

Fast and efficient business scanning solutions

Designed for business efficiency

The WorkForce DS-800WN and DS-900WN are high speed, Wi-Fi and network-integrated scanners with open platform compatibility. These high performance sheetfed scanners have been designed to suit a wide range of businesses: from healthcare providers who need to improve efficiency and regulation compliance by digitising patient records and administrative documents, to legal firms that need to scan and archive legal documents, contracts and case files, through to large enterprises with high-volume document scanning needs.

Fast and efficient

The DS-800WN and DS-900WN are both designed to process and digitise high volumes of documents, quickly and securely. The DS-800WN scans at 50ppm/100ipm, has a daily duty cycle of 8,000 pages and paper alignment plate is available as an option. The DS-900WN features scan speeds of 70ppm/140ipm, a daily duty cycle of 11,000 pages and includes a paper alignment plate.

They also boast large 100 sheets ADF capacity, versatile media handling, exceptional image quality and enhanced paper protection. Both A4 sheetfed scanners are built with efficiency in mind: they offer low power consumption, whether idle or in use, and each is made from 30% recycled plastics (from discarded IT products).¹

Network connectivity

Integrated network connectivity means that each scanner can be shared by multiple users. User authentication enables the creation of personal settings, improving productivity and operation security. The DS-800WN and DS-900WN form part of the Epson ScanWay range; meaning the scanners can be operated directly from the LCD touchscreen panel, without the use of a PC.

Seamless integration

Both scanners feature web-based, open platform compatibility, which allows seamless integration with Epson software or third-party software solutions. Businesses will be able to customise systems and integrate the scanner into existing infrastructures, processes and workflows. The scanner will improve productivity by becoming part of a comprehensive document management system, which enables the smooth flow of documents throughout the business.

Quality and media versatility

The scanners can handle a wide range of media, including: plain paper, recycled paper, postcards, envelopes, business cards, plastic cards and perforated originals, thermal paper, laminated paper, originals with uneven surfaces and even very long documents (up to 6096mm).

Outstanding image quality is achieved thanks to the automatic colour detection, text enhancement, edge correction and punch hole removal functionality. The scanners' ultrasonic sensors detect any double feeds, which helps limit damage to the original documents and improves efficiency.

Features and benefits summary

Open platform

Compatible with a wide range of Epson and 3rd Party solutions

High speed

DS-800WN: 50ppm/100ipm, 8,000 pages daily duty cycle, 100-sheet ADF
DS-900WN: 70ppm/140ipm, 11,000 pages daily duty cycle, 100-sheet ADF

Network connectivity

USB 3.2 Gen1, Wi-Fi, Wi-Fi Direct, LAN

User-friendly

Customisable LCD touchscreen, scan direct - no PC required

Efficient

Low power consumption

Made from 30% recycled plastics (from discarded IT products).¹

Solutions that add value, streamline processes and increase workflow

Discover how Epson and its partner solutions take advantage of our scanners to meet the needs of businesses from SMBs to large enterprises, and can be adapted to suit vertical market needs.

Epson Solutions Suite

Epson Solutions Suite

Epson business scanners offer a full suite of advanced scanning solutions designed to help businesses easily manage the installation, configuration and operation of their print and scan environment.

With workflow and security, fleet management, remote services, and third-party integration, Epson Solutions Suite has you covered.

For more about Epson solutions please visit support.epson.net/stories/en/

Fleet management

Epson Device Admin (EDA)

Control, analyse and manage your device fleet centrally from one intuitive interface, designed to increase productivity, reduce costs and ensure maximum security.

Workflow and security

Epson Print Admin (EPA)

EPA is a server-based solution that creates a secure scanning environment through user-authentication with card readers, logins/passwords and PIN codes. It also offers additional features such as 'scan and send to me' (email and folder), employee-education notifications and enhanced administrative tools that provide welcome boosts to productivity, environmental goals and efficiency.

The Advanced Workflow functions enable administrators to easily create scan profiles with document capture, processing and delivery to predefined destinations, including cloud-storage services. Automated capture enables the creation of Searchable PDF, PDF/A in 29 languages, job separation with barcodes, folder and document naming with Zonal OCR, barcodes, skip blank pages, and much more.

Epson Print Admin Serverless (EPA Serverless)

Enables business customers to seamlessly integrate the DS-800WN / DS-900WN Document scanners into their security and compliancy rules and regulations without the burden of maintaining a server system.

Document Capture Pro (DCP)

Document Capture Pro (DCP) enables individuals to scan, save and share information around the business easily. Advanced features for naming, separating and routing documents makes scanning easy – and logical. Save and send files in common formats and create simple job profiles for one-touch push scanning.

Scan to standard destinations such as email, folder and FTP or upload your scanned documents to popular cloud services such as OneDrive, OneNote, SharePoint Online, Teams, Google Drive and Dropbox.

Mobile and Cloud scanning

Epson Scan to Cloud

Scan documents directly to email or cloud storage accounts (SharePoint Online, Teams, OneDrive for Business, Google Drive, Dropbox, Box and Evernote).

Remote Service and Support

Epson Remote Services (ERS)

Reduce service costs using our cloud-based device monitoring and management system that delivers advanced remote diagnostics. Secure and easy to integrate, increase customer satisfaction by enabling faster response times, fewer on-site visits and higher first fix rates.

ERS Embedded Agent (ERS-Agent)

Benefit from the added value of ERS in combination with the embedded agent on the DS-800WN /DS-900WN Document scanners for a seamless setup and use.

Third party integration

Epson Open Platform (EOP)

Users gain complete control of their scanning operations via a web-based application that allows them to adapt their scanner to meet specific and changing business requirements, as enterprise IT systems evolve. Third party ISV solutions are compatible with Epson Open Platform devices. Please get in touch with your Epson local representative for a full list of third party solutions compatible with Epson devices.
