

# EB-PQ2008B

Perfect for anyone needing an ultra-high resolution experience, the EB-PQ2008B is a powerful, compact 8,000lm 4K projector.

Designed to engage and captivate audiences with ultra-high resolution, large format content, the EB-PQ2008B uses 3LCD technology to deliver outstanding colour reproduction, while Epson's patented 4K Crystal Motion technology offers stunning image quality. Affordable and energy-efficient, the projector also features interchangeable lenses, a light and compact design and extensive connectivity.

## Limitless creativity

Building on the success of the EB-PU Series, the EB-PQ2008B is not only small and light, but is highly affordable, versatile, energy-efficient and packed with advanced features. Allowing you the freedom to create unforgettable immersive experiences.

## A revolutionary 4K experience

Marvel at the clarity of the images produced by Epson's latest 4K technology. Combining its patented, state of the art 4K Crystal Motion and double micro-lens array technologies, Epson achieves a new benchmark in 4K image quality.

## Fantastically flexible

Featuring a wide range of connectivity, including HDMI in/out supporting 120Hz 4K. This high brightness projector also benefits from cross-platform lens compatibility, using the same 4K lenses as the existing EB-PU Series, including the ELPLX02S zero-offset ultra-short throw lens which is perfect for immersive spaces. This projector is supplied 'body-only', allowing you to build the perfect solution for your installation.

## Reliable

Built for exceptional reliability, the EB-PQ2008B is compatible with the ELPAF63 External Air Filter and provides up to 20,000 hours maintenance-free operation, or even longer in extended modes.

## Extensive software

Compatible with the ELPEC01 camera, Epson Projector Professional Tool and Epson Config Tool for a wealth of calibration, assistance and control functionality.

## KEY FEATURES

- **Patented 4K and imaging technology**  
Outstanding 4K image quality delivers superb immersivity
- **Ultra-compact and lightweight**  
Small, powerful 8,000lm 4K projector
- **Cross-platform lens compatibility**  
Lets you build the optimal projection solution for every requirement
- **Fit-and-forget reliability**  
Up to 20,000 hours maintenance free
- **Reduced environmental impact**  
Energy-efficient with reduced requirements for packaging and transport
- **Legal Statement**  
Complies with The UK Product Security and Telecommunications Infrastructure (Product Security) requirements. Epson will provide security updates for 7 years from purchase

## PRODUCT SPECIFICATIONS

### TECHNOLOGY

|                   |                                             |
|-------------------|---------------------------------------------|
| Projection System | 3LCD Technology, RGB liquid crystal shutter |
| LCD Panel         | 1.04 inch with C2 Fine                      |

| Supported Humidity      | Operation 20% - 80%, Storage 10% - 90%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|                         | Improper installation of the projector on a ceiling or wall may cause it to fall, leading to potential injury or damage. To prevent this, ensure the ceiling mount is securely fastened using all mounting points specified in the projector's user guide which is available to download from our support website ( <a href="http://www.epson.eu/support">www.epson.eu/support</a> ). We recommend the use of Epson-approved ceiling mounts that are compatible with the projector model. Additionally, attach a safety wire of adequate strength to secure the projector to the ceiling mount. |
|                         | If the projector is suspended from a ceiling or wall mount and installed in an environment with heavy oil smoke or places where oils or chemicals are volatilized, places where a lot of smoke or bubbles are used for event staging, or where aroma oils are frequently burned, it can make certain parts of our products susceptible to a material degradation which over time could break and cause the projector to drop from the ceiling.                                                                                                                                                  |
|                         | We recommend that the equipment be inspected on a regular basis, either by the user or by a qualified professional, to ensure continued safe operation.                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|                         | If you are concerned about the environment in which your projector is installed, or if you have any other questions, please contact our support department and they can provide additional assistance.                                                                                                                                                                                                                                                                                                                                                                                          |
