ICY BOX **IB-575SSK-12G** 5 bay 3.5" SATA/SAS HDD backplane

Stress resistant

The best materials are used in the enclosure, making this 3.5" drive solution the ideal partner for extreme loads. The backplane with its lockable bays is also ideally equipped in terms of security requirements.

Cool and silent

The active 80x80 mm fan works efficiently and adjusts its running performance to the temperatures as required, making the housing pleasantly quiet. The aluminium housing also contributes to passive convection to the surroundings.

Real time

Visual and acoustic signals indicate the current status of the hard drives and the fan. The alarm temperature for the signal can be set to three levels, 55° C, 60° C and 65° C.
