

Slim Wireless USB Mini Keyboard

12 Multimedia/Function Keys, USB-A Nano Receiver, Compact, Low-Profile Format, for PC and Laptop, Black

Part No.: 180764

EAN-13: 0766623180764 | UPC: 766623180764

Wireless, compact computer keyboard for space-saving, convenient typing on PC and laptop

Use the Manhattan Slim Wireless USB Mini Keyboard on your lap, at your desk, or anywhere that falls within 10 m (33 ft.) of the installed USB-A dongle. Its compact design combines great features you expect in a standard keyboard but takes up a lot less space.

The benefits of wireless freedom

Cut the cord from your wired USB keyboard to declutter your desk and raise your typing comfort over the touchscreen on your tablet/phone. It requires just one AAA battery and is equipped with an intelligent power management system that conserves battery life. When the keyboard is not in use, it will automatically power down. Once you start typing again, it turns back on.

Comfortable typing plus quick multimedia access

The membrane key switches give you a comfortable, highly precise typing experience. Twelve function keys offer quick access to frequently used multimedia commands like email, browser or music control.

Ultra-compact and convenient

Its compact form is ideal for small workspaces, providing more room for your mouse. The adjustable tilting mechanism keeps the keyboard angled for maximum typing comfort. Rubber feet to prevent slipping and to protect your desk from scratches.
