) section, the server supports drive bays in the rear of the server. Depending on the drive bays selected, the number of slots available for adapters is reduced. The figure below shows the supported combinations of slots and drive bays.

Internal HBA/RAID adapter: For configurations with 2.5-inch front drive bays, an internal RAID adapter or HBA can be installed in a dedicated space and cabled to a PCIe x8 connector, thereby freeing up a slot for other purposes.

The following figure shows the locations of the rear-accessible slots for each configuration selection. The OCP slot is located in the lower-left corner.

Figure 17. SR650 V3 rear slot configurations

The following figure shows the locations of the front-accessible slots.

Figure 18. SR650 V3 front slots

Ordering information

The following table lists the riser cards available for CTO builds and for field upgrades.

No slots: It is also possible to build a configuration without any slots, in which case slot fillers will be derived in the configurator. Slots can be added later as field upgrades using option part numbers as listed in the table.

	BTMS†	ThinkSystem V3 2U PCIe Gen5 Riser 3/4-part 2 for Rear 10 slots			Gen5 x8	Gen4 x8	2x PCIe x8 slots (Gen 5, Gen4)
Front Riser			Slot 11	Slot 12			
CTO only	BQ2X	ThinkSystem V3 2U Front x16/x16 PCIe G4 Riser	Gen4 x16	Gen4 x16			2x PCIe 4.0 x16 front-accessible slots

* All PCIe x8 slots are open ended and will physically support x16 adapters

† In the configurator, when feature BQ2W is selected, BTMS is automatically derived and provides slots 9 & 10. 4XH7A86662 contains both risers. (Note: see the configuration rule below regarding the front drive bay support for 10x rear slots)

Configuration rules:

- For best performance, install PCIe 5.0 adapters in PCIe 5.0 (Gen5) slots
- The server only supports one OCP slot, either in the rear of the server or the front of the server, not both
- The use of Riser 3 is mutually exclusive to onboard NVMe support as they use the same PCIe connectors.
- Only the following drive bay configurations at the front of the server support the use of 10x rear slots (risers 1, 2, 3 and 4). These correspond to storage configs 9, 12, 14, 41, 31, 33, 35, 39, 40. All other configurations may require special bid support.
 - 8x 2.5-inch SAS/SATA
 - 8x 2.5-inch AnyBay
 - 16x 2.5-inch SAS/SATA
 - 16x 2.5-inch AnyBay
- If you configure Riser 3 using a x16/x16 FH riser (feature BLL9 or BPKG) with only 1 processor installed,

Slot 7 will be connected with x16 lanes, however Slot 8 will not be connected. If you later install the second processor as a field upgrade, you will need to order the necessary cable kit (4X97A82946 or 4X97A82944) to enable Slot 8. See [Slot field upgrades](#) for information.

- With only 1 processor installed, Riser 3 can only be enabled using a x8/x8 FH riser (feature BPKH or BPKF)
- If you want to configure 4x low profile slots for slots 7-10, select feature BQ2W which provides riser 3 (slots 7, 8). Feature BTMS will then be automatically derived to provide riser 4 (slots 9 & 10), along with the necessary cables. Option part number 4XH7A86662 contains both of these risers and the cables.
- The following vRAN processors have fewer PCIe lanes (see the [Processor features](#) section) and therefore do not support Riser 3. They are also 1-socket processors, so they also don't support Riser 2. Only Riser 1 and the OCP slot are supported.
 - Intel Xeon Gold 5423N 20C 145W 2.1GHz Processor
 - Intel Xeon Gold 5433N 20C 160W 2.3GHz Processor
 - Intel Xeon Gold 6403N 24C 185W 1.9GHz Processor
 - Intel Xeon Gold 6423N 28C 195W 2.0GHz Processor
 - Intel Xeon Gold 6433N 32C 205W 2.0GHz Processor
 - Intel Xeon Gold 6443N 32C 195W 1.6GHz Processor
- If you want to add both a 7mm drive enclosure plus 2x PCIe slots above it, you will need to order the 7mm drive option (either 4XH7A85898 or 4XH7A85899) plus the x16/x16/E riser kit (4XH7A82900 for PCIe Gen 5 or 4XH7A82892 for Gen 4). The riser kit part number provides the 2-slot riser card.
- All PCIe x8 slots are open ended and will physically support x16 adapters

Serial port

The SR650 V3 optionally supports a RS-232 serial port by adding a COM port bracket to either slot 3 or slot 6. Ordering information is shown in the following table.

Front PCIe slots: The serial port is not supported in the front PCIe slots

Table 71. Serial port

Part number	Feature code	Description	Max quantity	Slots supported
4X97A82921	BMNJ	ThinkSystem V2/V3 1U COM Port Upgrade Kit	1	3, 6

Configuration rules:

- If double-wide GPUs are installed, the serial port is only supported in slot 6 due to a cable length limitation.

The bracket is shown in the following figure. The option part number includes both Low Profile and Full Height brackets.

Figure 19. ThinkSystem COM Port Upgrade Kit v2

Slot field upgrades

Slot configurations can also be ordered as field upgrades using option part numbers, as listed in the following table.

Table 72. Slot field upgrades

Part number	Description
Riser 1 and Riser 2 field upgrades - PCIe Gen5	
4XH7A82898	ThinkSystem V3 2U x16/x8/x8 PCIe Gen5 Riser 1/2 Option Kit
4XH7A82900	ThinkSystem V3 2U x16/x16/E PCIe Gen5 Riser 1/2 Option Kit

Riser 1 and Riser 2 field upgrades - PCIe Gen4	
4XH7A82896	ThinkSystem V3 2U x16/x8/x8 PCIe Gen4 Riser 1/2 Option Kit
4XH7A82892	ThinkSystem V3 2U x16/x16/E PCIe Gen4 Riser 1/2 Option Kit
4XH7A82894	ThinkSystem V3 2U E/x16/x16 PCIe Gen4 Riser 1/2 Option Kit
4XH7A82890	ThinkSystem V3 2U x16 PCIe Gen4 Riser 1/2 Option Kit
Riser 3 and 4 field upgrades - PCIe Gen5	
4XH7A82906	ThinkSystem SR650 V3 x8/x8 PCIe Gen5 Riser3 Option Kit (To support Riser 3 when 2 processors are installed)
4XH7A82907	ThinkSystem SR650 V3 x16/x16 PCIe Gen5 Riser3 Option Kit
4XH7A86662	ThinkSystem V3 2U PCIe Gen5 Riser 3/4-part 2 for Rear 10 slots
4XH7A87512	ThinkSystem Single Processor SR650 V3 x8/x8 PCIe Gen5 Riser3 Kit (To support Riser 3 when only 1 processor is installed)
4X97A82946	ThinkSystem 2nd Processor Upgrade SR650 V3 PCIe Gen5 Riser3 Cable Kit (For use when adding a second processor to the server, to enable all Riser 3 slots; replaces existing Riser 3 cabling)
Riser 3 and 4 field upgrades - PCIe Gen4	
4XH7A82904	ThinkSystem SR650 V3 x8/x8 PCIe Gen4 Riser3 Option Kit (To support Riser 3 when 2 processors are installed)
4XH7A82905	ThinkSystem SR650 V3 x16/x16 PCIe Gen4 Riser3 Option Kit
4XH7A87511	ThinkSystem Single Processor SR650 V3 x8/x8 PCIe Gen4 Riser3 Kit (To support Riser 3 when only 1 processor is installed)
4X97A82944	ThinkSystem 2nd Processor Upgrade SR650 V3 PCIe Gen4 Riser3 Cable Kit (For use when adding a second processor to the server, to enable all Riser 3 slots; replaces existing Riser 3 cabling)

OCP slot filler

If customers or partners remove an OCP adapter from the server, we recommend that a slot cover (slot filler) be installed in its place to ensure proper airflow in the server. Ordering information is listed in the following table.

Tip: For CTO orders and preconfigured models, slot fillers are automatically installed in slots where an OCP adapter is not installed.

Table 73. OCP slot filler

Part number	Description
4XF7B06188	ThinkSystem OCP3 FILLER

Network adapters

The server has a dedicated OCP 3.0 SFF slot with a PCIe x16 host interface. See [Figure 3](#) for the location of the OCP slot. When located at the rear of the server, the OCP slot operates at PCIe 5.0 speed (once PCIe 5.0 OCP adapters are supported); when located at the front of the server, the OCP slot operates at PCIe 4.0 speed.

The following table lists the supported OCP adapters. One port can optionally be shared with the XCC management processor for Wake-on-LAN and NC-SI support. Only 1 OCP card can be installed in the server, either rear-accessible or front-accessible.

Table 74. Supported OCP adapters

Part number	Feature code	Description	Maximum supported	Windows 10/11 support
Gigabit Ethernet				
4XC7A08235	B5T1	ThinkSystem Broadcom 5719 1GbE RJ45 4-port OCP Ethernet Adapter	1	Supported
4XC7A88428	BW97	ThinkSystem Intel I350 1GbE RJ45 4-Port OCP Ethernet Adapter V2	1	Supported
4XC7A08277	B93E	ThinkSystem Intel I350 1GbE RJ45 4-port OCP Ethernet Adapter	1	Supported
10 Gb Ethernet - 10GBASE-T				
4XC7A95696	C4GB	ThinkSystem Broadcom 57412 10GBase-T 4-Port OCP Ethernet Adapter	1	Supported
4XC7A08236	B5ST	ThinkSystem Broadcom 57416 10GBASE-T 2-port OCP Ethernet Adapter	1	Supported
4XC7A08278	BCD5	ThinkSystem Intel X710-T2L 10GBASE-T 2-port OCP Ethernet Adapter	1	Supported
4XC7A80268	BPPY	ThinkSystem Intel X710-T4L 10GBase-T 4-Port OCP Ethernet Adapter	1	Supported
25 Gb Ethernet				
4XC7A08237	BN2T	ThinkSystem Broadcom 57414 10/25GbE SFP28 2-Port OCP Ethernet Adapter	1	Supported
4XC7A80567	BPPW	ThinkSystem Broadcom 57504 10/25GbE SFP28 4-Port OCP Ethernet Adapter	1	Supported

* Field upgrades require power cable 4X97B02426.

‡ Requires a PCIe Gen4 riser; Not supported in a PCIe Gen5 riser

When adding ThinkSystem NVIDIA BlueField-3 B3220 VPI QSFP112 2P 200G PCIe Gen5 x16 Adapter (4XC7A87752) as a field upgrade, the power cable listed in the following table will also need to be ordered.

Table 76. Power cable for BlueField-3 B3220 DPU

Part number	Feature code	Description
4X97B02426	C70D	ThinkSystem V3 2U BlueField-3 B3220 Power Cable Kit

For more information, including the transceivers and cables that each adapter supports, see the list of Lenovo Press Product Guides in the Networking adapters category:

<https://lenovopress.com/servers/options/ethernet>

Configuration requirements:

- Adapters with a x16 host interface require a x16 slot to maximize performance
- PCIe Gen5 adapters will require a Gen5 riser to maximize performance
- **E810 Ethernet and X350 RAID/HBAs:** The use of both an Intel E810 network adapter and an X350 HBA/RAID adapter (9350, 5350 and 4350) is supported, however E810 firmware CVL4.3 or later is required. For details, see [Support Tip HT513226](#).

BlueField-2 DPU support

The SR650 V3 supports DPUs for VMware Cloud Foundation using the NVIDIA BlueField-2 Data Processing Unit (DPU). This solution provides zero-trust security and accelerate workloads by improving performance with increased throughput and lower latency by offloading NSX Firewall rules applied at the DPU compute layer thereby making data center applications more efficient.

In addition to these key features, the SR650 V3 now supports up to 2x NVIDIA BlueField-2 Data Processing Units (DPUs) that provides:

- High Availability and Redundancy - Customers can configure the DPUs in an Active-Standby state to enhance redundancy. In this mode, if the active DPU fails, all traffic seamlessly fails over to the standby DPU, ensuring that there is no disruption in service. This configuration is perfect for mission-critical applications where uptime is paramount.
- Enhanced Performance - Both DPUs operate independently, providing maximum throughput. This configuration is ideal for environments where performance is critical, as it takes full advantage of the increased bandwidth with twice the capacity.

Support for BlueField-2 DPUs is available in CTO builds using the following DPU-specific models:

- 7D76CTO4WW and 7D76CTOGWW (3-year warranty)
- 7D75CTO4WW (1-year warranty)

BlueField-3 support: These CTO models are *not* required for BlueField-3 DPUs.

The DSE solution comprises of two primary components:

- NVIDIA BlueField-2 full-height half-length (FHHHL) PCIe adapter (feature BRPK)
- OCP adapter to provide the necessary NC-SI connectivity to the XCC management processor of the server (feature BSH7)

The NVIDIA Bluefield-2 DPU has 8x ARM processor cores, 32GB onboard DDR4 ECC memory, and 2x 25GbE SFP56 ports. The purpose-built hardware-acceleration engines, embedded crypto and secure boot capabilities, and a software stack powered by the NVIDIA DOCA framework provide breakthrough data center performance, efficiency and security for software-defined storage, networking, and management of workloads.

Ordering information is listed in the following table. Both components are required.

Table 77. Ordering information for CTO orders

Part number	Feature code	NVIDIA part number	Description	Quantity
CTO only	BRPK*	MBF2H532C-AECOT	ThinkSystem NVIDIA BlueField-2 25GbE SFP56 2-Port PCIe Ethernet DPU w/BMC & Crypto	1 or 2
CTO only	BSH7*	-	ThinkSystem OCP Enablement Kit for Distributed Services Engine	1

* These adapters are only available CTO and only available using DPU-specific CTO model numbers

If you have an existing DPU model with only one DPU installed, you can upgrade to a dual-DPU configuration, using the part numbers listed in the following table. Both the adapter and the NC-SI cable are needed.

