

ELITE 10 GEN 2

Spatial sound like never before

Next generation music experience with world's first LE Audio smart case¹

ENHANCED SPATIAL SOUND WITH DOLBY HEAD TRACKING

Experience a whole new dimension of sound with Elite 10 Gen 2. The multi-dimensional spatial sound, enhanced by Dolby Head Tracking technology, creates an immersive Dolby Atmos experience that lights up your senses. As you turn your head, the audio moves with you and creates a more natural sound that keeps you in the middle of your music. Equipped with 10mm speakers, the Elite 10 Gen 2 deliver smooth, premium audio that takes your favorite song, movies and games to new heights. **Ignite your senses and get ready to hear the sound of a new generation.**

SMART CASE FOR STREAMING ANYWHERE

Introducing the world's first LE Audio smart case, equipped with an advanced chip for seamless audio streaming from any device¹. Simply plug in the case during a flight or to your TV at home (using the USB-C/3.5mm cable provided²) to stream the content to your earbuds and enjoy it in spatial sound. **Plug & play to experience cinematic sound anywhere.**

COMFORTABLY SINK INTO PERFECT SOUND

Sink into unbeatable all-day comfort with Elite 10 Gen 2. Thanks to the semi-open design and sleek shape, the earbuds provide a light and airy feel, removing the sensation of having your ears plugged. The unique ear gel design makes the earbud sit perfectly in your ear, with a silky soft touch for all-day wearing. **So comfortable you'll forget you're wearing them.**

CONTROL THE SOUND AROUND YOU

New Natural HearThrough lets you stay tuned to the world around you, cutting through wind noise for clear audio, even in blustery conditions. When you need to focus, activate the improved Jabra Advanced Active Noise Cancellation for up to 2x more noise cancellation than Elite 10 previous generation. **Whether you're zoning in or tuning out, it's all in your control.**

CALLS WITHOUT INTERRUPTIONS

Keep every call clear with our 6 perfectly positioned mics. The mics can distinguish which sounds are background noise and only pick up your speaking voice, so you won't compete with the sound around you even when it's noisy and crowded. The most effective noise-reduction algorithms are automatically switched on to provide a superior call performance depending on your activity or location to keep your speech super sharp. **Never misheard, even when you're away from home.**

SEAMLESS SWITCHING WITH BLUETOOTH MULTIPOINT™

Stay connected to multiple devices with Bluetooth Multipoint. Pair your earbuds with your phone and laptop³ to effortlessly switch between calls and your favorite movie at lightning speed. **Seamless switching whenever you need it.**

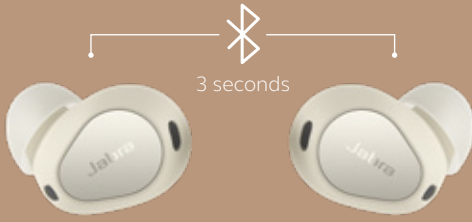

EASY PAIRING EVERY TIME

Simple Bluetooth pairing enables your device to find your earbuds without having to connect manually. If you're an Android™ or Windows user, Fast Pair and Microsoft Swift Pair will have you connected in seconds⁴. Whatever your device, your buds are ready for a link up.

HOW TO PAIR

Push the buttons on both earbuds for 3 seconds, then go to the Bluetooth menu of your phone to connect your earbuds, or with Fast Pair, your Android phone will instantly ask to connect to your earbuds if nearby.
