**EN 60704-2-13 - Household and similar electrical appliances – Test code for the determination of airborne acoustical noise – Part 2-13: Particular requirements for range hoods**

**EN 50564 - Electrical and electronic household and office equipment. Measurement of low power consumption**

**Suggestions for a correct use in order to reduce the environmental impact:**

- **Switch ON** the hood at minimum speed when you start cooking and kept it running for few minutes after cooking is finished.
- **Increase the speed** only in case of large amount of smoke and vapour and use boost speed(s) only in extreme situations.
- **Replace the charcoal filter(s)** when necessary to maintain a good odour reduction efficiency.
- **Clean the grease filter(s)** when necessary to maintain a good grease filter efficiency.
- **Use the maximum diameter** of the ducting system indicated in this manual to optimize efficiency and minimize noise.