Note: The part numbers listed in the table below are not generally orderable. Contact your Lenovo sales representative for ordering information.

Table 78. Field upgrades to add a second DPU to an existing DPU model

Part number	Description	Maximum quantity
4XC7B02131	ThinkSystem NVIDIA BlueField-2 25GbE SFP56 2-Port PCIe Ethernet DPU w/BMC & Crypto	1
4X97B02130	ThinkSystem Adapter NC-SI cable, 270mm	1

Configuration notes:

- The DSE solution requires the OCP adapter; as a result, no other OCP networking adapters are supported
- An additional network adapter is required in addition to the BlueField-2 adapter
- Configurations with 1x DPU require VMware vSphere 8.0 U1 or later
- Configurations with 2x DPUs require VMware vSphere 8.0 U3 or later
- VMware must be preloaded on the server
- Part number 4XC7B02131 is for field upgrades only for the DPU-specific CTO models 7D75CTO4WW and 7D76CTO4WW, where the first DPU is already installed
- Part number 4XC7B02131 is not supported in CTO model 7D76CTOGWW.

GPU adapters

This section describes the supported GPUs.

- [GPU part numbers](#)
- [Riser selections for double-wide GPUs](#)
- [GPU Full Length Thermal Option Kit](#)
- [GPU cable kits](#)

GPU part numbers

The SR650 V3 supports the following graphics processing units (GPUs).

Table 79. Supported GPUs

Part number	Feature code	Description	Controlled GPU	Max qty	Slots supported	PCIe width	TDP	Aux power	Windows 10/11 support
Single-wide GPUs									
4X67A84824	BS2C	ThinkSystem NVIDIA L4 24GB PCIe Gen4 Passive GPU	Controlled	8	1 - 8	x16	72W	No	Supported

* When a double-wide GPU is installed in slot 2, 5 or 7, the adjacent slot 1, 4 and 8 respectively is not available
 † Windows Server 2022 does not support more than 16 displays attached to the server

For information about these GPUs, see the ThinkSystem GPU Summary, available at:
<https://lenovopress.com/lp0768-thinksystem-thinkagile-gpu-summary>

For CTO orders, the SR650 V3 also supports the selection of a placeholder for a GPU. This selection results in a "GPU ready" configuration which ensures that the server ships with the components needed for GPU installation (GPU power cables, air ducts, power supplies, fans, etc) without actually including the GPUs themselves. The following table lists the ordering information for CTO orders.

Table 80. GPU-Ready configurations - ordering information

Part number	Feature code	Description
CTO only	BW40	ThinkSystem NVIDIA A4500 GPU-Ready Installation
CTO only	BVLL	ThinkSystem NVIDIA H100 GPU-Ready Installation
CTO only	BW3Z	ThinkSystem NVIDIA L40 GPU-Ready Installation
CTO only	BZUS	ThinkSystem NVIDIA L40S GPU-Ready Installation
CTO only	BP4X	ThinkSystem DW GPU-Ready Installation (for all other supported DW GPUs)

Configuration rules

The following configuration requirements must be met when installing GPUs:

- The table includes a Controlled GPU column. If a GPU is listed as Controlled, that means the GPU is not offered in certain markets, as determined by the US Government. If a GPU is listed as No, that means the GPU is not controlled and is available in all markets.
- GPUs can be configured in CTO orders as follows:
 - A Controlled GPU can only be configured using one of the Base CTO models designated with "for AI", such as 7D76CTO1WW, as listed in the [Models](#) section.
 - A GPU that is not controlled can only be configured using one of the Base CTO models that is *not* named "for AI", such as 7D76CTO1WW, as listed in the [Models](#) section.
- All GPUs installed must be identical
- When a double-wide GPU is installed in slot 2, 5 or 7, the adjacent slot 1, 4 and 8 respectively is not available
- Flash storage adapters are not supported.
- Middle drive bays and Rear drive bays are not supported
- 12x 3.5-inch backplanes are not supported
- The following GPUs are not supported with PCIe Gen 5 risers:
 - ThinkSystem NVIDIA RTX A400 4GB PCIe Gen4 Active GPU, 4X67B03688
 - ThinkSystem NVIDIA RTX A1000 8GB PCIe Gen4 Active GPU, 4X67A96431
 - ThinkSystem NVIDIA T1000 8GB PCIe Active GPU, 4X67A79777
 - ThinkSystem NVIDIA T400 4GB PCIe Active GPU, 4X67A79778
- Some NVIDIA A Series GPUs are available as two feature codes, one with a CEC chip and one without a CEC chip (ones without the CEC chip have "w/o CEC" in the name). The CEC is a secondary Hardware Root of Trust (RoT) module that provides an additional layer of security, which can be used by customers who have high regulatory requirements or high security standards. NVIDIA uses a multi-layered security model and hence the protection offered by the primary Root of Trust embedded in the GPU is expected to be sufficient for most customers. The CEC defeatured products still offer Secure Boot, Secure Firmware Update, Firmware Rollback Protection, and In-Band Firmware Update Disable. Specifically, without the CEC chip, the GPU does not support Key Revocation or Firmware Attestation. CEC and non-CEC GPUs of the same type of GPU can be mixed in field upgrades.

The server supports up to 3x double-wide GPUs, however due to thermal requirements, GPU support is affected by the front drive bay configuration and by ambient temperature:

- With 16x 2.5-inch front drives bays:
 - Up to 3x double-wide GPUs are supported, in slots 2, 5, 7
 - For the NVIDIA A40, H100:
 - The use of 3x GPUs requires ambient temperature no higher than 25°C
 - The use of 2x GPUs (slots 2, 5) requires ambient temperature no higher than 30°C
 - All other GPUs: No ambient temperature restrictions-

- With 24x 2.5-inch front drive bays:
 - Up to 2x double-wide GPUs are supported, in slots 2, 5
 - NVIDIA A40: No support
 - All other GPUs: Ambient temperature no higher than 25°C

For additional GPU requirements, see the Thermal rules page in the User Guide:
https://pubs.lenovo.com/sr650-v3/thermal_rules

Riser selections for double-wide GPUs

When a double-wide GPU is installed in slot 2, 5 or 7, the adjacent slot 1, 4 and 8 respectively is not available. The riser cards listed in the following table are used with double-wide GPUs.

Table 81. Risers needed for double-wide GPUs

Riser	Part number	Feature code	Description
Riser 1 (GPU in slot 2) - PCIe Gen5	4XH7A82902	BPQW	ThinkSystem V3 2U E/x16/x16 PCIe Gen5 Riser1 or 2
Riser 1 (GPU in slot 2) - PCIe Gen4	4XH7A82894	BLKN	ThinkSystem V3 2U G4 E/x16/x16 PCIe Riser1 or 2
Riser 2 (GPU in slot 5) - PCIe Gen5	4XH7A82902	BPQW	ThinkSystem V3 2U E/x16/x16 PCIe Gen5 Riser1 or 2
Riser 2 (GPU in slot 5) - PCIe Gen4	4XH7A82894	BLKN	ThinkSystem V3 2U G4 E/x16/x16 PCIe Riser1 or 2
Riser 3 (GPU in slot 7) - PCIe Gen5	4XH7A82907	BLL9	ThinkSystem V3 2U x16/x16 PCIe Gen5 Riser3 Kit
Riser 3 (GPU in slot 7) - PCIe Gen4	4XH7A82905	BPKG	ThinkSystem V3 2U x16/x16 PCIe Gen4 Riser3 Kit with Cage

GPU Full Length Thermal Option Kit

When installing any full-length GPU as a field upgrade, you will also need to order the GPU Enablement Kit as listed in the following table. This kit is only required for full-length GPUs and is not required for low profile GPUs such as the NVIDIA A2, L4, T1000 and T400.

Table 82. ThinkSystem SR650 V3 GPU Full Length Thermal Option Kit

Part number	Description	Maximum supported
4X67A82883	ThinkSystem SR650 V3 GPU Full Length Thermal Option Kit <ul style="list-style-type: none"> 2x 1U processor performance heatsinks - replace existing 2U heatsinks (SBB7A53929, BP4Z) 1x ThinkSystem 2U GPU air duct - replaces main air baffle (SBB7A43701, BLL5) 3x GPU extend air ducts - needed in a zone if an A10 or other single-wide GPU > 75W is installed in the upper slot (SBB7A43702, BLL4) 3x Air duct fillers - needed in each riser zone if no GPU is installed in that zone (SBB7A17338, B8MB) 3x 8-pin GPU power cables for double-wide GPUs (SBB7A49792, BMPQ) 3x 16-pin GPU power cables for double-wide GPUs (SBB7A66338, BRWK) 3x GPU power cables for single-wide GPUs and the RTX A4500 (SBB7A44786, BMJL) 3x GPU power Y-cables when 2x single-wide GPUs installed on one riser (SBB7A23757, BC09) 	1

The following figure shows the GPU air duct with GPU air duct fillers and GPU extend air ducts installed.

Figure 20. SR650 V3 GPU air duct

GPU cable kits

The following cable kits are offered to provide auxiliary power cables for GPUs that require one. See the [GPU part numbers](#) section to see which GPUs require an auxiliary power cable.

Configuration notes:

- This cable kits are only required for field upgrades; factory (CTO) orders will automatically include any required cables.
- For double-wide GPUs, The DW (double-wide) cable kit is only required if you are adding *additional* double-wide GPUs to a server that already has a DW GPU installed from a CTO order. If you are doing a field upgrade to install the *first* DW GPU to a server, order the ThinkSystem SR650 V3 GPU Full Length Thermal Option Kit, 4X67A82883 instead, since 4X67A82883 includes the necessary power cables.

Table 83. GPU cable kits

Part number	Description
4X97A82948	<p>ThinkSystem SR650 V3 DW GPU Cable Kit</p> <ul style="list-style-type: none"> • 3x 8-pin GPU power cables for double-wide GPUs (SBB7A49792) • 3x GPU power cables for single-wide GPUs and the RTX A4500 (SBB7A44786) • 3x GPU power Y-cables when 2x single-wide GPUs installed on one riser (SBB7A23757) • 3x 16-pin GPU power cables for double-wide GPUs (SBB7A66338)

Fibre Channel host bus adapters

The following table lists the Fibre Channel HBAs supported by the SR650 V3.

No Windows 10/11 support: None of the adapters listed in the table are supported with Windows 10 or Windows 11.

Table 84. Fibre Channel HBAs

Part number	Feature code	Description	Max qty	Slots supported	PCIe lanes
64 Gb Fibre Channel HBAs					
4XC7A77485	BLC1	ThinkSystem Emulex LPe36002 64Gb 2-port PCIe Fibre Channel Adapter	12	All slots	Gen4 x8
32 Gb Fibre Channel HBAs					
4XC7A76498	BJ3G	ThinkSystem Emulex LPe35000 32Gb 1-port PCIe Fibre Channel Adapter v2	12	All slots	Gen4 x8
4XC7A76525	BJ3H	ThinkSystem Emulex LPe35002 32Gb 2-port PCIe Fibre Channel Adapter V2	12	All slots	Gen4 x8
4XC7A08279	BA1G	ThinkSystem QLogic QLE2770 32Gb 1-Port PCIe Fibre Channel Adapter	12	All slots	Gen4 x8
4XC7A08276	BA1F	ThinkSystem QLogic QLE2772 32Gb 2-Port PCIe Fibre Channel Adapter	12	All slots	Gen4 x8
16 Gb Fibre Channel HBAs					
01CV840	ATZV	Emulex 16Gb Gen6 FC Dual-port HBA	12	All slots	Gen3 x8
01CV830	ATZU	Emulex 16Gb Gen6 FC Single-port HBA	12	All slots	Gen3 x8
01CV760	ATZC	QLogic 16Gb Enhanced Gen5 FC Dual-port HBA	12	All slots	Gen3 x8
01CV750	ATZB	QLogic 16Gb Enhanced Gen5 FC Single-port HBA	12	All slots	Gen3 x8

For more information, see the list of Lenovo Press Product Guides in the Host bus adapters category:
<https://lenovopress.com/servers/options/hba>

SAS adapters for external storage

The following table lists SAS HBAs and RAID adapters supported by SR650 V3 server for use with external storage.

No Windows 10/11 support: None of the adapters listed in the table are supported with Windows 10 or Windows 11.

Table 85. Adapters for external storage

Part number	Feature code	Description	Max qty	Slots supported	PCIe lanes
SAS HBAs					
4Y37A78837	BNWK	ThinkSystem 440-8e SAS/SATA PCIe Gen4 12Gb HBA	12	All slots	Gen4 x8
4Y37A09724	B8P7	ThinkSystem 440-16e SAS/SATA PCIe Gen4 12Gb HBA	12	All slots	Gen4 x8
4Y37A85156	BWKP	ThinkSystem 450W-16e SAS/SATA PCIe Gen4 24Gb HBA	6	1-7,11,12	Gen4 x16
External RAID adapters					
4Y37A78836	BNWJ	ThinkSystem RAID 940-8e 4GB Flash PCIe Gen4 12Gb Adapter	4*	All slots	Gen4 x8

* See below regarding supercap requirements

For a comparison of the functions of the supported storage adapters, see the ThinkSystem RAID Adapter and HBA Reference:

<https://lenovopress.lenovo.com/lp1288#sr650-v3-support=SR650%2520V3&internal-or-external-ports=External>

The RAID 940-8e adapter uses a flash power module (supercap), which can be installed in one of up to 4 locations in the server depending on the server configuration. See the [RAID flash power module \(supercap\) support](#) section for details. The number of 940-8e RAID adapters supported is based on how many supercaps can be installed in the server. If an internal RAID adapter with flash power modules is installed, the maximum number of 940-8e adapters supported is reduced by 1.

