- Pressure gauge for precise coffee extraction
- European design with anti-fingerprint coated metal housing

280 g dual bean container, 58 mm stainless-steel portafilter, Premium calibrated tamper, Americano button, 450 ml temperature perfection milk jug

PSA3228/01

Highlights

280 g dual bean container

Dive into a world of coffee variety with the 280 g dual bean container, which preserves their freshness thanks to our effective aroma seal. Elevate your coffee experience by exploring different bean types, from light to dark roasts all at once, while ensuring that each brew retains its rich aroma.

58 mm steel portafilter

Indulge in a rich coffee and crema from home. The Barista Brew espresso machine is designed with a professional-grade 58mm stainless steel portafilter and single & dual-walled filter baskets. This portafilter size allows you to create a beautiful golden-brown espresso with aromatic foamy crema while providing more consistent extraction across the coffee puck due to a wider distribution of water. Plus, it accommodates a larger dose of coffee grounds for a richer and more robust brew.

Premium calibrated tamper

Tamp your ground coffee beans effortlessly using the stainless steel calibrated tamper with a flathead. When brewing coffee with the Philips semi-automatic coffee machine, use the right tamping pressure and create a balanced, consistently leveled tamping surface. Elevate your coffee brewing experience with precision and ease.

Americano button

Immerse yourself in the essence of a true Americano with just a simple press of a button. With the Philips Barista Brew, you now have the added convenience of an integrated hot water outlet.

Perfect temperature milk jug

Enjoy the ease of creating smooth microfoam, perfect for latte art, with our 450 ml temperature perfection milk jug and powerful steam wand. The temperature strip on the milk jug enables you to achieve the right milk foam temperature and create the velvety texture effortlessly, so you can savour your coffee just the way you like it.

Countertop-safe tamp system

Elevate your coffee routine with our countertop-safe tamping system. Achieve the perfect tamp confidently and conveniently, without any risk to your countertops thanks to the integrated tamping rubber on the bottom of the portafilter.

PID temperature control

The PID temperature control system ensures the accuracy and stability of brewing temperature. The pre-infusion system helps prevent a channelling effect. Only full integration of both systems can ensure a balanced extraction.

Metal conical burr grinder

Uncover new flavour depths with 15 different grind sizes (super-fine to coarse) from the metal conical burr grinder. To enhance your espresso's flavours, consider using a finer grind, like setting 4, in your recipes.

Pressure gauge

Achieve precise water pressure thanks to the integrated pressure gauge that guides your brewing status and alerts you when optimal pressure has been reached.

Specifications

Safety feature

Automatic shut-off timer: Yes
Safety certification: Yes

Technical Specifications

Energy Efficiency rating: Class A
Power: 1350 W
Voltage: 230 V
Frequency: 50 Hz
Number in pack: 1

Weight and Dimensions

Product Length: 334 mm
Product Width: 320 mm
Product Height: 439 mm
Product Weight: 8.6 kg
Package Length: 420 mm
Package Width: 380 mm
Package Height: 502 mm
Package Weight: 12.4 kg

Country of Origin

Produced In: China

Compatibility

Included Accessories 1: Portafilter
Included Accessories 2: Single and Double/1 cup & 2 cup Wall Filter Baskets
Included Accessories 3: Calibrated Tamper
Included Accessories 4: Powder ring
Related Accessories 1: Coffee oil removal tablets
Related Accessories 2: Espresso machine descaler
Related Accessories 3: Espresso stand

Durability

User Manual: > 75% recycled paper
Packaging: > 95% recycled material
