42.5" monitor with 4K resolution

With a 42.5 inch screen diagonal, the EIZO FlexScan EV4340X is ideal for use in control rooms, control centers, trading floors or similar work environments: Its 4K resolution (3840 x 2160 pixels) offers four times as much information as a Full HD monitor. In addition to two HDMI inputs and a DisplayPort connection, the monitor has full USB-C docking functionality including DisplayPort Alt Mode, transmission of video, audio and USB data signals and a power supply of up to 94 watts. The EV4340X also masters operation with multiple computers or image sources with ease. The integrated KVM switch allows the use of a keyboard and mouse combination on two computers. Thanks to its picture-in-picture (PbP) function, the monitor can display up to four video signals side by side. The button on the front can be used to conveniently switch between 12 available layouts. The picture-in-picture (PiP) function for two signal sources offers efficient screen utilization for presentations and meetings. These and other important functions can be controlled on the monitor or via the supplied remote control. Therefore, the EIZO FlexScan EV4340X is also well suited for wall mounting when buttons on the device are not accessible. Its slim design makes grouping in multi-screen systems particularly easy.

- √ 42.5" monitor with large display, 4K resolution and 104 ppi
- Signal inputs: USB-C (DisplayPort Alt Mode), display port, 2 x HDMI
- Picture-by-picture for 4 signal sources and picture-inpicture for 2 signal sources
- KVM switch function for 2 signal sources
- Docking function via USB-C with DisplayPort signal,
 LAN and power supply up to 94 watts

- Optionally in black or white housing color
- Contrast 1000:1, brightness 350 cd/m², 178° viewing angle
- Auto EcoView and EcoView Optimizer for maximum energy savings and optimum ergonomics
- Demonstrably environmentally conscious and socially responsible production
- 5-year warranty for maximum investment security