For more information, see the list of Lenovo Press Product Guides in the Host bus adapters and RAID adapters categories:

<https://lenovopress.com/servers/options/hba>
<https://lenovopress.com/servers/options/raid>

Cooling

The SR650 V3 server has up to six 60 mm hot-swap variable-speed fans. Five fans are needed when one processor is installed and six fans are required when two processors are installed. Certain 1-processor configurations may also require 6 fans, as described below. The server offers N+1 redundancy. The server also has one or two additional fans integrated in each of the two power supplies.

Depending on the configuration, the server will need either Standard fans (single-rotor 17K RPM) or Performance fans (dual-rotor 21K RPM).

Under the following conditions, Standard fans can be used:

- Processor TDP < 270W
- No 128 GB or 256GB 3DS RDIMMs
- No mid-chassis or rear drive backplanes
- No GPUs
- No low profile slots 7, 8, 9 & 10
- No internal (CFF) HBA/RAID adapter
- A configuration with 24x 2.5" or 12x 3.5" front backplanes and without any following network adapters:
 - Any 100Gb, 200Gb or 400Gb adapter
 - ThinkSystem Broadcom 57454 10GBASE-T 4-port OCP Ethernet Adapter, 4XC7A08240
 - ThinkSystem Broadcom 57416 10GBASE-T 2-port OCP Ethernet Adapter, 4XC7A08236
 - ThinkSystem NVIDIA BlueField-2 25GbE SFP56 2-Port PCIe Ethernet DPU w/BMC & Crypto, BRPK
- Not the following configurations:
 - 12x 3.5-inch front drive bays with an OCP adapter installed
- Ambient temperature 35°C or lower

If any conditions are not met, Performance fans are required.

The quantity of fans required are as follows:

- 6 fans:
 - 2 processor configurations
 - 1 processor configurations with middle drive backplanes
 - 1 processor configurations with rear drive backplanes
 - 1 processor configurations with Riser 3
- 5 fans:
 - 1 processor configuration without middle/rear drive backplanes or Riser 3

Ordering information for the fans is listed in the following table.

Table 86. Fan ordering information

Part number	Feature code	Description	Quantity required
4F17A14497	BH8F	ThinkSystem V3 2U Standard Fan Option Kit	1x CPU: 5 or 6 2x CPUs: 6
4F17A82884	BLL6	ThinkSystem V3 2U Performance Fan Option Kit	1x CPU: 5 or 6 2x CPUs: 6

Power supplies

The SR650 V3 supports up to two redundant hot-swap power supplies.

- [Power supply ordering information](#)
- [Power supply LEDs](#)

- Power cords (C13 connectors)
- Power cords (C19 connectors)
- -48V DC power cord

Power supply ordering information

The power supply choices are listed in the following table. Both power supplies used in server must be identical.

Tip: When configuring a server in the DCSC configurator, power consumption is calculated precisely by interfacing with Lenovo Capacity Planner. You can therefore select the appropriate power supply for your configuration. However, do consider future upgrades that may require additional power needs.

Table 87. Power supply options

Part number	Feature code	Description	Connector	Max quantity	110V AC	220V AC	240V DC PRC only	-48V DC
AC input power - 80 PLUS Titanium efficiency								
4P57A82019	BR1X	ThinkSystem 750W 230V Titanium Hot-Swap Gen2 Power Supply v3	C13	2	No	Yes	Yes	No
CTO only	C07V	ThinkSystem 750W 230V Titanium Hot-Swap Gen2 Power Supply v4	C13	2	No	Yes	Yes	No
4P57A72666	BLKH	ThinkSystem 1100W 230V Titanium Hot-Swap Gen2 Power Supply	C13	2	No	Yes	Yes	No
4P57A78359	BPK9	ThinkSystem 1800W 230V Titanium Hot-Swap Gen2 Power Supply	C13	2	No	Yes	Yes	No
CTO only	C8L4	ThinkSystem 1800W 230V Titanium Hot-Swap Gen2 Power Supply v5	C13	2	No	Yes	Yes	No
4P57A72667	BKTJ	ThinkSystem 2600W 230V Titanium Hot-Swap Gen2 Power Supply v4	C19	2	No	Yes	Yes	No
AC input power - 80 PLUS Platinum efficiency								
4P57A72670	BNFG	ThinkSystem 750W 230V/115V Platinum Hot-Swap Gen2 Power Supply v3	C13	2	Yes	Yes	Yes	No
4P57A72671	BNFH	ThinkSystem 1100W 230V/115V Platinum Hot-Swap Gen2 Power Supply v3	C13	2	Yes	Yes	Yes	No
4P57A78362	BMUF	ThinkSystem 1800W 230V Platinum Hot-Swap Gen2 Power Supply	C13	2	No	Yes	Yes	No
4P57A26295	B962	ThinkSystem 2400W 230V Platinum Hot-Swap Gen2 Power Supply	C19	2	No	Yes	Yes	No

Supported power supplies are auto-sensing dual-voltage units, supporting both 110V AC (100-127V 50/60 Hz) and 220V AC (200-240V 50/60 Hz) power. For China customers, all power supplies support 240V DC.

AC power supplies up to 1800W have a C14 connector. AC power supplies 2400W and above have a C19 connector.

The supported -48V DC power supply has a Weidmuller TOP 4GS/3 7.6 terminal as shown in the following figure.

Figure 21. Connector on the ThinkSystem 1100W -48V DC Hot-Swap Gen2 Power Supply

Power supply options do not include a line cord. For server configurations, the inclusion of a power cord is model dependent. Configure-to-order models can be configured without power cords if desired.

Power supply LEDs

The supported hot-swap power supplies have the following LEDs:

- Power input LED:
 - Green: The power supply is connected to the AC power source
 - Off: The power supply is disconnected from the AC power source or a power problem has occurred
- Power output LED:
 - Green: The server is on and the power supply is working normally
 - Blinking green: The power supply is in Zero-output/Standby mode (see below)
 - Off: The server is powered off, or the power supply is not working properly
- Power supply error LED:
 - Off: The power supply is working normally
 - Yellow: The power supply has failed

Power cords (C13 connectors)

Line cords and rack power cables with C13 connectors can be ordered as listed in the following table.

115V customers: If you plan to use the 1100W power supply with a low-range (100-127V) power source, select a power cable that is rated above 10A. Power cables that are rated at 10A or below are not supported with low-range power.

Table 88. Power cords

Part number	Feature code	Description
Rack cables - C13 to C14		
CTO only	BPHZ	0.5m, 10A/100-250V, C13 to C14 Jumper Cord

4L67A08360	AX8A	4.3m, 13A/120V, C13 to NEMA 5-15P (US) Line Cord

Power cords (C19 connectors)

Line cords and rack power cables with C19 connectors can be ordered as listed in the following table.

Table 89. Power cords (C19 connectors)

Part number	Feature code	Description
Rack cables		
4L67A86677	BPJ0	0.5m, 16A/100-250V, C19 to IEC 320-C20 Rack Power Cable
4L67A86678	B4L0	1.0m, 16A/100-250V, C19 to IEC 320-C20 Rack Power Cable
4L67A86679	B4L1	1.5m, 16A/100-250V, C19 to IEC 320-C20 Rack Power Cable
4L67A86680	B4L2	2.0m, 16A/100-250V, C19 to IEC 320-C20 Rack Power Cable
39Y7916	6252	2.5m, 16A/100-240V, C19 to IEC 320-C20 Rack Power Cable
4L67A86681	B4L3	4.3m, 16A/100-250V, C19 to IEC 320-C20 Rack Power Cable
Rack cables for India		
4L67B10323	CC6N	2.0m, 16A/100-250V, C19 to C20 Jumper Cord (India)
4L67B10324	CC6P	2.8m, 16A/100-250V, C19 to C20 Jumper Cord (India)
4L67B10325	CC6Q	4.3m, 16A/100-250V, C19 to C20 Jumper Cord (India)
Line cords		
40K9777	6276	4.3m, 220-240V, C19 to IRAM 2073 (Argentina) Line cord
40K9773	6284	4.3m, 220-240V, C19 to AS/NZS 3112 (Aus/NZ) Line cord
40K9775	6277	4.3m, 250V, C19 to NBR 14136 (Brazil) Line Cord

Part number	Feature code	Description
40K9774	6288	4.3m, 220-240V, C19 to GB2099.1 (China) Line cord
40K9766	6279	4.3m, 220-240V, C19 to CEE7-VII (European) Line cord
40K9776	6285	4.3m, 220-240V, C19 to IS6538 (India) Line cord
40K9768	6281	4.3m, 220-240V, C19 to CEI 23-16 (Italy) Line cord
41Y9231	6289	4.3m, 15A/250V, C19 to KSC 8305 (S. Korea) Line Cord
41Y9230	6287	4.3m, 16A/250V, C19 to CNS 10917-3 (Taiwan) Line Cord
40K9767	6278	4.3m, 220-240V, C19 to BS 1363/A w/13A fuse (UK) Line Cord
40K9772	6275	4.3m, 16A/208V, C19 to NEMA L6-20P (US) Line Cord
00D7197	A1NV	4.3m, 15A/250V, C19 to NEMA 6-15P (US) Line Cord

-48V DC power cord

For the -48V DC Power Supply, the following power cable is supported.

Table 90. -48V DC power cable

Part number	Feature code	Description
4X97A59831	BE4V	2.5m, -48VDC Interconnecting Cable

Systems management

The SR650 V3 contains an integrated service processor, XClarity Controller 2 (XCC2), which provides advanced control, monitoring, and alerting functions. The XCC2 is based on the AST2600 baseboard management controller (BMC) using a dual-core ARM Cortex A7 32-bit RISC service processor running at 1.2 GHz.

Topics in this section:

- [System I/O Board](#)
- [Local management](#)
- [System status with XClarity Mobile](#)
- [Remote management](#)
- [XCC2 Platinum](#)
- [Lenovo XClarity Provisioning Manager](#)
- [Lenovo XClarity One](#)
- [Lenovo XClarity Administrator](#)
- [Lenovo XClarity Integrators](#)
- [Lenovo XClarity Essentials](#)
- [Lenovo XClarity Energy Manager](#)
- [Lenovo Capacity Planner](#)

System I/O Board

The SR650 V3 implements a separate System I/O Board that connects to the Processor Board. The location of the System I/O Board is shown in the [Components and connectors](#) section. The System I/O Board contains all the connectors visible at the rear of the server as shown in the following figure.

Figure 22. System I/O Board

The board also has the following components:

- XClarity Controller 2, implemented using the ASPEED AST2600 baseboard management controller (BMC).
- Root of Trust (RoT) module - a daughter card that implements Platform Firmware Resiliency (PFR) hardware Root of Trust (RoT) which enables the server to be NIST SP800-193 compliant. For more

details about PFR, see the [Security](#) section.

- Connector to enable an additional redundant Ethernet connection to the XCC2 controller. The connector is used in conjunction with the ThinkSystem V3 Management NIC Adapter Kit (4XC7A85319). For details, see the [Remote management](#) section.
- Internal USB port - to allow the booting of an operating system from a USB key. The VMware ESXi preloads use this port for example. Preloads are described in the [Operating system support](#) section.
- MicroSD card port to enable the use of a MicroSD card for additional storage for use with the XCC2 controller. XCC2 can use the storage as a Remote Disc on Card (RDOC) device (up to 4GB of storage). It can also be used to store firmware updates (including N-1 firmware history) for ease of deployment.

Tip: Without a MicroSD card installed, the XCC2 controller will have 100MB of available RDOC storage.

Ordering information for the supported USB drive and Micro SD card are listed in the following table.

Table 91. Media for use with the System I/O Board

Part number	Feature code	Description
4X77A77065	BNWN	ThinkSystem USB 32GB USB 3.0 Flash Drive
4X77A77064	BNWP	ThinkSystem MicroSD 32GB Class 10 Flash Memory Card
4X77A92672	C0BC	ThinkSystem MicroSD 64GB Class 10 Flash Memory Card

Local management

The SR650 V3 offers a front operator panel with key LED status indicators, as shown in the following figure.

Tip: The Network LED only shows network activity of the installed OCP network adapter.

Figure 23. Front operator controls are on the left and right side of the server

Light path diagnostics

The server offers light path diagnostics. If an environmental condition exceeds a threshold or if a system component fails, XCC lights LEDs inside the server to help you diagnose the problem and find the failing part. The server has fault LEDs next to the following components:

- Each memory DIMM
- Each drive bay
- Each power supply

Front VGA and External Diagnostics ports

The VGA port at the rear of the server is included in all models, however the VGA port at the front of the server is optional. When the front VGA is in use, the rear VGA port is automatically disabled.

Also optional is the External Diagnostics port which enables the use of the External Diagnostics Handset, described in the next section.

To configure either the VGA port or the External Diagnostics port at the front of the server, select one of the following feature codes when configuring the server.

Table 92. Front VGA port

Part number	Feature code	Description	Front VGA port	External diagnostics port
CTO only	BQQ2	ThinkSystem 2U V3 EIA Latch Standard	No	No
4XH7A86164	BQQ1	ThinkSystem V3 2U EIA Latch with VGA & External Diagnostics Ports	Included	Included
4X97A87065	BQQ4	ThinkSystem SR650 V3 EIA Latch with External Diagnostics Port	No	Included
4X97A87067	BQQ3	ThinkSystem SR650 V3 EIA Latch with VGA Port	Included	No

External Diagnostics Handset

The SR650 V3 optionally has a port to connect an External Diagnostics Handset as described in the preceding section. The External Diagnostics Handset has the same functions as the Integrated Diagnostics Panel but has the advantages of not consuming space on the front of the server plus it can be shared among many servers in your data center. The handset has a magnet on the back of it to allow you to easily mount it on a convenient place on any rack cabinet.

Figure 24. External Diagnostics Handset

Ordering information for the External Diagnostics Handset with is listed in the following table.

Table 93. External Diagnostics Handset ordering information

Part number	Feature code	Description
4TA7A64874	BEUX	ThinkSystem External Diagnostics Handset

Integrated Diagnostics Panel for 8x 2.5-inch and 16x 2.5-inch drive bay configurations

For configurations with 8x 2.5-inch or 16x 2.5-inch drive bays at the front, the server can optionally be configured to have a pull-out Integrated Diagnostics Panel. The following figure shows the standard (fixed) operator panel and the optional Integrated Diagnostics Panel.

Figure 25. Operator panel choices for the 8x 2.5-inch drive bay configuration

The Integrated Diagnostics Panel allows quick access to system status, firmware, network, and health information. The LCD display on the panel and the function buttons give you access to the following information:

- Active alerts
- Status Dashboard
- System VPD: machine type & mode, serial number, UUID string
- System firmware levels: UEFI and XCC firmware
- XCC network information: hostname, MAC address, IP address, DNS addresses
- Environmental data: Ambient temperature, CPU temperature, AC input voltage, estimated power consumption
- Active XCC sessions
- System reset action

The Integrated Diagnostics Panel can be configured as listed in the following table. It is only available configure-to-order (CTO); not available as a field upgrade.

Table 94. Ordering information for the Integrated Diagnostics Panel

Part number	Feature code	Description
CTO only	BMJA	ThinkSystem 2U 16x2.5" Front Operator Panel v2

Information pull-out tab

The front of the server also houses an information pull-out tab (also known as the network access tag). See [Figure 2](#) for the location. A label on the tab shows the network information (MAC address and other data) to remotely access the service processor.

System status with XClarity Mobile

The XClarity Mobile app includes a tethering function where you can connect your Android or iOS device to the server via USB to see the status of the server.

The steps to connect the mobile device are as follows:

1. Enable USB Management on the server, by holding down the ID button for 3 seconds (or pressing the dedicated USB management button if one is present)
2. Connect the mobile device via a USB cable to the server's USB port with the management symbol 
3. In iOS or Android settings, enable Personal Hotspot or USB Tethering
4. Launch the Lenovo XClarity Mobile app

Once connected you can see the following information:

- Server status including error logs (read only, no login required)
- Server management functions (XClarity login credentials required)

Remote management

The server offers a dedicated RJ45 port at the rear of the server for remote management via the XClarity Controller management processor. The port supports 10/100/1000 Mbps speeds.

Remote server management is provided through industry-standard interfaces:

- Intelligent Platform Management Interface (IPMI) Version 2.0
- Simple Network Management Protocol (SNMP) Version 3 (no SET commands; no SNMP v1)
- Common Information Model (CIM-XML)
- Representational State Transfer (REST) support
- Redfish support (DMTF compliant)
- Web browser - HTML 5-based browser interface (Java and ActiveX not required) using a responsive design (content optimized for device being used - laptop, tablet, phone) with NLS support

The SR650 V3 also supports the use of an OCP adapter that provides an additional redundant Ethernet connection to the XCC2 controller. Ordering information is listed in the following table.

Table 95. Redundant System Management Port Adapter

Part number	Feature code	Description	Maximum quantity
4XC7A85319	BTMQ	ThinkSystem V3 Management NIC Adapter Kit	1

The use of this adapter allows concurrent remote access using both the connection on the adapter and the onboard RJ45 remote management port provided by the server. The adapter and onboard port have separate IP addresses.

Configuration rules:

- The Redundant System Management Port Adapter is installed in the OCP adapter slot at the rear of the server and is mutually exclusive with any OCP network adapter.
- It is not supported installed in the front OCP slot (if the front OCP slot is configured)
- If the Redundant System Management Port Adapter is installed in the rear slot, then the front OCP slot (if configured) cannot be used.

The following figure shows the server with the Redundant System Management Port Adapter installed in the OCP slot.

Figure 26. SR650 V3 with the Redundant System Management Port Adapter installed

IPMI via the Ethernet port (IPMI over LAN) is supported, however it is disabled by default. For CTO orders you can specify whether you want the feature enabled or disabled in the factory, using the feature codes listed in the following table.

Table 96. IPMI-over-LAN settings

Feature code	Description
B7XZ	Disable IPMI-over-LAN (default)
B7Y0	Enable IPMI-over-LAN

XCC2 Platinum

The XCC2 service processor in the SR650 V3 supports an upgrade to the Platinum level of features. Compared to the XCC functions of ThinkSystem V2 and earlier systems, Platinum adds the same features as Enterprise and Advanced levels in ThinkSystem V2, plus additional features.

XCC2 Platinum adds the following Enterprise and Advanced functions:

- Remotely viewing video with graphics resolutions up to 1600x1200 at 75 Hz with up to 23 bits per pixel, regardless of the system state
- Remotely accessing the server using the keyboard and mouse from a remote client
- International keyboard mapping support
- Syslog alerting
- Redirecting serial console via SSH
- Component replacement log (Maintenance History log)
- Access restriction (IP address blocking)
- Lenovo SED security key management
- Displaying graphics for real-time and historical power usage data and temperature
- Boot video capture and crash video capture
- Virtual console collaboration - Ability for up to 6 remote users to be log into the remote session simultaneously
- Remote console Java client
- Mapping the ISO and image files located on the local client as virtual drives for use by the server
- Mounting the remote ISO and image files via HTTPS, SFTP, CIFS, and NFS
- Power capping
- System utilization data and graphic view
- Single sign on with Lenovo XClarity Administrator
- Update firmware from a repository

- License for XClarity Energy Manager

XCC2 Platinum also adds the following features that are new to XCC2:

- System Guard - Monitor hardware inventory for unexpected component changes, and simply log the event or prevent booting
- Enterprise Strict Security mode - Enforces CNSA 1.0 level security
- Neighbor Group - Enables administrators to manage and synchronize configurations and firmware level across multiple servers

Ordering information is listed in the following table. XCC2 Platinum is a software license upgrade - no additional hardware is required.

Table 97. XCC2 Platinum license upgrade

Part number	Feature code	Description
7S0X000KWW	SBCV	Lenovo XClarity Controller 2 (XCC2) Platinum Upgrade

With XCC2 Platinum, for CTO orders, you can request that System Guard be enabled in the factory and the first configuration snapshot be recorded. To add this to an order, select feature code listed in the following table. The selection is made in the Security tab of the DCSC configurator.

Table 98. Enable System Guard in the factory (CTO orders)

Feature code	Description
BUT2	Install System Guard

For more information about System Guard, see https://pubs.lenovo.com/xcc2/NN1ia_c_systemguard

Lenovo XClarity Provisioning Manager

Lenovo XClarity Provisioning Manager (LXPM) is a UEFI-based application embedded in ThinkSystem servers and accessible via the F1 key during system boot.

LXPM provides the following functions:

- Graphical UEFI Setup
- System inventory information and VPD update
- System firmware updates (UEFI and XCC)
- RAID setup wizard
- OS installation wizard (including unattended OS installation)
- Diagnostics functions

Lenovo XClarity One

Lenovo XClarity One is a hybrid cloud-based unified Management-as-a-Service (MaaS) platform, built for growing enterprises. XClarity One is powered by Lenovo Smarter Support, a powerful AI-driven platform that leverages predictive analytics to enhance the performance, reliability, and overall efficiency of Lenovo servers.

XClarity One is the next milestone in Lenovo's portfolio of systems management products. Now you can leverage the benefits of a true next-generation, hybrid cloud-based solution for the deployment, management, and maintenance of your infrastructure through a single, centralized platform that delivers a consistent user experience across all Lenovo products.

Key features include:

- **AI-powered Automation**

Harnesses the power of AI and predictive analytics to enhance the performance and reliability of your infrastructure with proactive protection.

- **AI-Powered Predictive Failure Analytics** - predict maintenance needs before the failure occurs, with the ability to visualize aggregated actions in customer dashboard.
- **AI-Powered Call-Home** - A Call-Home serviceable event opens a support ticket automatically, leveraging AI technology for problem determination and fast resolution.
- **AI-Powered Premier Support with Auto CRU** - uses AI to automatically dispatch parts and services, reducing service costs and minimizing downtime.

- **Secure Management Hub**

Lenovo's proprietary Management Hub is an on-premises virtual appliance that acts as the bridge between your infrastructure and the cloud.

- **On-Premises Security with Cloud Flexibility** - your infrastructure has no direct connection to the cloud, greatly reducing your attack surface from external threats while still having the deployment benefits, flexibility, and scalability of a cloud solution.
- **Authentication and Authorization** - built on a Zero Trust Architecture and requiring OTP Application authentication for all users to handle the support of all customers' servers and client devices. Role-based access controls help define and restrict permissions based on user roles.

- **AI-Powered Management**

Go beyond standard system management leveraging AI algorithms to continuously learn from data patterns to optimize performance and predict potential issues before they impact operations.

- **AI Customizable Insights and Reporting** - Customize AI-generated insights and reports to align with specific business objectives, enabling data-driven decision-making and strategic planning.
- **AI-driven scalability and flexibility** - Guided with AI-driven predictions, the platform supports dynamic scaling of resources based on workload demands.
- **Monitor and Change** - AI Advanced analytics capabilities providing deep insights into server performance, resource utilization, and security threats, to detect anomalies and suggest optimizations in real-time. NLP capabilities enabling administrators to interact with the platform using voice commands or text queries.
- **Upward Integration** - Integrated with Lenovo Open Cloud Automation (LOC-A), Lenovo Intelligent Computer Orchestration (LiCO) and AIOps engines providing an end-to-end management architecture across Lenovo infrastructure and devices solutions.
- **Cross-Platform Compatibility** - Compatibility across different server types and cloud environments

Lenovo XClarity One is an optional management component. License information for XClarity One is listed in the following table.

Table 99. XClarity One license information

Part number	Feature code	Description
7S0X000LWW	SCJC	XClarity One - Managed Device, Per Endpoint w/1 Yr SW S&S
7S0X000MWW	SCJD	XClarity One - Managed Device, Per Endpoint w/3 Yr SW S&S
7S0X000NWW	SCJE	XClarity One - Managed Device, Per Endpoint w/5 Yr SW S&S

For more information, see these resources:

- Lenovo XClarity One datasheet:
<https://lenovopress.lenovo.com/ds0188-lenovo-xclarity-one>
- Lenovo XClarity One product guide:
<https://lenovopress.lenovo.com/lp1992-lenovo-xclarity-one>

Lenovo XClarity Administrator

Lenovo XClarity Administrator is a centralized resource management solution designed to reduce complexity, speed response, and enhance the availability of Lenovo systems and solutions. It provides agent-free hardware management for ThinkSystem servers. The administration dashboard is based on HTML 5 and allows fast location of resources so tasks can be run quickly.

Because Lenovo XClarity Administrator does not require any agent software to be installed on the managed endpoints, there are no CPU cycles spent on agent execution, and no memory is used, which means that up to 1GB of RAM and 1 - 2% CPU usage is saved, compared to a typical managed system where an agent is required.

Lenovo XClarity Administrator is an optional software component for the SR650 V3. The software can be downloaded and used at no charge to discover and monitor the SR650 V3 and to manage firmware upgrades.

If software support is required for Lenovo XClarity Administrator, or premium features such as configuration management and operating system deployment are required, Lenovo XClarity Pro software subscription should be ordered. Lenovo XClarity Pro is licensed on a per managed system basis, that is, each managed Lenovo system requires a license.

The following table lists the Lenovo XClarity software license options.

Table 100. Lenovo XClarity Pro ordering information

Part number	Feature code	Description
00MT201	1339	Lenovo XClarity Pro, per Managed Endpoint w/1 Yr SW S&S
00MT202	1340	Lenovo XClarity Pro, per Managed Endpoint w/3 Yr SW S&S
00MT203	1341	Lenovo XClarity Pro, per Managed Endpoint w/5 Yr SW S&S
7S0X000HWW	SAYV	Lenovo XClarity Pro, per Managed Endpoint w/6 Yr SW S&S
7S0X000JWW	SAYW	Lenovo XClarity Pro, per Managed Endpoint w/7 Yr SW S&S

Lenovo XClarity Administrator offers the following standard features that are available at no charge:

- Auto-discovery and monitoring of Lenovo systems
- Firmware updates and compliance enforcement
- External alerts and notifications via SNMP traps, syslog remote logging, and e-mail
- Secure connections to managed endpoints
- NIST 800-131A or FIPS 140-3 compliant cryptographic standards between the management solution and managed endpoints
- Integration into existing higher-level management systems such as cloud automation and orchestration tools through REST APIs, providing extensive external visibility and control over hardware resources
- An intuitive, easy-to-use GUI
- Scripting with Windows PowerShell, providing command-line visibility and control over hardware resources

Lenovo XClarity Administrator offers the following premium features that require an optional Pro license:

- Pattern-based configuration management that allows to define configurations once and apply repeatedly without errors when deploying new servers or redeploying existing servers without disrupting the fabric
- Bare-metal deployment of operating systems and hypervisors to streamline infrastructure provisioning

For more information, refer to the Lenovo XClarity Administrator Product Guide:

<http://lenovopress.com/tips1200>

Lenovo XClarity Integrators

Lenovo also offers software plug-in modules, Lenovo XClarity Integrators, to manage physical infrastructure from leading external virtualization management software tools including those from Microsoft and VMware.

These integrators are offered at no charge, however if software support is required, a Lenovo XClarity Pro software subscription license should be ordered.

Lenovo XClarity Integrators offer the following additional features:

- Ability to discover, manage, and monitor Lenovo server hardware from VMware vCenter or Microsoft System Center
- Deployment of firmware updates and configuration patterns to Lenovo x86 [rack servers](#) and Flex System from the virtualization management tool
- Non-disruptive server maintenance in clustered environments that reduces workload downtime by dynamically migrating workloads from affected hosts during rolling server updates or reboots
- Greater service level uptime and assurance in clustered environments during unplanned hardware events by dynamically triggering workload migration from impacted hosts when impending hardware failures are predicted

For more information about all the available Lenovo XClarity Integrators, see the Lenovo XClarity Administrator Product Guide: <https://lenovopress.com/tips1200-lenovo-xclarity-administrator>

Lenovo XClarity Essentials

Lenovo offers the following XClarity Essentials software tools that can help you set up, use, and maintain the server at no additional cost:

- Lenovo Essentials OneCLI

OneCLI is a collection of server management tools that uses a command line interface program to manage firmware, hardware, and operating systems. It provides functions to collect full system health information (including health status), configure system settings, and update system firmware and drivers.

- Lenovo Essentials UpdateXpress

The UpdateXpress tool is a standalone GUI application for firmware and device driver updates that enables you to maintain your server firmware and device drivers up-to-date and help you avoid unnecessary server outages. The tool acquires and deploys individual updates and UpdateXpress System Packs (UXSPs) which are integration-tested bundles.

- Lenovo Essentials Bootable Media Creator

The Bootable Media Creator (BOMC) tool is used to create bootable media for offline firmware update.

For more information and downloads, visit the Lenovo XClarity Essentials web page:

<http://support.lenovo.com/us/en/documents/LNVO-center>

Lenovo XClarity Energy Manager

Lenovo XClarity Energy Manager (LXEM) is a power and temperature management solution for data centers. It is an agent-free, web-based console that enables you to monitor and manage power consumption and temperature in your data center through the management console. It enables server density and data center capacity to be increased through the use of power capping.

LXEM is a licensed product. A single-node LXEM license is included with the XClarity Controller Platinum upgrade as described in the [XCC2 Platinum](#) section. If your server does not have the XCC Platinum upgrade, Energy Manager licenses can be ordered as shown in the following table.

Table 101. Lenovo XClarity Energy Manager

Part number	Description
4L40E51621	Lenovo XClarity Energy Manager Node License (1 license needed per server)

For more information about XClarity Energy Manager, see the following resources:

- Lenovo Support page:
<https://datacentersupport.lenovo.com/us/en/solutions/lxem>
- User Guide for XClarity Energy Manager:
<https://pubs.lenovo.com/lxem/>

Lenovo Capacity Planner

Lenovo Capacity Planner is a power consumption evaluation tool that enhances data center planning by enabling IT administrators and pre-sales professionals to understand various power characteristics of racks, servers, and other devices. Capacity Planner can dynamically calculate the power consumption, current, British Thermal Unit (BTU), and volt-ampere (VA) rating at the rack level, improving the planning efficiency for large scale deployments.

For more information, refer to the Capacity Planner web page:
<http://datacentersupport.lenovo.com/us/en/solutions/lcp>

Security

Topics in this section:

- [Security features](#)
- [Platform Firmware Resiliency - Lenovo ThinkShield](#)
- [Security standards](#)

Security features

The SR650 V3 server offers the following electronic security features:

- Secure Boot function of the Intel Xeon processor
- Support for Platform Firmware Resiliency (PFR) hardware Root of Trust (RoT) - see the [Platform Firmware Resiliency](#) section
- Firmware signature processes compliant with FIPS and NIST requirements
- System Guard (part of [XCC Platinum](#)) - Proactive monitoring of hardware inventory for unexpected component changes
- Administrator and power-on password
- Integrated Trusted Platform Module (TPM) supporting TPM 2.0
- Self-encrypting drives (SEDs) with support for enterprise key managers - see the [SED encryption key management](#) section

The server is NIST SP 800-147B compliant.

The SR650 V3 server also offers the following physical security features:

- Optional chassis intrusion switch
- Optional lockable front security bezel

The optional lockable front security bezel is shown in the following figure and includes a key that enables you to secure the bezel over the drives and system controls thereby reducing the chance of unauthorized or accidental access to the server.

Front PCIe slots: The use of the security bezel is not supported when the server has front PCIe slots.

Figure 27. Lockable front security bezel

The dimensions of the security bezel are:

- Width: 437 mm (17.2 in.)
- Height: 87 mm (3.4 in.)
- Width: 23 mm (0.9 in.)

The following table lists the security options for the SR650 V3.

Table 102. Security features

Part number	Feature code	Description
4X97A82927	BAJJ	ThinkSystem SR650 V3/SR655 V3 Intrusion Cable
4XH7A09886	B8M2	ThinkSystem V2 2U Security Bezel Option Kit
4XH7A90300	BXBQ	ThinkSystem V3 2U Security Bezel Option Kit

Tip: The only difference between security bezels 4XH7A09886 and 4XH7A90300 is the Lenovo logo: On 4XH7A09886, the logo is made from plastic; on 4XH7A90300, the logo is made from aluminum alloy.

Platform Firmware Resiliency - Lenovo ThinkShield

Lenovo's ThinkShield Security is a transparent and comprehensive approach to security that extends to all dimensions of our data center products: from development, to supply chain, and through the entire product lifecycle.

The ThinkSystem SR650 V3 includes Platform Firmware Resiliency (PFR) hardware Root of Trust (RoT) which enables the system to be NIST SP800-193 compliant. This offering further enhances key platform subsystem protections against unauthorized firmware updates and corruption, to restore firmware to an integral state, and to closely monitor firmware for possible compromise from cyber-attacks.

PFR operates upon the following server components:

- UEFI image – the low-level server firmware that connects the operating system to the server hardware
- XCC image – the management “engine” software that controls and reports on the server status separate from the server operating system
- FPGA image – the code that runs the server’s lowest level hardware controller on the motherboard

The Lenovo Platform Root of Trust Hardware performs the following three main functions:

- Detection – Measures the firmware and updates for authenticity
- Recovery – Recovers a corrupted image to a known-safe image
- Protection – Monitors the system to ensure the known-good firmware is not maliciously written

These enhanced protection capabilities are implemented using a dedicated, discrete security processor whose implementation has been rigorously validated by leading third-party security firms. Security evaluation results and design details are available for customer review – providing unprecedented transparency and assurance.

The SR650 V3 includes support for Secure Boot, a UEFI firmware security feature developed by the UEFI Consortium that ensures only immutable and signed software are loaded during the boot time. The use of Secure Boot helps prevent malicious code from being loaded and helps prevent attacks, such as the installation of rootkits. Lenovo offers the capability to enable secure boot in the factory, to ensure end-to-end protection. Alternatively, Secure Boot can be left disabled in the factory, allowing the customer to enable it themselves at a later point, if desired.

The following table lists the relevant feature code(s).

Table 103. Secure Boot options

Part number	Feature code	Description	Purpose
CTO only	BPKQ	TPM 2.0 with Secure Boot	Configure the system in the factory with Secure Boot enabled.
CTO only	BPKR	TPM 2.0	Configure the system without Secure Boot enabled. Customers can enable Secure Boot later if desired.

Tip: If Secure Boot is not enabled in the factory, it can be enabled later by the customer. However once Secure Boot is enabled, it cannot be disabled.

Security standards

The SR650 V3 supports the following security standards and capabilities:

- **Industry Standard Security Capabilities**
 - Intel CPU Enablement
 - AES-NI (Advanced Encryption Standard New Instructions)
 - CBnT (Converged Boot Guard and Trusted Execution Technology)
 - CET (Control flow Enforcement Technology)
 - Hardware-based side channel attack resilience enhancements
 - MKTME/TME (Multi-Key Total Memory Encryption)
 - SGX (Software Guard eXtensions)
 - SGX-TEM (Trusted Environment Mode)
 - TDX (Trust Domain Extensions)
 - TXT (Trusted eXecution Technology)
 - VT (Virtualization Technology)
 - XD (eXecute Disable)
 - Microsoft Windows Security Enablement
 - Credential Guard
 - Device Guard
 - Host Guardian Service
 - TCG (Trusted Computing Group) TPM (Trusted Platform Module) 2.0
 - UEFI (Unified Extensible Firmware Interface) Forum Secure Boot
- **Hardware Root of Trust and Security**
 - Independent security subsystem providing platform-wide NIST SP800-193 compliant Platform Firmware Resilience (PFR)
 - Management domain RoT supplemented by the Secure Boot features of XCC
- **Platform Security**
 - Boot and run-time firmware integrity monitoring with rollback to known-good firmware (e.g., “self-healing”)
 - Non-volatile storage bus security monitoring and filtering
 - Resilient firmware implementation, such as to detect and defeat unauthorized flash writes or SMM

(System Management Mode) memory incursions

- Patented IPMI KCS channel privileged access authorization (USPTO Patent# 11,256,810)
- Host and management domain authorization, including integration with CyberArk for enterprise password management
- KMIP (Key Management Interoperability Protocol) compliant, including support for IBM SKLM and Thales KeySecure
- Reduced “out of box” attack surface
- Configurable network services
- FIPS 140-3 (in progress) validated cryptography for XCC
- CNSA Suite 1.0 Quantum-resistant cryptography for XCC
- Lenovo System Guard

For more information on platform security, see the paper “How to Harden the Security of your ThinkSystem Server and Management Applications” available from <https://lenovopress.com/lp1260-how-to-harden-the-security-of-your-thinksystem-server>.

- **Standards Compliance and/or Support**

- NIST SP800-131A rev 2 “Transitioning the Use of Cryptographic Algorithms and Key Lengths”
- NIST SP800-147B “BIOS Protection Guidelines for Servers”
- NIST SP800-193 “Platform Firmware Resiliency Guidelines”
- ISO/IEC 11889 “Trusted Platform Module Library”
- Common Criteria TCG Protection Profile for “PC Client Specific TPM 2.0”
- European Union Commission Regulation 2019/424 (“ErP Lot 9”) “Ecodesign Requirements for Servers and Data Storage Products” Secure Data Deletion
- Optional FIPS 140-2 validated Self-Encrypting Disks (SEDs) with external KMIP-based key management

- **Product and Supply Chain Security**

- Suppliers validated through Lenovo’s Trusted Supplier Program
- Developed in accordance with Lenovo’s Secure Development Lifecycle (LSDL)
- Continuous firmware security validation through automated testing, including static code analysis, dynamic network and web vulnerability testing, software composition analysis, and subsystem-specific testing, such as UEFI security configuration validation
- Ongoing security reviews by US-based security experts, with attestation letters available from our third-party security partners
- Digitally signed firmware, stored and built on US-based infrastructure and signed on US-based Hardware Security Modules (HSMs)
- TAA (Trade Agreements Act) compliant manufacturing, by default in Mexico for North American markets with additional US and EU manufacturing options
- US 2019 NDAA (National Defense Authorization Act) Section 889 compliant

Rack installation

The following table lists the rack installation options that are available for the SR650 V3.

Table 104. Rack installation options

Part number	Feature	Description
Rail Kits		
4XF7A99129	C4TL	ThinkSystem Toolless Stab-in Slide Rail Kit V3
4XF7A99131	C4TN	ThinkSystem Toolless Stab-in Slide Rail Kit V3 with 2U CMA
4M17A13564	BK7W	ThinkSystem SR250/SR150 Toolless Friction Rail
4M17A11754	B8LA	ThinkSystem Toolless Slide Rail Kit v2
4M17A11756	B91Y	ThinkSystem Toolless Slide Rail Kit v2 with 2U CMA
Enhanced Rail Kits for > 34 kg server weight*		
4M17A11755	B8LB	ThinkSystem Toolless Slide Rail Kit v2 Enhanced
4M17A11757	B97N	ThinkSystem Toolless Slide Rail Kit v2 Enhanced with 2U CMA
Separate Cable Management Arm		
7M27A05698	B135	ThinkSystem 2U CMA Upgrade Kit for Toolless Slide Rail

* The Enhanced Slide Rail Kits are used when the server is shipped in a rack and the server is 34 kg or heavier (configuration with 20x 3.5-inch HDDs for example)

For the specification of the rail kits, see the ThinkSystem and ThinkEdge Rail Kit Reference:
<https://lenovopress.lenovo.com/lp1838-thinksystem-and-thinkedge-rail-kit-reference#sr650-v3-support=SR650%2520V3>

Operating system support

The SR650 V3 with 5th Gen Intel Xeon Scalable processors supports the following operating systems:

- Microsoft Windows 10 (x64)
- Microsoft Windows 11
- Microsoft Windows Server 2019
- Microsoft Windows Server 2022
- Microsoft Windows Server 2025
- Red Hat Enterprise Linux 8.8
- Red Hat Enterprise Linux 8.9
- Red Hat Enterprise Linux 8.10
- Red Hat Enterprise Linux 9.2
- Red Hat Enterprise Linux 9.3
- Red Hat Enterprise Linux 9.4
- Red Hat Enterprise Linux 9.5
- Red Hat Enterprise Linux 9.6
- Red Hat Enterprise Linux 10.0
- SUSE Linux Enterprise Server 15 SP5
- SUSE Linux Enterprise Server 15 SP6
- SUSE Linux Enterprise Server 15 SP7
- SUSE Linux Enterprise Server 15 Xen SP5
- Ubuntu 20.04 LTS 64-bit
- Ubuntu 22.04 LTS 64-bit
- Ubuntu 24.04 LTS 64-bit
- VMware ESXi 7.0 U3
- VMware ESXi 8.0 U2
- VMware ESXi 8.0 U3
- VMware ESXi 9.0

The SR650 V3 with 4th Gen Intel Xeon Scalable processors supports the following operating systems:

- Microsoft Windows 10 (x64)
- Microsoft Windows 11
- Microsoft Windows Server 2019
- Microsoft Windows Server 2022
- Microsoft Windows Server 2025
- Red Hat Enterprise Linux 8.6
- Red Hat Enterprise Linux 8.7
- Red Hat Enterprise Linux 8.8
- Red Hat Enterprise Linux 8.9
- Red Hat Enterprise Linux 8.10
- Red Hat Enterprise Linux 9.0
- Red Hat Enterprise Linux 9.1
- Red Hat Enterprise Linux 9.2
- Red Hat Enterprise Linux 9.3
- Red Hat Enterprise Linux 9.4
- Red Hat Enterprise Linux 9.5
- Red Hat Enterprise Linux 9.6
- Red Hat Enterprise Linux 10.0
- SUSE Linux Enterprise Server 15 SP4
- SUSE Linux Enterprise Server 15 SP5
- SUSE Linux Enterprise Server 15 SP6
- SUSE Linux Enterprise Server 15 SP7
- SUSE Linux Enterprise Server 15 Xen SP4
- SUSE Linux Enterprise Server 15 Xen SP5
- Ubuntu 20.04 LTS 64-bit
- Ubuntu 22.04 LTS 64-bit
- Ubuntu 24.04 LTS 64-bit
- VMware ESXi 7.0 U3
- VMware ESXi 8.0
- VMware ESXi 8.0 U1
- VMware ESXi 8.0 U2
- VMware ESXi 8.0 U3
- VMware ESXi 9.0

The SR650 V3 also supports VMware vSphere Distributed Services Engine (DSE) with the NVIDIA Bluefield-2 SmartNIC Data Processing Unit (DPU) adapter. See the [DPU adapter](#) section for more information.

For a complete list of supported, certified and tested operating systems, plus additional details and links to relevant web sites, see the Operating System Interoperability Guide:

<https://lenovopress.lenovo.com/osig#servers=sr650-v3-7d75-7d76-7d77>

For configure-to-order configurations, the SR650 V3 can be preloaded with VMware ESXi. Ordering information is listed in the following table.

Table 105. VMware ESXi preload

Part number	Feature code	Description
CTO only	BMEY	VMware ESXi 7.0 U3 (Factory Installed)
CTO only	BYC7	VMware ESXi 8.0 U2 (Factory Installed)
CTO only	BZ97	VMware ESXi 8.0 U3 (Factory Installed)
CTO only	C91V	VMware ESXi 9.0 (Factory Installed)

Configuration rule:

- An ESXi preload cannot be selected if the configuration includes an NVIDIA GPU (ESXi preload cannot include the NVIDIA driver)

You can download supported VMware vSphere hypervisor images from the following web page and install it using the instructions provided:

https://vmware.lenovo.com/content/custom_iso/

Windows 10 and Windows 11

The SR650 V3 can now run Windows 10 and Windows 11, however only a subset of adapters and drives can be installed. For ease of configuration, additional Base CTO models 7D76CTO3WW and 7D75CTO3WW have been created to assist building a configuration that can be used with the client operating systems. See the [Models](#) section for details.

The XClarity management toolset is supported with Windows 10 and Windows 11.

Windows client license: A Windows client license for the system cannot be ordered from Lenovo nor can the OS be preloaded on the system in the factory. For the Windows license and for preloads, please contact your Lenovo business partner. A Windows Pro license is required as a qualifying base OS license in order to use a client Volume License offering.

See the part number tables in the following sections to see which adapters are supported with Windows 10 and Windows 11:

- [Controllers for internal storage](#)
- [M.2 adapters](#)
- [Network adapters](#)
- [GPU adapters](#)

GPU recommended: Lenovo recommends that if you plan to install Windows 10 or 11 on this server to run graphics-intensive applications, then you should selected a dedicated graphics adapter (GPU).

The following components are not supported:

- Fibre Channel adapters
- InfiniBand and VPI adapters
- External storage adapters
- Flash storage adapters

Physical and electrical specifications

The SR650 V3 has the following overall physical dimensions, excluding components that extend outside the standard chassis, such as EIA flanges, front security bezel (if any), and power supply handles:

- Width: 445 mm (17.5 inches)
- Height: 87 mm (3.4 inches)
- Depth: 766 mm (30.1 inches)

The following table lists the detailed dimensions. See the figure below for the definition of each dimension.

Table 106. Detailed dimensions

Dimension	Description
482 mm	X_a = Width, to the outsides of the front EIA flanges
435 mm	X_b = Width, to the rack rail mating surfaces
445 mm	X_c = Width, to the outer most chassis body feature
87 mm	Y_a = Height, from the bottom of chassis to the top of the chassis
698 mm	Z_a = Depth, from the rack flange mating surface to the rearmost I/O port surface
732 mm	Z_b = Depth, from the rack flange mating surface to the rearmost feature of the chassis body
732 mm (\leq 1100W PSU) 755 mm (1800W PSU) 781 mm (2400W PSU)	Z_c = Depth, from the rack flange mating surface to the rearmost feature such as power supply handle
34 mm	Z_d = Depth, from the forwardmost feature on front of EIA flange to the rack flange mating surface
46 mm	Z_e = Depth, from the front of security bezel (if applicable) or forwardmost feature to the rack flange mating surface

Figure 28. Server dimensions

The shipping (cardboard packaging) dimensions of the SR650 V3 are as follows:

- Width: 592 mm (23.3 inches)
- Height: 282 mm (11.1 inches)
- Depth: 992 mm (39.1 inches)

The server has the following weight:

- Base configuration: 21.4 kg (47.2 lb)
- Maximum weight: 38.8 kg (85.5 lb)

Electrical specifications for AC input power supplies:

- Input voltage:
 - 100 to 127 (nominal) Vac, 50 Hz or 60 Hz
 - 200 to 240 (nominal) Vac, 50 Hz or 60 Hz
 - 180 to 300 Vdc (China only)
- Inlet current: See the following table.

Table 107. Maximum inlet current

Part number	Description	100V AC	200V AC	220V AC	240V DC
AC input power - 80 PLUS Titanium efficiency					
4P57A82019	ThinkSystem 750W 230V Titanium Hot-Swap Gen2 Power Supply v3	No support	4A	3.6A	3.3A
4P57A72666	ThinkSystem 1100W 230V Titanium Hot-Swap Gen2 Power Supply	No support	5.9A	5.3A	5A
4P57A78359	ThinkSystem 1800W 230V Titanium Hot-Swap Gen2 Power Supply	No support	9.7A	8.7A	8.3A
4P57A72667	ThinkSystem 2600W 230V Titanium Hot-Swap Gen2 Power Supply v4	No support	13.2A	13A	11.9A
AC input power - 80 PLUS Platinum efficiency					
4P57A72670	ThinkSystem 750W 230V/115V Platinum Hot-Swap Gen2 Power Supply v3	8.4A	4.1A	3.69A	3.5A
4P57A72671	ThinkSystem 1100W 230V/115V Platinum Hot-Swap Gen2 Power Supply v3	12A	6A	5.4A	5.1A
4P57A78362	ThinkSystem 1800W 230V Platinum Hot-Swap Gen2 Power Supply	No support	10A	9.1A	9A
4P57A26295	ThinkSystem 2400W 230V Platinum Hot-Swap Gen2 Power Supply	No support	14A	12.6A	12A

Electrical specifications for DC input power supply:

- Input voltage: -48 to -60 Vdc
- Inlet current (1100W power supply): 26 A

Operating environment

The SR650 V3 server complies with ASHRAE Class A2 specifications with most configurations, and depending on the hardware configuration, also complies with ASHRAE Class A3 and Class A4 specifications.

Depending on the hardware configuration, the SR650 V3 server also complies with ASHRAE Class H1 specification. System performance may be impacted when operating temperature is outside ASHRAE H1 specification.

Topics in this section:

- [Ambient temperature requirements](#)
- [Temperature and humidity](#)
- [Acoustical noise emissions](#)
- [Shock and vibration](#)
- [Particulate contamination](#)

Ambient temperature requirements

The restrictions to ASHRAE support are as follows (cooling by air):

- The ambient temperature must be limited to 35 °C or lower if the server has any of the following components:
 - Broadcom 57416 10GBASE-T 2-port OCP
 - Broadcom 57454 10GBASE-T 4-port OCP
 - PCIe network interface card (NIC) at a rate greater than or equal to 100 Gb
 - Part with AOC and at the rate of 40 Gb
- The ambient temperature must be limited to 30 °C or lower if the server has any of the following components:
 - 24 x 2.5" or 12 x 3.5" front bay with middle bay or rear bay
 - GPU adapters
 - 256 GB 3DS RDIMM
 - 350 W processor
 - part with AOC and at a rate greater than 40 Gb
 - 5600 MHz RDIMMs with capacity greater than or equal to 96 GB
 - ThinkSystem 96GB TruDDR5 4800MHz (2Rx4) RDIMM
 - ThinkSystem 128GB TruDDR5 4800MHz (4Rx4) 3DS RDIMM v1
 - 4800 MHz 256 GB RDIMMs (except ThinkSystem 256GB TruDDR5 4800MHz (8Rx4) 3DS RDIMM v1)
- The ambient temperature must be limited to 25 °C or lower if the server has any of the following components or configurations:
 - 350 W processor installed in the chassis with 24 x 2.5" or 12 x 3.5" front drives
 - 350 W processor installed in the 16 x 2.5" + FIO non-GPU configuration
 - processor (270 W <=TDP <= 300 W) installed in the chassis with middle or rear drives
 - GPU adapter installed in the chassis with 24 x 2.5" front drives
 - GPU adapter and processor with TDP rating greater than 300 W installed in the chassis with 16 x 2.5" or 8 x 3.5" front drives
 - drives larger than 3.84 TB installed in Gen 5 rear or middle NVMe drive bays
 - 36 NVMe configuration
 - 16 x 2.5" + FIO GPU configuration
 - ThinkSystem 256GB TruDDR5 4800MHz (8Rx4) 3DS RDIMM v1
 - ThinkSystem 96GB TruDDR5 4800MHz (2Rx4) RDIMM and ThinkSystem 128GB TruDDR5 5600MHz (2Rx4) RDIMM installed in the following configurations:
 - 12 x 3.5" configurations including processors with TDP greater than to 350W
 - 12 x 3.5" + middle/rear drive bay configurations including processors with TDP greater than 250W
 - Intel Max 1100 GPU
 - The following NVMe SSDs installed in the front 12 x 3.5" SAS/SATA + middle 8 x 2.5" NVMe or front 12 x 3.5" SAS/SATA + rear 4 x 2.5" NVMe configuration:
 - ThinkSystem 2.5" U.2 P5336 61.44TB Read Intensive NVMe PCIe 4.0 x4 HS SSD
 - ThinkSystem 2.5" U.2 P5336 30.72TB Read Intensive NVMe PCIe 4.0 x4 HS SSD
 - ThinkSystem 2.5" U.2 P5336 15.36TB Read Intensive NVMe PCIe 4.0 x4 HS SSD
 - H100 NVL GPU adapter
 - ThinkSystem NVIDIA BlueField-3 VPI QSFP112 2P 200G PCIe Gen5 x16

The restrictions to ASHRAE support are as follows (cooling by Direct Water Cooling Module (DWCM)):

- The ambient temperature must be limited to 35 °C or lower if the server has any of the following components or configurations:
 - Broadcom 57416 10GBASE-T 2-port OCP
 - Broadcom 57454 10GBASE-T 4-port OCP
 - PCIe network interface card (NIC) at a rate greater than or equal to 100 Gb
 - Part with AOC and at the rate of 40 Gb
 - GPU adapters (< 300 W) installed in 8 x 3.5" or 16 x 2.5" configurations
 - 64 GB < DIMM < 256 GB
 - 8 x 2.5" GPU configuration
 - storage configuration without middle or rear NVMe backplane
- The ambient temperature must be limited to 30 °C or lower if the server has any of the following components:

- 256 GB 3DS RDIMM
- part with AOC and at a rate greater than 40 GB
- GPU adapters (>= 300 W) installed in 8 x 3.5" or 16 x 2.5" configurations
- three A40 GPU adapters installed in 24 x 2.5" configurations
- storage configuration with middle or rear NVMe backplane
- 5600 MHz RDIMMs with capacity greater than or equal to 96 GB
- ThinkSystem 96GB TruDDR5 4800MHz (2Rx4) RDIMM
- ThinkSystem 128GB TruDDR5 4800MHz (4Rx4) 3DS RDIMM v1
- 4800 MHz 256 GB RDIMMs (except ThinkSystem 256GB TruDDR5 4800MHz (8Rx4) 3DS RDIMM v1)
- H100 NVL GPU adapter
- The ambient temperature must be limited to 25 °C or lower if the server has any of the following components:
 - three H800/H100 GPU adapters installed in 24 x 2.5" configurations
 - three H800/H100 GPU adapters installed in 16 x 2.5" + FIO configurations
 - ThinkSystem 256GB TruDDR5 4800MHz (8Rx4) 3DS RDIMM v1
 - The following NVMe SSDs installed in the front 12 x 3.5" SAS/SATA + middle 8 x 2.5" NVMe or front 12 x 3.5" SAS/SATA + rear 4 x 2.5" NVMe configuration:
 - ThinkSystem 2.5" U.2 P5336 61.44TB Read Intensive NVMe PCIe 4.0 x4 HS SSD
 - ThinkSystem 2.5" U.2 P5336 30.72TB Read Intensive NVMe PCIe 4.0 x4 HS SSD
 - ThinkSystem 2.5" U.2 P5336 15.36TB Read Intensive NVMe PCIe 4.0 x4 HS SSD
 - ThinkSystem NVIDIA BlueField-3 VPI QSFP112 2P 200G PCIe Gen5 x16

Server shutdown: When the ambient temperature is greater than the supported max temperature (ASHARE A4 45°C), the server will shut down. The server will not power on again until the ambient temperature falls within the supported temperature range.

For additional information, see the Environmental specifications and Thermal rules sections in the product documentation:

https://pubs.lenovo.com/sr650-v3/server_specifications_environmental

https://pubs.lenovo.com/sr650-v3/thermal_rules

Temperature and humidity

The server is supported in the following environment:

- Air temperature:
 - Operating:
 - ASHRAE Class A2: 10°C to 35°C (50°F to 95°F); the maximum ambient temperature decreases by 1°C for every 300 m (984 ft) increase in altitude above 900 m (2,953 ft).
 - ASHRAE Class A3: 5°C to 40°C (41°F to 104°F); the maximum ambient temperature decreases by 1°C for every 175 m (574 ft) increase in altitude above 900 m (2,953 ft).
 - ASHRAE Class A4: 5°C to 45°C (41°F to 113°F); the maximum ambient temperature decreases by 1°C for every 125 m (410 ft) increase in altitude above 900 m (2,953 ft).
 - ASHRAE Class H1: 5 °C to 25 °C (41 °F to 77 °F); Decrease the maximum ambient temperature by 1°C for every 500 m (1640 ft) increase in altitude above 900 m (2,953 ft).
 - Server off: 5°C to 45°C (41°F to 113°F)
 - Shipment/storage: -40°C to 60°C (-40°F to 140°F)
- Maximum altitude: 3,050 m (10,000 ft)
- Relative Humidity (non-condensing):
 - Operating
 - ASHRAE Class A2: 8% to 80%; maximum dew point: 21°C (70°F)
 - ASHRAE Class A3: 8% to 85%; maximum dew point: 24°C (75°F)
 - ASHRAE Class A4: 8% to 90%; maximum dew point: 24°C (75°F)
 - ASHRAE Class H1: 8% to 80%; Maximum dew point: 17°C (63°F)
 - Shipment/storage: 8% to 90%

Acoustical noise emissions

The server has the following acoustic noise emissions declaration:

Table 108. Noise emissions

Configuration	Typical	Storage	GPU
Sound power levels (L_{WA})	<ul style="list-style-type: none">• Idling: 5.6 Bel• Operating: 5.6 Bel	<ul style="list-style-type: none">• Idling: 7.3 Bel• Operating: 7.3 Bel	<ul style="list-style-type: none">• Idling: 7.3 Bel• Operating: 8.9 Bel
Sound pressure level (L_{pA})	<ul style="list-style-type: none">• Idling: 41.5 dBA• Operating: 41.5 dBA	<ul style="list-style-type: none">• Idling: 60.2 dBA• Operating: 60.2 dBA	<ul style="list-style-type: none">• Idling: 60.2 dBA• Operating: 74.1 dBA

Notes:

- These sound levels were measured in controlled acoustical environments according to procedures specified by ISO7779 and are reported in accordance with ISO 9296.
- The declared acoustic sound levels are based on the following configurations, which may change depending on configuration/conditions :
 - Typical configuration: 8x 2.5-inch front drive bays, 6x standard fans, 2x 205 W CPUs, 8x 64 GB RDIMMs, 8x 2.4 TB SAS HDDs, 1x RAID 940-8i, 1x Intel X710-T2L 10GBASE-T 2-port OCP, 2x 750 W PSUs, No GPUs
 - Storage configuration: 12x 3.5-inch front drive bays, 6x high performance fans, 2x 205 W CPUs, 16x 64 GB RDIMMs, 20x 14 TB SAS HDDs, 1x RAID 940-32i, 1x Intel X710-T2L 10GBASE-T 2-port OCP, 2x 1100 W PSUs, No GPUs
 - GPU configuration: 16x 2.5-inch front drive bays, 6x high performance fans, 2x 205 W CPUs, 32x 64 GB RDIMMs, 16x 2.4 TB SAS HDDs, 1 x RAID 940-16i, 1x Intel X710-T2L 10GBASE-T 2-port OCP, 2x 1800 W PSUs, 3x A100 GPUs
- Government regulations (such as those prescribed by OSHA or European Community Directives) may govern noise level exposure in the workplace and may apply to you and your server installation. The actual sound pressure levels in your installation depend upon a variety of factors, including the number of racks in the installation; the size, materials, and configuration of the room; the noise levels from other equipment; the room ambient temperature, and employee's location in relation to the equipment. Further, compliance with such government regulations depends on a variety of additional factors, including the duration of employees' exposure and whether employees wear hearing protection. Lenovo recommends that you consult with qualified experts in this field to determine whether you are in compliance with the applicable regulations.

Shock and vibration

The server has the following vibration and shock limits:

- Vibration:
 - Operating: 0.21 G rms at 5 Hz to 500 Hz for 15 minutes across 3 axes
 - Non-operating: 1.04 G rms at 2 Hz to 200 Hz for 15 minutes across 6 surfaces
- Shock:
 - Operating: 15 G for 3 milliseconds in each direction (positive and negative X, Y, and Z axes)
 - Non-operating:
 - 23 kg - 31 kg: 35 G for 152 in./sec velocity change across 6 surfaces (3x GPU config, 2.5" config)
 - 32 kg - 68 kg: 35 G for 136 in./sec velocity change across 6 surfaces (20x 3.5" HDD config)

Particulate contamination

Airborne particulates (including metal flakes or particles) and reactive gases acting alone or in combination with other environmental factors such as humidity or temperature might damage the system that might cause the system to malfunction or stop working altogether.

The following specifications indicate the limits of particulates that the system can tolerate:

- Reactive gases:
 - The copper reactivity level shall be less than 200 Angstroms per month (Å/month)
 - The silver reactivity level shall be less than 200 Å/month
- Airborne particulates:
 - The room air should be continuously filtered with MERV 8 filters.
 - Air entering a data center should be filtered with MERV 11 or preferably MERV 13 filters.
 - The deliquescent relative humidity of the particulate contamination should be more than 60% RH
 - Environment must be free of zinc whiskers

For additional information, see the Specifications section of the documentation for the server, available from the Lenovo Documents site, <https://pubs.lenovo.com/>

Water infrastructure for the Lenovo Neptune Processor DWC Module

The Lenovo Processor Neptune Core Module is the liquid-based processor cooling offering for the SR650 V3, as described in the [Lenovo Processor Neptune Core Module](#) section.

The open-loop cooling module requires the following water infrastructure components in the rack cabinet and data center:

- Supported 42U or 48U rack cabinet

The 42U or 48U Heavy Duty Rack Cabinet (machine types 7D6D or 7D6E) are supported. Two 0U mounting points are required for the water manifolds, at the rear of the rack cabinet, one either side.

For information about the 42U and 48U Heavy Duty Rack Cabinets, see the product guide:

<https://lenovopress.lenovo.com/lp1498-lenovo-heavy-duty-rack-cabinets>

- 38-port water manifold (machine type 7DE6), installed in the rear of the rack cabinet

The manifold provides quick-disconnect couplings that each server in the rack are connected to.

Ordering information is in the table below. Note: With a rack full of SR650 V3 servers, only up to 19 of the manifold ports are used.

- Coolant distribution unit (CDU), either in-rack or in-row

In-rack CDUs are installed at the bottom of the rack cabinet. The supported in-rack CDU is as follows:

- [Lenovo Neptune DWC RM100 In-Rack CDU](#); see the [RM100 In-Rack Coolant Distribution Unit](#) section

In-row CDUs are separate cabinets that are typically installed at the end of a row of rack cabinets.

Examples of suitable in-row CDUs include (but not limited to):

- [Vertiv XDU450 CDU](#)
- [Vertiv XDU600 CDU](#)
- [Vertiv XDU100 CDU](#)

- Hose kit to connect to the CDU to the manifold

Ordering information is in the table below.

The following figure shows the major components of the solution.

Figure 29. Water manifold connections

Configuration requirements:

- Maximum number of SR650 V3 servers supported in a rack:
 - 48U rack: 19 servers
 - 42U rack with in-rack CDU: 18 servers
 - 42U rack without in-rack CDU: 19 servers
- Inlet water flow rate:
 - 0.5 LPM: Maximum 40°C inlet water temperature
 - 1.0 LPM: Maximum 45°C inlet water temperature
 - 1.5 LPM: Maximum 50°C inlet water temperature
- Water pressure requirement:
 - Maximum operating node inlet pressure = 43.5 psi (3 bars)

Note: Water quality must be maintained over the lifetime of the system to receive warranty and support on affecting components. For water quality requirement, see [Lenovo Neptune Direct Water-Cooling Standards](#)

The 38-drop water manifold and hoses can be ordered as listed in the following table.

Table 109. Water infrastructure ordering information

Part number	Feature code	Description
Manifold for 42U and 48U rack cabinet		
4XF7A90061	C5YW	ThinkSystem Neptune 38-Port Rack Manifold
Hoses to connect the manifold to an in-rack CDU		
4XF7A90232	C5YX	Connection Set, 38/45 Ports Manifold with in-rack CDU
4XF7A90233	C5YY	Connection Set, 38-Port Manifold with in-rack CDU for 48U Rack
Hoses to connect the manifold to an in-row CDU		
4XF7A90234	C5YZ	Hose Set, 1 inch EPDM, 1.3m, for Rack Manifold with in-row CDU
4XF7A90235	C5Z0	Hose Set, 1 inch EPDM, 2.3m, for Rack Manifold with in-row CDU

Configuration notes:

- This water connection solution described here cannot be used with the DW612S and N1380 enclosures as the water requirements are different.
- The hoses for in-row CDUs that are listed in the table above have Eaton FD83 quick-disconnect couplings

RM100 In-Rack Coolant Distribution Unit

The RM100 In-Rack Coolant Distribution Unit (CDU) can provide 100kW cooling capacity within the rack cabinet. It is designed as a 4U high rack device installed at the bottom of the rack. The CDU is supported in the 42U and 48U Heavy Duty Rack Cabinets.

For information about the 42U and 48U Heavy Duty Rack Cabinets, see the product guide:
<https://lenovopress.lenovo.com/lp1498-lenovo-heavy-duty-rack-cabinets>

The following figure shows the RM100 CDU.

Figure 30. RM100 In-Rack Coolant Distribution Unit

The CDU can be ordered using the CTO process in the configurators using machine type 7DBL. The following table lists the base CTO model and base feature code.

Table 110. RM100 ordering information

CTO model	Base feature	Description
7DBLCTOLWW	BRL4	Lenovo Neptune DWC RM100 In-Rack CDU

For details and exact specification of the CDU, see the In-Rack CDU Operation & Maintenance Guide:
https://pubs.lenovo.com/hdc_rackcabinet/rm100_user_guide.pdf

Professional Services: The factory integration of the In-Rack CDU requires Lenovo Professional Services review and approval for warranty and associated extended services. Before ordering CDU and manifold, contact the Lenovo Professional Services team (CDUsupport@lenovo.com).

Warranty upgrades and post-warranty support

The SR650 V3 has a 1-year or 3-year warranty based on the machine type of the system:

- 7D75 - 1 year warranty
- 7D76 - 3 year warranty
- 7D77 - 3 year warranty

Our global network of regional support centers offers consistent, local-language support enabling you to vary response times and level of service to match the criticality of your support needs:

- **Standard Next Business Day** – Best choice for non-essential systems requiring simple maintenance.
- **Premier Next Business Day** – Best choice for essential systems requiring technical expertise from senior-level Lenovo engineers.
- **Premier 24x7 4-Hour Response** – Best choice for systems where maximum uptime is critical.
- **Premier Enhanced Storage Support 24x7 4-Hour Response** – Best choice for storage systems where maximum uptime is critical.

For more information, consult the brochure [Lenovo Operational Support Services for Data Centers Services](#).

Services

Lenovo Data Center Services empower you at every stage of your IT lifecycle. From expert advisory and strategic planning to seamless deployment and ongoing support, we ensure your infrastructure is built for success. Our comprehensive services accelerate time to value, minimize downtime, and free your IT staff to focus on driving innovation and business growth.

Note: Some service options may not be available in all markets or regions. For more information, go to <https://lenovolocator.com/>. For information about Lenovo service upgrade offerings that are available in your region, contact your local Lenovo sales representative or business partner.

In this section:

- [Lenovo Advisory Services](#)
- [Lenovo Plan & Design Services](#)
- [Lenovo Deployment, Migration, and Configuration Services](#)
- [Lenovo Support Services](#)
- [Lenovo Managed Services](#)
- [Lenovo Sustainability Services](#)

Lenovo Advisory Services

Lenovo Advisory Services simplify the planning process, enabling customers to build future-proofed strategies in as little as six weeks. Consultants provide guidance on projects including VM migration, storage, backup and recovery, and cost management to accelerate time to value, improve cost efficiency, and build a flexibly scalable foundation.

- **Assessment Services**

An Assessment helps solve your IT challenges through an onsite, multi-day session with a Lenovo technology expert. We perform a tools-based assessment which provides a comprehensive and thorough review of a company's environment and technology systems. In addition to the technology based functional requirements, the consultant also discusses and records the non-functional business requirements, challenges, and constraints. Assessments help organizations like yours, no matter how large or small, get a better return on your IT investment and overcome challenges in the ever-changing technology landscape.

- **Design Services**

Professional Services consultants perform infrastructure design and implementation planning to support your strategy. The high-level architectures provided by the assessment service are turned into low level designs and wiring diagrams, which are reviewed and approved prior to implementation. The implementation plan will demonstrate an outcome-based proposal to provide business capabilities through infrastructure with a risk-mitigated project plan.

Lenovo Plan & Design Services

Unlock faster time to market with our tailored, strategic design workshops to align solution approaches with your business goals and technical requirements. Leverage our deep solution expertise and end-to-end delivery partnership to meet your goals efficiently and effectively.

Lenovo Deployment, Migration, and Configuration Services

Optimize your IT operations by shifting labor-intensive functions to Lenovo's skilled technicians for seamless on-site or remote deployment, configuration, and migration. Enjoy peace of mind, faster time to value, and comprehensive knowledge sharing with your IT staff, backed by our best-practice methodology.

- **Deployment Services for Storage and ThinkAgile**

A comprehensive range of remote and onsite options tailored specifically for your business needs to ensure your storage and ThinkAgile hardware are fully operational from the start.

- **Hardware Installation Services**

A full-range, comprehensive setup for your hardware, including unpacking, inspecting, and positioning components to ensure your equipment is operational and error-free for the most seamless and efficient installation experience, so you can quickly benefit from your investments.

- **DM/DG File Migration Services**

Take the burden of file migration from your IT's shoulders. Our experts will align your requirements and business objectives to the migration plans while coordinating with your team to plan and safely execute the data migration to your storage platforms.

- **DM/DG/DE Health Check Services**

Our experts perform proactive checks of your Firmware and system health to ensure your machines are operating at peak and optimal efficiency to maximize up-time, avoid system failures, ensure the security of IT solutions and simplify maintenance.

- **Factory Integrated Services**

A suite of value-added offerings provided during the manufacturing phase of a server or storage system that reduces time to value. These services aim at improving your hardware deployment experience and enhance the quality of a standard configuration before it arrives at your facility.

Lenovo Support Services

In addition to response time options for hardware parts, repairs, and labor, Lenovo offers a wide array of additional support services to ensure your business is positioned for success and longevity. Our goal is to reduce your capital outlays, mitigate your IT risks, and accelerate your time to productivity.

- **Premier Support for Data Centers**

Your direct line to the solution that promises the best, most comprehensive level of support to help you fully unlock the potential of your data center.

- **Premier Enhanced Storage Support (PESS)**

Gain all the benefits of Premier Support for Data Centers, adding dedicated storage specialists and resources to elevate your storage support experience to the next level.

- **Committed Service Repair (CSR)**

Our commitment to ensuring the fastest, most seamless resolution times for mission-critical systems that require immediate attention to ensure minimal downtime and risk for your business. This service is only available for machines under the Premier 4-Hour Response SLA.

- **Multivendor Support Services (MVS)**

Your single point of accountability for resolution support across vast range of leading Server, Storage, and Networking OEMs, allowing you to manage all your supported infrastructure devices seamlessly from a single source.

- **Keep Your Drive (KYD)**

Protect sensitive data and maintain compliance with corporate retention and disposal policies to ensure your data is always under your control, regardless of the number of drives that are installed in your Lenovo server.

- **Technical Account Manager (TAM)**

Your single point of contact to expedite service requests, provide status updates, and furnish reports to track incidents over time, ensuring smooth operations and optimized performance as your business grows.

- **Enterprise Software Support (ESS)**

Gain comprehensive, single-source, and global support for a wide range of server operating systems and Microsoft server applications.

For more information, consult the brochure [Lenovo Operational Support Services for Data Centers](#).

Lenovo Managed Services

Achieve peak efficiency, high security, and minimal disruption with Lenovo's always-on Managed Services. Our real-time monitoring, 24x7 incident response, and problem resolution ensure your infrastructure operates seamlessly. With quarterly health checks for ongoing optimization and innovation, Lenovo's remote active monitoring boosts end-user experience and productivity by keeping your data center's hardware performing at its best.

Lenovo Managed Services provides continuous 24x7 remote monitoring (plus 24x7 call center availability) and proactive management of your data center using state-of-the-art tools, systems, and practices by a team of highly skilled and experienced Lenovo services professionals.

Quarterly reviews check error logs, verify firmware & OS device driver levels, and software as needed. We'll also maintain records of latest patches, critical updates, and firmware levels, to ensure your systems are providing business value through optimized performance.

Lenovo Sustainability Services

- **Asset Recovery Services**

Lenovo Asset Recovery Services (ARS) provides a secure, seamless solution for managing end-of-life IT assets, ensuring data is safely sanitized while contributing to a more circular IT lifecycle. By maximizing the reuse or responsible recycling of devices, ARS helps businesses meet sustainability goals while recovering potential value from their retired equipment. For more information, see the [Asset Recovery Services offering page](#).

- **CO2 Offset Services**

Lenovo's CO2 Offset Services offer a simple and transparent way for businesses to take tangible action on their IT footprint. By integrating CO2 offsets directly into device purchases, customers can easily support verified climate projects and track their contributions, making meaningful progress toward their sustainability goals without added complexity.

- **Lenovo Certified Refurbished**

Lenovo Certified Refurbished offers a cost-effective way to support IT circularity without compromising on quality and performance. Each device undergoes rigorous testing and certification, ensuring reliable performance and extending its lifecycle. With Lenovo's trusted certification, you gain peace of mind while making a more sustainable IT choice.

Lenovo TruScale

Lenovo TruScale XaaS is your set of flexible IT services that makes everything easier. Streamline IT procurement, simplify infrastructure and device management, and pay only for what you use – so your business is free to grow and go anywhere.

Lenovo TruScale is the unified solution that gives you simplified access to:

- The industry's broadest portfolio – from pocket to cloud – all delivered as a service
- A single-contract framework for full visibility and accountability
- The global scale to rapidly and securely build teams from anywhere
- Flexible fixed and metered pay-as-you-go models with minimal upfront cost
- The growth-driving combination of hardware, software, infrastructure, and solutions – all from one single provider with one point of accountability.

For information about Lenovo TruScale offerings that are available in your region, contact your local Lenovo sales representative or business partner.

Regulatory compliance

The SR650 V3 conforms to the following standards:

- ANSI/UL 62368-1
- IEC 62368-1 (CB Certificate and CB Test Report)
- CSA C22.2 No. 62368-1
- Mexico NOM-019
- India BIS 13252 (Part 1)
- Germany GS
- TUV-GS (EN62368-1, and EK1-ITB2000)
- Brazil INMETRO
- South Africa NRCS LOA
- Ukraine UkrCEPRO
- Morocco CMIM Certification (CM)
- Russia, Belorussia and Kazakhstan, TP EAC 037/2016 (for RoHS)

- China CECP certificate, CQC3135
- China CELP certificate, HJ 2507-2011

External drive enclosures

The server supports attachment to external drive enclosures using a RAID controller with external ports or a SAS host bus adapter. Adapters supported by the server are listed in the [SAS adapters for external storage](#) section.

Note: Information provided in this section is for ordering reference purposes only. For the operating system and adapter support details, refer to the interoperability matrix for a particular storage enclosure that can be found on the Lenovo Data Center Support web site:

<http://datacentersupport.lenovo.com>

Table 111. External drive enclosures

Model	Description
4587HC1	Lenovo Storage D1212 Disk Expansion Enclosure (2U enclosure with 12x LFF drive bays)
4587HC2	Lenovo Storage D1224 Disk Expansion Enclosure (2U enclosure with 24x SFF drive bays)
7DAHCTO1WW	Lenovo ThinkSystem D4390 Direct Attached Storage (4U enclosure with 90x LFF drive bays)

For details about supported drives, adapters, and cables, see the following Lenovo Press Product Guides:

- Lenovo Storage D1212 and D1224
<http://lenovopress.lenovo.com/lp0512>
- Lenovo ThinkSystem D4390
<https://lenovopress.lenovo.com/lp1681>

External storage systems

Lenovo offers the ThinkSystem DE Series, ThinkSystem DG Series and ThinkSystem DM Series external storage systems for high-performance storage. See the DE Series, DG Series and DM Series product guides for specific controller models, expansion enclosures and configuration options:

- ThinkSystem DE Series Storage
<https://lenovopress.com/storage/thinksystem/de-series#rt=product-guide>
- ThinkSystem DM Series Storage
<https://lenovopress.com/storage/thinksystem/dm-series#rt=product-guide>
- ThinkSystem DG Series Storage
<https://lenovopress.com/storage/thinksystem/dg-series#rt=product-guide>

External backup units

The following table lists the external backup options that are offered by Lenovo.

Table 112. External backup options

Lenovo Financial Services

Why wait to obtain the technology you need now? No payments for 90 days and predictable, low monthly payments make it easy to budget for your Lenovo solution.

- **Flexible**

Our in-depth knowledge of the products, services and various market segments allows us to offer greater flexibility in structures, documentation and end of lease options.

- **100% Solution Financing**

Financing your entire solution including hardware, software, and services, ensures more predictability in your project planning with fixed, manageable payments and low monthly payments.

- **Device as a Service (DaaS)**

Leverage latest technology to advance your business. Customized solutions aligned to your needs. Flexibility to add equipment to support growth. Protect your technology with Lenovo's Premier Support service.

- **24/7 Asset management**

Manage your financed solutions with electronic access to your lease documents, payment histories, invoices and asset information.

- **Fair Market Value (FMV) and \$1 Purchase Option Leases**

Maximize your purchasing power with our lowest cost option. An FMV lease offers lower monthly payments than loans or lease-to-own financing. Think of an FMV lease as a rental. You have the flexibility at the end of the lease term to return the equipment, continue leasing it, or purchase it for the fair market value. In a \$1 Out Purchase Option lease, you own the equipment. It is a good option when you are confident you will use the equipment for an extended period beyond the finance term. Both lease types have merits depending on your needs. We can help you determine which option will best meet your technological and budgetary goals.

Ask your Lenovo Financial Services representative about this promotion and how to submit a credit application. For the majority of credit applicants, we have enough information to deliver an instant decision and send a notification within minutes.

Seller training courses

The following sales training courses are offered for employees and partners (login required). Courses are listed in date order.

1. **Partner Technical Webinar - OneIQ Demo**

2025-09-08 | 60 minutes | Employees and Partners

In this 60-minute replay, Joe Allen, Lenovo Senior Solution Architect for LETS, demonstrated the OneIQ tool. He showed how the collector is dispatched, how the data can be viewed, and how you build solutions based on the collected data.

Tags: Server, ThinkSystem

Published: 2025-09-08

Length: 60 minutes

Start the training:

Course code: DVHPC223

9. Lenovo Data Center Product Portfolio

2025-06-11 | 20 minutes | Employees and Partners

This course introduces the Lenovo data center portfolio, and covers servers, storage, storage networking, and software-defined infrastructure products. After completing this course about Lenovo data center products, you will be able to identify product types within each data center family, describe Lenovo innovations that this product family or category uses, and recognize when a specific product should be selected.

Course objectives:

1. Identify product types within each data center family
2. Describe the features of the product family or category
3. Recognize when a specific product should be selected

12. **Lenovo Cloud Architecture VTT: Supercharge Your Enterprise AI with NVIDIA AI Enterprise on Lenovo Hybrid AI Platform**

2025-04-17 | 75 minutes | Employees and Partners

Join us for an in-depth webinar with Justin King, Principal Product Marketing Manager for Enterprise AI exploring the power of NVIDIA AI Enterprise, delivering Generative and Agentic AI outcomes deployed with Lenovo Hybrid AI platform environments.

In today's data-driven landscape, AI is evolving at high speed, with new techniques delivering more accurate responses. Enterprises are seeking not just an understanding but also how they can achieve AI-driven business outcomes.

With this, the demand for secure, scalable, and high-performing AI operations-and the skills to deliver them-is top of mind for many. Learn how NVIDIA AI Enterprise, a comprehensive software suite optimized for NVIDIA GPUs, provides the tools and frameworks, including NVIDIA NIM, NeMo, and Blueprints, to accelerate AI development and deployment while reducing risk-all within the control and security of your Lenovo customer's hybrid AI environment.

14. **ThinkSystem Rack and Tower Introduction for ISO Client Managers**

2024-12-10 | 20 minutes | Employees Only

In this course, you will learn about Lenovo's Data Center Portfolio, its ThinkSystem Family and the key features of the Rack and Tower servers. It will equip you with foundational knowledge which you can then expand upon by participating in the facilitated session of the curriculum.

Course Objectives:

- By the end of this course, you should be able to:
- Identify Lenovo's main data center brands.
- Describe the key components of the ThinkSystem Family servers.
- Differentiate between the Rack and Tower servers of the ThinkSystem Family.
- Understand the value Rack and Tower servers can provide to customers.
